## Dual Diagnosis:

Dual Diagnosis Peter Phillips, Olive McKeown, Tom Sandford, 2009-08-13 *Dual Diagnosis Practice in Context* is a practical evidence based guide for practitioners working in multi disciplinary mental health and substance misuse service settings. Divided into three sections this comprehensive and international text first explores the contemporary contextual issues surrounding the subject area. It then goes on to review dual diagnosis in some of the special populations including people diagnosed with personality disorders, women, young people and older adults and contemporary issues e.g. crystal methamphetamine and mental health. Part three reviews the development of international service responses to dual diagnosis and discusses the development and commissioning of service models, research and practice development. The text concludes with a chapter outlining priorities for the development of interventions, service approaches, research and education.

**KEY FEATURES** A authoritative in depth review of both theoretical, clinical and policy issues within a single text. Draws together a range of established contributors from a variety of disciplines including mental health nurses, occupational therapists, social workers and psychiatrists. International in focus with contributors from the UK, USA, Europe and Australia.

**Dual Diagnosis** Joel Solomon, Sheldon Zimberg, Edward Shollar, 2013-06-29 Patients who have both a psychiatric disorder and a substance abuse problem cause most clinicians to throw up their hands in despair The clinical problems that these dual diagnosis patients present are enormously complex Diagnostically how is one to tell if disorders of mood and thinking for instance are signs of a mental illness or consequences of substance abuse How is one to obtain important historic information when the patient may be unable or unwilling to provide it and there are no readily available collateral sources of information In any case why bother Treatments for dually diagnosed patients are ineffective patients won't stay in treatment recidivism occurs at a very high rate To make matters even more difficult traditional health care reimbursement mechanisms do not provide for the multimodality clinical programs and special services needed by the patient who is both mentally ill and a substance abuser So the clinician needs an effective bureaucratic strategy as well as a treatment strategy For the most part clinicians have handled the problem by ignoring it
