Drug Therapy and the Elderly Alvin K. Swonger, Patricia M. Burbank, 1995

Comprehensive Perioperative Nursing Barbara J. Gruendemann, 1995

Communication in Emergency Medicine Maria E. Moreira, Andrew J. French, 2019

Communication in Emergency Medicine highlights key challenges to effective communication in Emergency Medicine that may be experienced by healthcare providers students nurses and even hospital administrators The text addresses these pitfalls by demonstrating how a mix of foundational communication techniques and leadership skills can be used to successfully overcome barriers in information exchange highlighted by real life clinical scenarios with an emphasis on avoidable pitfalls This text is an ideal resource for Emergency Medicine providers with lessons which can also be applied in many other settings as well

Evidence-Based Emergency Medicine Brian Rowe, Eddy S. Lang, Michael D. Brown, Debra

Houry, David H. Newman, Peter C. Wyer, 2011-08-24 Emergency physicians assess and manage a wide variety of problems from patients presenting with a diversity of severities ranging from mild to severe and life threatening. They are expected to maintain their competency and expertise in areas where there is rapid knowledge change. Evidence based Emergency Medicine is the first book of its kind in emergency medicine to tackle the problems practicing physicians encounter in the emergency setting using an evidence based approach. It summarizes the published evidence available for the diagnosis and treatment of common emergency health care problems in adults. Each chapter contextualizes a topic area using a clinical vignette and generates a series of key clinically important diagnostic and treatment questions. By completing detailed reviews of diagnostic and treatment research using evidence from systematic reviews, RCTs and prospective observational studies, the authors provide conclusions and practical recommendations. Focusing primarily on diagnosis in areas where evidence for treatment is well accepted (e.g. DVTs) and treatment in other diseases where diagnosis is not complex (e.g. asthma), this text is written by leading emergency physicians at the forefront of evidence based medicine. Evidence based Emergency Medicine is ideal for emergency physicians and trainees, emergency department staff and family physicians specialising in the acute care of medical and injured patients.

A Clinical Approach to Medicine Yong Yau Ong, 2005 In this new edition of *A Clinical Approach to Medicine* the editor has assembled a panel of leading clinicians and researchers and reorganized the material in the key areas of medicine: cardiology, endocrinology, gastroenterology, hematology, neurology, oncology, rheumatology, renal medicine and respiratory medicine. This book is unique; it reflects the experience of leading experts on patterns of disease in the Asia Pacific region. There are several other similar books, but those are by authors from the West and therefore offer a different perspective. The book also includes discussions on genetic diseases, infection and antimicrobial resistance to antibiotics, highlighting local incidences and statistics. Each chapter starts with the basic concepts of a particular topic and gradually develops the theme to present the state of the art in the topic. With its focus on practices unique to Asia Pacific, this book is a must for the student, practicing clinician and research scientist interested in the latest developments in this part of the world.

Textbook of Adult Emergency Medicine E-Book Peter Cameron, George Jelinek, Anne-Maree Kelly, Lindsay Murray, Anthony F. T. Brown, 2011-11-18 A major postgraduate textbook in emergency medicine covering all the major topics that present to the trainee doctor in the emergency department. A comprehensive textbook of adult emergency medicine for trainee doctors covers all the problems likely to present to a trainee in the emergency department. Chapters are short and concise with key point boxes called Essentials at the beginning. Also has boxes featuring controversial areas of treatment. Practical and clinically orientated. Major changes to resuscitation guidelines. Complete rewriting of ENT section. Significant updating of following topics: acute coronary syndrome management, trauma, sepsis management, imaging, arrhythmias. Expansion of administration section, especially patient safety. Changes to drug overdose sections in toxicology section.
