Dual Diagnosis Peter Phillips, Olive McKeown, Tom Sandford, 2009-08-13 Dual Diagnosis Practice in Context is a practical, evidence-based guide for practitioners working in multi-disciplinary mental health and substance misuse service settings. Divided into three sections, this comprehensive and international text first explores the contemporary contextual issues surrounding the subject area. It then goes on to review dual diagnosis in some of the special populations, including people diagnosed with personality disorders, women, young people, and older adults, and contemporary issues, e.g. crystal methamphetamine and mental health. Part three reviews the development of international service responses to dual diagnosis and discusses the development and commissioning of service models, research, and practice development. The text concludes with a chapter outlining priorities for the development of interventions, service approaches, research, and education.
