Shaw,2015-06-15 Excerpt from The Science of Dry Fly Fishing and Salmon Fly Fishing It had been my intention to issue the second edition of this book in its original form and to write a new work entitled The Science of Salmon Fishing but finding that the Science of Dry Fly Fishing could with great advantage be revised and that this revision would make it practically a new work I determined on the advice of a literary friend to rewrite the whole of the trout fishing section and to add to it the subject matter which I had proposed to form into a new book This consists in the first place in the life history of the salmon from the time it is deposited as ova by the parent fish in the redd until it attains its fullgrown state I have ventured when dealing with this interesting matter to introduce some original theories as regards those questions which are still a subject of controversy In the second place I have dealt with the different methods of casting and by plates and diagrams have endeavoured to show the various casts for presenting the lure to the salmon and explained the methods to be adopted when actually fishing About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *Advanced Fly Fishing* Eugene Burns,1953
