Drug Studies In The Elderly Methodological Concerns:

Drug Studies in the Elderly N.R. Cutler,P.K. Narang,2013-11-11 Clinical trials are the most definitive tool for evaluation of the applicability of clinical investigations The main objective of clinical investigations is to assess the potential value of a therapeutic entity in the treatment or prophylaxis of a disease or a condition It is also deemed necessary at this stage to obtain information regarding the undesirable side effects associated risks and their interrelationship with clinical assessments Most of these clinical investigations conform in some form or fashion to the guidelines adopted by the Food and Drug Administration FDA for a given class of compounds Clinical investigations in the past have not included specific studies in special or subpopulations e g the elderly Because of an ever increasing elderly population newer policies for clinical investigations are now being debated with the recognition of enhanced drug sensitivity in this special population This key research activity can lead not only to improved health care in the elderly but also to control of its costs **Current**

Bibliographies in Medicine ,1988 Aging Research - Methodological Issues Carmen García-Peña,Luis Miguel Gutiérrez-Robledo,Mario Ulises Pérez-Zepeda,2018-09-25 This is the second edition of a well received book that reviews classical epidemiological and clinical research designs with a specific focus on aging Chapters cover basic topics like the scientific method ethics and the consequences of certain exclusion criteria The work also includes a look at clinical concepts like multimorbidity frailty and functionality New material includes chapters such as geroscience health systems research big data and data mining financing and future of aging research The authors reveal the issues and challenges for researchers of age and aging and also consider from basic to clinical and from clinical to public policies of social and health care The focus on aging is what gives this book its valuable perspective on research methodology All authors have considerable experience in aging geriatrics or gerontology and each chapter includes both a theoretical framework and practical examples of studies in aging Readers will discover study designs that are reviewed for basic structure main flaws and advantages and are analyzed for specific conditions and variables regarding aging This text is suited to both health care professionals caring for older adults and researchers who are new to research in aging It is relevant across the disciplines including medicine psychology social sciences and dentistry and it supports learning with graphs and figures Handbook of Clinical Trials P. Brouwers,E. Mohr,1991-01-01 Behavior is an aspect of clinical trials that has been somewhat neglected and the problems associated with behavioral assessment and control in clinical trials are complex These contributions deal with the selection and application of assessment techniques in different patient populations the scr Issues in Mental Health and Aging Center for Studies of the Mental Health of the Aging (U.S.),1979 **Clinical Pharmacology in the Elderly** Hans-Peter Breuel,2012-12-06 The appropriate and rational use of drugs by the elderly is a matter of growing medical and social concern Persons aged 65 years and older constitute about 12% 15% of the population in the Western world and the total number of the elderly will increase significantly in the coming years This population accounts for 30% of all the prescription drugs used

Aging specifically the transition from middle to old age is a complex process From the perspective of clinical pharmacology these pathophysiological changes may reasonably be expected to alter responsiveness to drugs The age related differences in response to drugs can arise from alterations in pharmacokinetics or pharmacodynamics This makes it mandatory that clinical pharmacological studies be carried out in the elderly during extended phase I studies The older the population likely to use the drug the more important it is to include the very old It is also important not to exclude necessarily patients with concomitant illnesses it is only by observing such patients that drug disease interactions can be detected Reports from surveillance systems have greatly increased our awareness of problems associated with drug therapy in old age
