Drugs And Suicide When Other Coping Strategies Fail:

Alcohol and Substance Abuse in Adolescence Judith Brook, Barry Stimmel, 2014-05-22 This timely volume explores the possible reasons that young people turn to drugs the most effective methods to manage those who are afflicted and ways to educate youth to prevent their initial drug involvement *Development as Action in Context* Rainer K. Silbereisen, Klaus Eyferth, Georg Rudinger, 2013-04-17 Most contributions to this volume originated as papers given at an international conference on Integrative Perspectives on Youth Development held in Berlin West in May 1983 This conference was part of a 6 year longitudinal research program on the causes of substance use among adolescents in Berlin which is now in its fourth year The conference title deliberately did not refer to substance use However its relevance to an explanation of drug related problem behavior was made evident to everyone invited to the conference The search for integrative perspectives in youth development originated in a dilemma that became obvious during the planning of intensive research on concomitants of substance use In the methodology for research on youth development there were two lines of thought that seemed completely unrelated to each other One line of thought was oriented toward the person leaving situational aspects aside while the other concentrated on ecological or situational determinants and thus neglected the aspects of development and internal processes The integration of both these directions seemed to be an unusually promising approach for any project that aimed to understand changes in the individual within a rapidly changing urban setting The best way to come closer to a resolution of that dilemma seemed to be an intensive exchange between the American and European scientific communities on this issue Strategies for Employee Assistance Programs William J. Mednick,2012-12-06 Katherine Teilmann Van Dusen and Sarnoff A Mednick This introduction delineates what we consider to be three of the most important impediments to the advance of knowledge in the field of criminology The most fundamental need is for more studies of the nature and progress of criminal and delinquent careers The second need is for more prospective longitudinal studies of the etiology of crime and delinquency The third need concerns the lack of interdisciplinary research toward a more integrated understanding of delinquent and criminal behavior Criminal and Delinquent Careers The birth cohort study by Wolfgang Figlio and Sellin 1972 was heralded by many Farrington 1973 Erickson 1973 Weis 1974 as a landmark which allowed researchers to study the course of delinquency without the usual sampling biases that plagued other cross sectional research For the first time we could get a reasonable picture of when delinquency usually starts what proportion of the population engages in delinquency what types

of delinquencies they engage in what proportion continue and so on Cross sectional studies do not permit the investigation of careers because cross 1 PROSPECTIVE STUDIES OF CRIME AND DELINQUENCY 2 sectional sampling includes only portions of careers for many of the individuals sampled This is just one of the many problems that restricted researchers ability to study the nature of criminal careers
