Drug And Alcohol Use Issues And Factors:

Drug and Alcohol Use Stanley Einstein, 2013-06-29 This book is the outcome of the First International Congress on Drugs and Alcohol to be held in Israel Both the conference and this volume grew out of the need to overcome the specious man made barriers which continue to separate intervention plans and efforts in the broad field of substance use and misuse This need demands that all of us become aware not only of the differences which may separate our concerns but also of the similarities in our goals and endeavors We are obligated to draw together toward a common effort for the common good The conference was designed to facilitate the exploration of generic issues This volume is designed to document a variety of factors which are basic to the defining selection planning implementation and evaluation of substance use and misuse intervention This book is not a traditional proceedings volume Because the needs of a listening audience are quite different from those of the solitary reader and the roles of a workshop or plenary session participant are also dissimilar from those of the reader not all of the Congress presentations are included and the articles that are included have undergone major revisions Current intervention needs and options demand a broad spectrum of clearly defined roles for all who are or should be involved Hence these issues among others served as guidelines in the preparation of the revised articles Maternal Substance and Alcohol use and Contextual Issues Yukiko Washio, Petal Petersen Williams, Krystyna Isaacs, 2024-07-31 There is a greater need for an understanding surrounding substance and alcohol abuse among people who are pregnant and breastfeeding People with substance and alcohol use and misuse issues face unique challenges during pregnancy and lactation intimately intertwined with other problems contextual including gender based violence mental health sexual health and maternal and infant health Telemedicine has become the new norm since the pandemic in 2020 which nudges treatment intervention research to incorporate the use of mobile computer based and telecommunication technology **Rural Substance Abuse: State of Knowledge and Issues** Elizabeth B. Robertson, 1997 **Factors Associated with Alcohol Use in University Students** René Šebeňa, 2022 Research into alcohol use by young people is mostly focused on adolescents secondary or further education students rather than university students However alcohol drinking among university students is a widely recognized problem and represents a serious health and cultural problem with many negative individual interpersonal and cultural consequences Binge drinking an increasingly common pattern of excessive alcohol use with serious negative consequences for individual drinkers those around them and the university environment is a major problem on university campuses Alcohol consumption among youths is affected by a complex of risk and protective factors investigation of which is essential for a better understanding and focusing of the intervention procedures The complex linkages of risk and protective factors and problem behaviours change over time and within different cultures and countries The importance of this kind of research for the field of prevention is obvious If we can determine the personal and interpersonal protective and risk factors affecting alcohol use behaviour we can better plan preventive interventions focused

on creating and enhancing the personal protective attributes To design and develop appropriate interventions to improve behavioural outcomes for adolescents a better understanding of these complexities and relations is required *Adolescent Substance Use Disorders, An Issue of Child and Adolescent Psychiatric Clinics of North America* Yifrah Kaminer,2010-06-29 This comprehensive issue on Substance Abuse in youth begins with articles on epidemiological trends genetic risk factors neurobiology of substance use disorders and race and gender associations and then provides detailed reviews on prevention and various treatment methodologies Treatments discussed include individual and group interventions motivational interviewing and cognitive behavioral therapy contingency reinforcement multidimensional family therapy pharmacotherapy and post treatment aftercare Also reviewed in detail are substance use disorders and psychiatric comorbidity The issue then takes a close look at two emerging areas of concern in youth gambling and internet occupation and energy drink use By all accounts a must read issue for psychiatrists everywhere The Problem-drinking Drug Addict National Institute on Drug Abuse,1978 **Managing Your Drug Or Alcohol Problem** Dennis C. Understanding Drugs, Alcohol And Crime Bennett, Trevor, Holloway, Katy, 2005-04-01 Bennett and Holloway's Understanding Drugs Alcohol and Crime is the best most up to date and comprehensive examination for the United Kingdom of interactions among drugs alcohol and crime The authors exhaustively and authoritatively survey current knowledge in the UK and from many other countries on drug and alcohol use as cause and consequence of crime and the effects of law enforcement and treatment responses Clearly written unfailingly lucid and admirably accurate this book will be the indispensable work on British drug policy for many years to come Professor Michael Tonry University of Minnesota Law School USA What makes this book particularly interesting is the refreshingly non judgmental presentation which conveys the essence of very important issues in contemporary society Therefore this is an ideal text not only for students but also for policy makers drugs and alcohol counsellors treatment agencies and everyone interested in doing research on drugs alcohol and crime Nicoletta Policek University of Abertay Dundee The publication is not only an excellent summary of the existing research in Great Britain and to a lesser extent from other jurisdictions it is a foundation for future research by evoking and at times provoking questions and offering a variety of possible responses Hirsch Greenberg University of Regina What is the connection between drugs alcohol and crime What works in reducing drugs and alcohol related crime The book provides a succinct overview of current theory and research on the links between drugs alcohol use and crime It discusses the legal and social context of drug and alcohol use and identifies current levels of consumption Focusing on the UK context it also takes into account international research where appropriate Detailed review of the research literature on the connections between drug use and crime Examines the current government anti drugs policy and assesses the effectiveness of programmes that have been used to reduce drug and alcohol related crime The book concludes that future government drugs policy should pay particular attention to the lessons learned from research on the connection between drug and alcohol use and crime Ideal for criminology criminal justice social policy and social work students this book will also be a useful source of information for policy makers the police probation workers social workers drugs and alcohol counsellors treatment agencies sentencers voluntary agencies Drug Action Teams and others with an interest in research on drugs and crime

Handbook of Drug Abuse Prevention Zili Sloboda, William J. Bukoski, 2007-08-06

There are a number of reasons why this book is important First there is no one source that summarizes what we know about the prevention of substance abuse from the research field so the book serves as a repository of accumulated knowledge on prevention theory intervention design and development and prevention research methodology Second as an evolving field prevention science has only begun to assert itself in both the arenas of practice and policy The formation of the Society for Prevention Research in 1991 was the first recognition that a science of prevention existed and required a separate forum to present the rapidly growing content of the field for discussion and review Finally there is a

need to establish a baseline a reference point against which progress in the field of prevention science can be assessed This book serves all of these purposes The idea for this book grew from the observation in the early 1990s that after decades of attempts to develop effective interventions to prevent drug use among children and adolescents in the United States that we were finally having success particularly in addressing the initiation of use These successes are the result of research that has provided a better understanding of the factors and processes associated with the onset of substance use Ethnocultural Factors in Substance Abuse Treatment Shulamith Lala Ashenberg Straussner, 2002-12-13 This volume presents a culturally informed framework for understanding and treating substance abuse problems From expert contributors chapters cover specific ethnocultural groups in the United States including Americans of African Native American Latino European Middle Eastern and Asian descent While emphasizing the need to see each client as a unique individual the book examines how ethnocultural factors may affect a person's attitudes toward alcohol and other drugs patterns of substance use reasons for seeking treatment and responsiveness to various interventions Themes addressed include the impact of migration and acculturation issues spiritual values and traditions family structures gender roles and experiences of prejudice and discrimination Featuring a wealth of illustrative clinical material the volume makes concrete recommendations for more competent effective assessment and intervention It also guides clinicians toward greater awareness of the ways their own ethnocultural backgrounds may affect their interactions with clients **Substance Use Disorders: Part II, An Issue of Child and Adolescent Psychiatric Clinics of North America** Ray Chih-Jui Hsiao, Paula Riggs, 2016-09-13 This issue of the Child and Adolescent Psychiatric Clinics will be Part II of II on Substance Use Disorders Part II will be edited by Drs Ray Hsiao and Paula Riggs This portion will focus more on treatments recovery and support considerations for adolescents with substance abuse issues Topics covered include but are not limited to screening brief intervention referral treatment in primary care family based interventions motivational enhancement therapy school based interventions contingency management pharmacotherapy treatment for children with co morbid psychiatric issues special populations and integration of system of care *The Development of Alcohol Problems* Robert A.
