susceptible to manipulation he will not quit drugs Don't under any circumstances bring in psychologists favorite tricks here such as personal boundaries desire to control he's an adult codependency etc This has absolutely nothing to do with your situation Your child is sick just as if he had contracted something else that was incompatible with life He is not his own master now and is not an adult at all chemistry is stronger than personality and reason Also do not believe those who claim that a drug addict must reach the bottom himself They say that he will then push off from it and swim out This is not so believe me Only a few emerge but tens of thousands go to the grave If we use common sense it becomes obvious that the role of parents in a child's drug addiction is generally insignificant Neither the upbringing nor the environment of the child nor the moral climate in the family matter You have to try everything in life Seriously Then try poop Why not What did poop do to deserve not being on the list Or try changing your gender You haven't tried sex as a woman yet have you Try it You can also try jumping from the roof Some people fly from roofs You should know that drug addiction has an ugly face It is cruel merciless it will insult you with the worst words it will convince you of your madness it will spit on all the good that you try to do and will turn it over in the light of condemnation of you But if you've taken on a task don't say you can't handle it If you've started treatment and taken even one step there's no turning back You'll do harm And you'll confuse the sick person completely If you don't feel sorry for other people and the addict's comfort is more important to you then think about the fact that he can also crash and become disabled Are you sure that being bedridden for life after an accident he won't thank you for this disservice Or if he gets put in jail for a long time for hitting a person will you be happy Drug addicts are difficult people You need to learn to thoroughly understand their sick logic You need to be able to predict the motives of their actions and statements You must be stronger than them in knowledge of the subject You must be able to hit the ball of any of their manipulations You must not give in to provocations And you must have the levers of control over them But the end of this fairy tale is usually sad The addict breaks down within the first week as soon as he arrives home A couple of months at most And the parents realize that they have paid a million for hotel services and a couple of excursions It's a fact They think like that Their megalomania is a symptom of illness The loss of criticism is a symptom of illness What day are we talking about They have only one bottom the one that is two meters below in the ground They have no other bottom

**Breaking Free of the Co-Dependency Trap** Janae B. Weinhold, Barry K. Weinhold=, 2010-09-24 This bestselling book now in a revised edition radically challenges the prevailing medical definition of co-dependency as a permanent progressive and incurable addiction Rather the authors identify it as the result of developmental traumas that interfered with the infant parent bonding relationship during the first year of life Drawing on decades of clinical experience Barry and Janae Weinhold correlate the developmental causes of co-dependency with relationship problems later in life such as establishing and maintaining boundaries clinging and dependent behaviors people pleasing and difficulty achieving success in the world Then they focus on healing co-dependency providing compelling case histories and practical activities to help readers heal early trauma and

transform themselves and their primary relationships
