Drug Therapy And The Elderly:

Drug Therapy for the Elderly Martin Wehling, 2012-08-17 With people aged 65 years and older currently making up the fastest growing age group throughout the world the demographic revolution of an aging society will inevitably lead to increased pressure to develop a rationalistic and age tailored process of diagnosis and treatment among the elderly As aging people often suffer from several chronic diseases and are being treated with multiple medications concurrently unwanted drug interactions occur more frequently Whereas recent approaches have recommended to remove particular drugs from the medication regimen to avoid adverse effects *Drug Therapy for the Elderly* underlines both indispensable and dispensable elements of drug treatment in order to provide an overall assessment of drugs suitable for the aged In view of the multimorbidity and polypharmacy situations experienced by elderly patients this book takes into account the special needs and requirements shown by this group thus serving as a timely reference for physicians who treat the elderly

Symposium on Evaluation of Drug Therapy in the Elderly 1974 **Drug Therapy in Nursing** Diane S. Aschenbrenner, Samantha J. Venable, 2009 This text presents a totally nursing focused framework for teaching and learning nursing pharmacology and places the patient at the center of all drug administration decisions and considerations The book presents core drug knowledge using prototypes of different drug classes and emphasizes core patient variables that influence the patient's response to therapy This thoroughly updated Third Edition covers newly approved drugs has separate chapters on drugs affecting fungal and viral infections and includes more pathophysiology information FDA Black Box warnings have been added to the discussion of each prototype when applicable and safety alerts have been added to emphasize prevention of common medication errors A companion Website offers student and instructor ancillaries including NCLEX style questions pathophysiology animations medication administration videos and dosage calculation quizzes **Cardiovascular Drug Therapy in the Elderly** Adam Schneeweiss, Gotthard Schettler, 2014-01-15 Geriatric Pharmacotherapy Cynthia G. Olsen, William N. Tindall, Mark E. Clasen, 2007 Geriatric Pharmacotherapy A Guide for the Helping Professional provides practical guidelines to help physicians pharmacists nurses physician assistants and other clinicians manage drug therapy in the elderly the text hinges on the realization that geriatric care is an individualized art and all members of the health care team have drug therapy responsibilities *Drug Therapy and the Elderly* Alvin K. Swonger, Patricia M. Burbank, 1995 Aging and Drug Therapy G. Barbagallo-Sangiorgi, A.N. Exton-Smith, 2012-12-06 One of the greatest advances in Geriatric Medicine during the last quarter of a century has been the increased realization of the possibilities of treatment for elderly patients Neglect has been replaced by a more optimistic therapeutic endeavour and countless old people have benefitted from this approach But there is also a drawback and this is the risk of hazardous side effects of medication which are often directly proportional to the biological potency of the drug and may be unpredictably increased due to changes in the senile organism In fact the anatomical and biological changes in old

age alter both the kinetics of most drugs and the receptor response On account of these changes the individual tolerance of aged patients to drug therapy may be quite different from that of younger subjects Thus for a variety of reasons elderly patients receive more drugs but they are at a higher risk of encountering adverse reactions which often show atypical clinical features We can therefore speak of geriatric iatrogenic disorders and point out that some of these side effects are determined by a complex pathogenesis due to the particular pathophysiological condition in the elderly It is important to encourage the habit of individually evaluating potential risk versus expected advantages of drugs in keeping with the same principles adopted in the evaluation of cost benefit ratio *Drugs and the Elderly* Helene L. Lipton, Philip Randolph Lee, Mark S. Freeland, 1988 A Stanford University Press classic

Drug Therapy for the Elderly Kenneth A. Conrad, Rubin Bressler, 1982 **Drugs and the Elderly** Charlotte Kenton, 1985 *Aging and Drug Therapy* G. Barbagallo-Sangiorgi, A.N.
