Drug Injecting And Hiv Infection:

Drug Injecting and HIV Infection Andrew Ball, Don C. Des Jarlais, Gerry V. Stimson, 2003-09-02 This is a comparative international study of drug injecting behaviour and HIV infection based on the World Health Organization's study of 13 cities as disparate as Athens Bangkok Glasgow and Rio de Janeiro

Preventing HIV Infection Among Injecting Drug Users in High-Risk Countries Institute of Medicine, Board on Global Health, Committee on the Prevention of HIV Infection Among Injecting Drug Users in High-Risk Countries, 2006-12-20 Drug dependence is a complex chronic relapsing condition that is often accompanied by severe health psychological economic legal and social consequences Injecting drug users are particularly vulnerable to HIV and other bloodborne infections such as hepatitis C as a result of sharing contaminated injecting equipment All drug dependent individuals including injecting drug users IDUs may be at increased risk of HIV infection because of high risk sexual behaviors There are an estimated 13.2 million injecting drug users IDUs world wide 78 percent of whom live in developing or transitional countries The sharing of contaminated injecting equipment has become a major driving force of the global AIDS epidemic and is the primary mode of HIV transmission in many countries In some cases epidemics initially fueled by the sharing of contaminated injecting equipment are spreading through sexual transmission from IDUs to non injecting populations and through perinatal transmission to newborns Reversing the rise of HIV infections among IDUs has thus become an urgent global public health challenge one that remains largely unmet In response to this challenge the Institute of Medicine convened a public workshop in Geneva in December 2005 to gather information from experts on IDU driven HIV epidemics in the most affected regions of the world with an emphasis on countries throughout Eastern Europe the Commonwealth of Independent States and significant parts of Asia Experts from other regions also provided information on their experiences in preventing HIV infection among IDUs This report provides a summary of the workshop discussions Preventing HIV Infection among Injecting Drug Users in High Risk Countries describes the evidence on the intermediate outcomes of drug related risk and sex related risk prior to examining the impact on HIV transmission This report focuses on programs that are designed to prevent the transmission of HIV among injecting drug users These programs range from efforts to curtail non medical drug use to those that encourage reduction in high risk behavior among drug users Although the report focuses on HIV prevention for IDUs in high risk countries the Committee considered evidence from countries around the world The findings and recommendations of this report are also applicable to countries where injecting drug use is not the primary driver but in which injection drug use is nevertheless associated with significant HIV transmission

Deterministic and Stochastic Models of AIDS Epidemics and HIV Infections with Intervention W. Y. Tan, Hulin Wu, 2005 Only book on extensive deterministic models statistic models stochastic models and state space models and statistical methods for HIV epidemic involving IV drug usage and HIV epidemic in homosexual populations Provides most

recent biological insights into HIV pathogenesis and HIV kinetics at the cellular level and illustrates how to build up mathematical models based on these biological insights Only publication that provides in depth analysis of HAART treatment protocols and discusses possible improvements to the HAART protocol The book also provides connection between pharmacokinetics with treatment in HIV infected individuals

Longitudinal Studies of HIV Infection in Intravenous Drug Users Peter Hartsock, Sander G. Genser, 1991 This monograph is based on the papers from a technical review on Longitudinal Studies of HIV Infection in Intravenous Drug Users Methodological Issues in Natural History Research held on September 10 1987 The review meeting was sponsored by the Division of Clinical Research s Clinical Medicine Branch National Institute on Drug Abuse

Social Networks, Drug Injectors' Lives, and HIV/AIDS Samuel R. Friedman, Richard Curtis, Alan Neaigus, Benny Jose, Don C. Des Jarlais, 2005-12-27 Social Networks Drug Injectors Lives and HIV AIDS recognizes HIV as a socially structured disease its transmission usually requires intimate contact between individuals and shows how social networks shape high risk behaviors and the spread of HIV The authors recount the groundbreaking use of social network methods ethnographic direct observation techniques and in depth interviews in their study of a drug using community in Brooklyn New York They provide a detailed documentary of the lives of community members They describe drug use the affects of poverty and homelessness the acquisition of money and drugs and social relationships within the group Social Networks Drug Injectors Lives and HIV AIDS shows that social networks and contexts are of crucial importance in understanding and fighting the AIDS epidemic These findings should revitalize prevention efforts and reshape social policy

The Impact of AIDS: Psychological and Social Aspects of HIV Infection Jose Catalan, Barbara Hedge, 1997-05-22 This volume contains a selection of key contributions to the discussion on the psychological and social implications on HIV infection It contains up to date and authoritative papers by senior practitioners and researchers in the field of the psychological and social aspects of HIV infection The book will appeal to those involved in providing care

Characterizing the HIV/AIDS Epidemic in the Middle East and North Africa Francisca Ayodeji Akala, Iris Semini, 2010 Despite global progress in understanding the epidemiology of the human immunodeficiency virus HIV knowledge about the epidemic in the Middle East and North Africa MENA remains limited and subject to much controversy In the more than 25 years since the discovery of HIV no scientific study has provided a comprehensive data driven synthesis of the spread of HIV AIDS acquired immunodeficiency syndrome in the region Consequently the effectiveness of policies programs and resources intended to address the spread of HIV AIDS has been compromised This report aims to fill the knowledge gap by providing the first ever comprehensive scientific assessment and data driven epidemiological synthesis of HIV s spread in MENA It is based on a literature review and analysis of thousands of largely unrecognized publications reports and data sources extracted from scientific literature or collected from sources at the local national and regional levels The resulting collection of data provides a solid foundation on which efforts to stem the spread of HIV AIDS can be

DiClemente,Sten H. Vermund,2006-04-11 Globally action to prevent HIV spread is inadequate Over 16 000 new infections occur every day Yet we are not helpless in the face of disaster as shown by the rich prevention experience analyzed in this valuable new compendium Best pr tice exists a set of tried and tested ways of slowing the spread of HIV of persuading and enabling people to protect themselves and others from the virus Individually features of best practice can be found almost

everywhere The tragedy on a world scale is that prevention is spotty not comprehensive the measures are not being applied on anywhere near the scale needed or with the right focus or synergy The national response may concentrate solely on sex workers for example Elsewhere efforts may go into school education for the young but ignore the risks and vulnerability of men who have sex with men Action may be patchy geographically AIDS prevention may not benefit from adequate commitment from all parts and sectors of society compromising the sustainability of the response In some countries matters are still worse there is still hardly any action at all against AIDS and scarcely any effort to make HIV visible It is no wonder that the epidemic is still emerging and in some places is altogether out of control
