Translation Studies yet the issue of translating a novel's point of view has remained relatively unexplored. It seems crucial to ask how far a translator's choices affect the novel's point of view and whether characters or narrators come across similarly in originals and translations. This book addresses exactly these questions. It proposes a method by which it becomes possible to investigate how the point of view of a work of fiction is created in an original and adapted in translation. It shows that there are potential problems involved in the translation of linguistic features that constitute point of view and that this has an impact on the way works are translated.

Translation Technique in the Peshitta to Jeremiah Gillian

Greenberg, 2021-11-15 This book presents an analysis of translation technique defining and measuring areas of literalness and of freedom and discussing the evident acceptability of a non literal approach in both the original translation and later editorial work to relevant communities. Because the Book of Jeremiah is so long a quantitative analysis was valuable showing preservation of the sense of the Vorlage freedom in selection of lexical equivalents even for important words such as sin and in making numerous additions in pursuit of precision and a similar approach by later editors. Passages which are not represented in the translation despite their presence in the Hebrew Bible and sometimes also in the Septuagint are analysed showing their value in illumination both the development of the Hebrew Bible itself from a number of earlier texts and the precise wording of the text from which the Syriac translator worked. The strategies adopted to cope with the translation of particularly difficult Hebrew are analysed these include taking guidance from the Septuagint from other parts of the Hebrew Bible and guesswork. Apart from its value to Peshitta scholars and Syriac specialists the book is useful to biblical scholars and textual critics in general.

Charter Schools

Liane Brouillette, 2002-03-01 This book takes the reader inside the charter school movement answering such questions as: What is a charter school? How are charter schools different from other public schools? What does it take to create a charter school? What motivates the people who initiate such schools? What lessons can be learned from the experiences of those who have founded charter schools? What does the growth of the charter school movement mean for society at large? Using detailed case studies of seven schools in three states, this book explores the challenges faced by the

founders of these schools and develops guidelines for creating a successful school Seymour Sarason's work on the creation of settings is used as a basis for examining the complex human interactions that contributed to formation of a unique culture at each school as well as to establish guidelines for setting up a successful school Introductory and concluding chapters place the charter school movement within a broader social and historical context Tensions between the American tradition of local control of schools and the centralized tradition of schooling imported from Europe in the late 19th century are discussed The gradual bureaucratization of U S public schools during the 20th century is described along with problems that have been associated with the increasingly hierarchical and impersonal nature of educational institutions The Nautical Magazine and Naval Chronicle ,1837 **The Nautical Magazine** ,1837 Specifications and Drawings of Patents Issued from the United States Patent Office United States.
