Jennings, Guiseppe Zucchelli, Francesco Ghetti, Giuliano Colombetti, 2012-12-06 A NATO Advanced Study Institute on Light as Energy Source and Information Carrier in Plant Photo physiology was held at Volterra Italy from September 26 to October 6 1994 in order to consider the fundamental role that light plays in plant growth and development This book summarises the main lectures given at this meeting which concentrated on both photochemical energy conversion and signalling photosensing aspects Light harvesting and conversion into chemical energy in photosynthesis occurs at the level of chlorophyll carotenoid containing photosystems in plants Pigments are non covalently bound to a variety of polypeptides which serve as a specific scaffolding necessary to determine the energy coupling between pigments and thus allowing rapid excitation energy transfer from the antenna to the special reaction centre chlorophylls Data from transient time resolved spectroscopies in the femtosecond and picosecond domain together with model calculations suggest that this process occurs in the 20-100 picosecond time span The special structure of reaction centre complexes ensures rapid primary charge separation probably in the order of 1-3 picoseconds with subsequent charge stabilisation reactions proceeding in the hundreds of picoseconds range The recently resolved crystallographic structure of LHCII the principal antenna complex of plants allows precise determination of pigment-pigment distances and thus permits calculation of approximate chlorophyll-chlorophyll Förster hopping rates which are in good agreement with time resolved measurements **Dark as Day** Charles Sheffield, 2002-03-06 Set in the universe as Sheffield's previous novel *Cold As Ice* *Dark As Day* is a hard science fiction novel set 30 years after the Great War and interplanetary war that nearly destroyed the entire human race and left horrifyingly dangerous weapons caches to threaten human survival The Solar System is finally recovering from the Great War a war that devastated the planets and nearly wiped out the human race and the population of the outer moons orbiting Jupiter and Saturn is growing On one of those moons Alex Ligon scion of a great interplanetary trading family has developed a wonderfully accurate new population model and cannot wait until the newly reconstituted *Seine* the interlinked network of computers that spans the planets and moons and asteroids comes back on line But when it does and he extends his perfect model a century into the future it predicts the complete destruction of the human race On another moon the Search for Extraterrestrial Intelligence goes on undaunted by generations of failure And to

her amazement Millie Wu a young genius newly recruited to the project has found a signal a signal that is coming from outside the solar system And in his new retreat on a minor moon of Saturn the cranky genius Rustam Battacharya is still collecting weapons from the Great War He thinks he may have stumbled on an unexpected new one but he ll need to disarm it before it destroys the Sun Sheffield leads us through the book with his usual wit impeccable science and command of the language It is hard to think of anybody who is writing hard sf these days substantially better than he is Booklist At the Publisher s request this title is being sold without Digital Rights Management Software DRM applied
