Establishing a Methodology to Evaluate Teen Driver-training Programs Tammy E. Trimble, Stephanie Baker, William A. Schaudt, Taryn Schrader, 2013 The goal of this research project was to develop a methodology to assist the Wisconsin Department of Transportation WisDOT in the evaluation of effectiveness of teen driver education programs over the short and long terms The research effort was divided into two phases Phase I focused on the development of an evaluative methodology that was based upon a review of the relevant literature and Wisconsin specific policies and available data sources This review culminated in a program assessment tool focused on four contributing areas of teen driver training and education 1 Guardian Involvement 2 Driver Education and Training Curricula Requirements 3 GDL Coordination and 4 Instructor Qualifications The proposed methodology was presented to the Project Oversight Committee and was validated through two rounds of pilot testing using materials provided by programs and schools under the oversight of both WisDOT and the Wisconsin Department of Public Instruction The resulting methodology informed the Phase II implementation plan recommendations Work products included within this report are an annotated bibliography a knowledge base documenting best practices and Wisconsin specific data sources a methodology that may be used to analyze and evaluate the effectiveness of driver training programs as they relate to the demonstrated safety and behavior of teen drivers in Wisconsin and a three phase implementation plan Technical report documentation page

Driver Training for Automated Vehicles Siobhán E. Merriman, Katherine L. Plant, Kirsten M. A. Revell, Neville A. Stanton, 2024-04-30 Since the introduction of Automated Vehicles AVs on roads there have been a number of high profile collisions which have highlighted significant driver challenges These include challenges associated with drivers trust in the automation their knowledge and awareness of the AV s capabilities and limitations and their reduced situation awareness of the road environment and the vehicle Solutions are needed to overcome these challenges so that the expected benefits of AVs can be realised Driver Training for Automated Vehicles A Systems Approach identifies the training requirements for drivers of AVs and takes a systematic approach to design develop implement and evaluate a comprehensive training package to address these requirements This book explores how training can overcome the driver challenges associated with AVs by improving drivers mental models trust in automation decisions and behaviour when activating a Level 4 AV It presents a systematic approach to the training lifecycle by first presenting the current state of research into AVs identifying the challenges and training requirements for drivers of AVs and

then developing and evaluating a training programme to achieve these requirements This fascinating title highlights the need for drivers to undergo training for AVs and takes us a step closer to this need It walks readers through a systematic four step process and provides practical guidance to develop and evaluate an effective training programme The reader will develop a thorough understanding of the current driver challenges with AVs and the methods and systems to mitigate them through current knowledge and research This book is an ideal read for practitioners designers and academics with a professional or research interest in AVs Its appeal extends to those in the fields of automotive design Systems Engineering Human Factors and education and training
