Brown, 1932 **Science and Civilisation in China: Volume 3, Mathematics and the Sciences of the Heavens and the Earth** Joseph Needham, 1959 After two volumes mainly introductory Dr Needham now embarks upon his systematic study of the development of the natural sciences in China The Sciences of the Earth follow geography and cartography geology seismology and mineralogy Dr Needham distinguishes parallel traditions of scientific cartography and religious cosmography in East and West discussing orbocentric wheel maps the origins of the rectangular grid system sailing charts and relief maps Chinese survey methods and the impact of Renaissance cartography on the East Finally and here Dr Needham's work has no Western predecessors there are full accounts of the Chinese contribution to geology and mineralogy Uncharted Constellations John C. Barentine, 2016-04-04 This book compiles an array of interesting constellations that fell by the wayside before the IAU established the modern canon of constellations That decision left out lesser known ones whose history is nevertheless interesting but at last author John Barentine is giving them their due This book is a companion to *The Lost Constellations* highlighting the more obscure configurations The 16 constellations found in this volume fall into one or more of three broad categories asterisms such as the Big Dipper in Ursa Major single sourced constellations introduced on surviving charts by a cartographer perhaps currying the favor of sponsors and re brands new figures meant to displace existing constellations often for an ideological reason All of them reveal something unique about the development of humanity's map of the sky Journal of the British Astronomical Association British Astronomical Association, 1933 List of members 1890 1913 bound with v 1 23 **Guide to Reference Material** Albert John Walford, 1966 **A catalogue of modern works on science and technology. 2nd, 4th, 5th, 7th, 8th, 10th-14th, 16th-19th, 22nd-25th, 35th, 39th, ed** sir George Christopher T. Bartley, 1881 Myths of Europe Richard Littlejohns, Sara Soncini, 2007 *Myths of Europe* focuses on the identity of Europe seeking to reassess its cultural literary and political traditions in the context of the 21st century Over 20 authors historians political scientists literary scholars art and cultural historians from five countries here enter into a debate How far are the myths by which Europe has defined itself for centuries relevant to its role in global politics after 9 11 Can Old Europe maintain its traditional identity now that the European Union includes countries previously supposed to be on its periphery How has Europe handled relations with the non European Other in the past and how is it reacting now to an influx of immigrants and asylum seekers It becomes clear that founding myths such as Hamlet and St Nicholas have helped construct the European consciousness but also that these and other European myths have disturbing Eurocentric implications Are these myths still viable today and if so to what extent and for what purpose This volume sits on the interface between culture and politics and is important reading for all those interested in the transmission of myth and in both the past and the future of Europe **Publishers'**
