Thinking in Circles About Obesity Tarek K. A. Hamid, 2009-09-22 Today's children may well become the first generation of Americans whose life expectancy will be shorter than that of their parents The culprit public health experts agree is obesity and its associated health problems Heretofore the strategy to slow obesity's galloping pace has been driven by what the philosopher Karl Popper calls the bucket theory of the mind When minds are seen as containers and public understanding is viewed as being a function of how many scientific facts are known the focus is naturally on how many scientific facts public minds contain But the strategy has not worked Despite all the diet books the wide availability of reduced calorie and reduced fat foods and the broad publicity about the obesity problem America's waistline continues to expand It will take more than food pyramid images or a new nutritional guideline to stem obesity's escalation Albert Einstein once observed that the significant problems we face cannot be solved at the same level of thinking we were at when we created them and that we would have to shift to a new level a deeper level of thinking to solve them This book argues for and presents a different perspective for thinking about and addressing the obesity problem a systems thinking perspective While already commonplace in engineering and in business the use of systems thinking in personal health is less widely adopted Yet this is precisely the setting where complexities are most problematic and where the stakes are highest

Handbook of Leadership Theory and Practice Nitin Nohria, Rakesh Khurana, 2010-01-26 Scores of books and articles have been written in the popular press and mainstream marketplace about leadership who leaders are what they do and why they matter Yet in academia there is a dearth of rigorous research journal articles or doctoral programs focused on leadership as a discipline Why do top business schools espouse mission statements that promise to educate the leaders of the future yet fail to give leadership its intellectual due

The Handbook of Leadership Theory and Practice seeks to bridge this disconnect Based on the Harvard Business School Centennial Colloquium Leadership Advancing an Intellectual Discipline and edited by HBS professors Nitin Nohria and Rakesh Khurana this volume brings together the most important scholars from fields as diverse as psychology sociology economics and history to take stock of what we know about leadership and to set an agenda for future research More than a means of getting ahead and gaining power leadership must be understood as a serious professional and personal responsibility Featuring the thinking of today s most renowned scholars the Handbook of Leadership Theory and Practice will be a catalyst for elevating leadership to a higher intellectual plane and help shape the research agenda for the next generation of leadership scholars
