The Political Economy of Narcotics Julia Buxton, 2013-07-04 This book explores the origins history and organisation of the international system of narcotic drug control with a specific focus on heroin cannabis and cocaine It argues that the century long quest to eliminate the production trade in and use of narcotic drugs has been a profound failure The statistics produced by the international and domestic narcotic drug control agencies point to a sustained expansion of the drug trade despite the imposition of harsh criminal sanctions against those engaged as producers traffickers or consumers in the narcotic drugs market The roots of this major international policy failure are traced back to the outdated ideology of prohibition which is shown to be counterproductive utopian and a fundamentally inadequate basis for narcotic drug policy in the twenty first century Prohibition championed by many US policy makers has left the international community poorly positioned to confront those changes to the drug trade and drug markets that have resulted from globalisation Moreover prohibition based approaches are causing more harm than good as is demonstrated through reference to issues such as HIV AIDS the environment conflict development and social justice As the drug control system approaches its centenary there are signs that the global consensus on narcotic drug prohibition is fracturing Some European and South American states are pushing for a new approach based on regulation decriminalisation and harm reduction But those seeking to revise prohibition strategies faces entrenched resistance primarily by the U S This important text argues that successive American governments have pursued a contradictory approach acting decisively against the narcotic drug trade at home and abroad while at the same time working with drug traffickers and producer states when it is in America's strategic interest As a result US policy approaches emerge as a decisive factor in accounting for the failure of prohibition

Laundering Jyoti Trehan, 2004 Written by an experienced and serving police officer the book is based on two years of academic and field research as a Jawaharlal Nehru Memorial Fellow Trehan starts from the premise that the nature of crime today is transnational and has become more so with the unprecedented development of information technology The book examines various criminal activities that are used to make huge sums of money and then goes on to examine the methods of money laundering which are used to destroy or hide its illegal sources The author also analyses how illegally earned money is used after laundering for legitimate businesses and how money laundering affects national security and even the process of economic liberalization The book includes a discussion of legislative and other responses aimed at countering the dangers of crime and money laundering □□□□□□ □□□, □□□, □□□, □□□, □□□, □□□, □□□, □□□, □□□, □□□, □□□, □□□, □□□, □□□, □□□, □□□, 2020-01-01 Interpol

Black Women and The Criminal Justice System Biko Agozino,2018-12-14 First published in 1997 this book identifies the problems that face black women in the criminal justice system as the result of the articulation of unequal and oppressive class race and gender relations the research aims to be aware of all three rather than prioritising isolating or reducing one or two of these relations The focus of this research primarily on black women is based on the belief that they are marginalised in both society and criminological research Black women are poorly represented in education employment the professions commerce industry and politics while in prison their presence is highly disproportionate to their wider numbers in society The author examines the problems facing black women and compares these with those facing black men and white women to demonstrate the articulation of social relations He addresses the structural positions of black women in society their social relations and the nature of the institutional practices of the criminal justice system

How to Legalize Drugs Jefferson M. Fish,1998-05 No wonder the war on drugs is being lost the warriors arrows are all pointed in the wrong directions The black market driven effects of prohibition which include crime and its spiraling scourges as well as death and disease are overall counterproductive Ironically the severe penalties intended to halt serious abuse intimidate the occasional user but not the real target whose desperate search for consolation in drugs is more result than cause of the misery of marginalization The rationale for reform most commonly rooted in a cost benefit comparison public harm versus public health or in the libertarian argument

Understanding Society, Culture, and Television Paul Monaco,2000-09-30 What is the real nature of television and what is its place in contemporary society and culture In a provocative rethinking of the medium and its ensuing effects this book argues that we have misunderstood television and have thus contributed to a distorted view of art and culture in the 20th century During the final quarter of this century both in academic and popular circles we have spread wildly exaggerated claims about television s undermining of human consciousness and behavior Television has become a scapegoat for all sorts of societal and cultural ills The arguments presented by many researchers on behalf of the ill effects of TV are fundamentally weak and flawed On the eve of the 21st century the claimed distinctions between high art and popular culture have become a final hopeless repository of pedantry Television can be understood only by viewing it as an art form and measuring its role in society and culture in concert with the first principles of human reason and liberty **Current Publications in Legal and Related Fields** ,1995 *International Relations* ,1994 *Legalization of Illicit Drugs* United States.
