Asymmetric Conflicts War Initiation By Weaker Powers:

Asymmetric Conflicts T. V. Paul, 1994-03-10 This book examines a question generally neglected in the study of international relations why does a militarily and economically less powerful state initiate conflict against a relatively strong state T V Paul analyses this phenomenon by focusing on the strategic and political considerations domestic and international which influence a weaker state to initiate war against a more powerful adversary The key argument of deterrence theory is that the military superiority of the status quo power coupled with a credible retaliatory threat will prevent attack by challengers The author challenges this assumption by examining six twentieth century asymmetric wars from the Japanese offensive against Russia in 1904 to the Argentine invasion of the Falkland Islands in 1982 The book's findings have wide implications for the study of war power deterrence coercive diplomacy strategy arms races and alliances

Asymmetric Conflicts T. V. Paul, 1994-03-10 This book asks why weaker powers so often engage in wars against stronger opponents It examines six cases where this occurred in this century including the Japanese attack on Pearl Harbor in 1941 and the Argentine invasion of the Falkland Islands in 1982 The key argument of deterrence theory is that the military superiority of a relatively strong power coupled with a credible retaliatory threat will prevent attack by challengers This book seriously challenges this assumption and has wide implications for the study of war deterrence diplomacy and strategy

The Tradition of Non-Use of Nuclear Weapons T.V. Paul, 2009-01-23 An exploration of the rise persistence and impact of the tradition of non use of nuclear weapons followed by nuclear powers for well over sixty years

Great Powers, Small Wars Larisa Deriglazova, 2020-03-03 A sophisticated appraisal of the problem of asymmetric conflict in the post World War II period In a sophisticated combination of quantitative research and two in depth case studies Larisa Deriglazova surveys armed conflicts post World War II in which one power is much stronger than the other She then focuses on the experiences of British decolonization after World War II and the United States in the 2003 Iraq war Great Powers Small Wars employs several large databases to identify basic characteristics and variables of wars between enemies of disproportionate power Case studies examine the economics domestic politics and international factors that ultimately shaped military events more than military capacity and strategy

Asymmetry and International Relationships Brantly Womack, 2016 America's longest wars have been small wars This book explains how power differences shape but don't determine international relationships

The Art and Science of Military Deception Hy Rothstein, Barton Whaley, 2013-09-01 It is said that deception among people in a civilized society is something to be loathed even though it seems to be part of human nature but deception in war is a virtue Properly designed and executed stratagems reduce the horrific costs of war This book is a comprehensive collection of classic articles on deception hand picked and expertly introduced by well known experts on military deception The purpose of this book is to set in motion a renaissance for using deception as an instrument of statecraft The various sections are designed to cumulatively provide sufficient breadth and depth on the subject to satisfy both the novice as well as the expert

Packed with expert commentary interesting background information and original readings this book provides the reader with sufficient knowledge to pursue General Eisenhower's vision for the proper role of deception in support of the national interest

Iran and Nuclear Weapons Saira Khan, 2009-09-25 This book investigates what is driving Iran's nuclear weapons programme in a less hostile regional environment using a theory of protracted conflicts to explicate proliferation. Iran's nuclear weapons program has alarmed the international community since the 1990s but has come to the forefront of international security concerns since 2000. This book argues that Iran's hostility with the United States remains the major causal factor for its proliferation activities. With the US administration pursuing aggressive foreign policies towards Iran since 2000 the latter's security threat intensified. A society that is split on many important domestic issues remained united on the issue of nuclear weapons acquisition after the US war in Iraq. Consequently Iran became determined in its drive to acquire nuclear weapons and boldly announced its decision to enrich uranium leaving the US in no doubt about its nuclear status. This book underscores the importance of protracted conflicts in proliferation decisions and underpinning this is the assumption that non proliferation may be achieved through the termination of intractable conflicts. The aims of this work are to demonstrate that a state's decision to acquire nuclear weapons depends largely on its engagement in protracted conflicts which shows not only that the presence of nuclear rivals intensifies the nuclear ambition but also that non nuclear status of rival states can promote non proliferation incentives in conflicting states inclined to proliferate. This study will be of great interest to students of Iran Middle Eastern politics nuclear proliferation and international relations theory. Saira Khan is a Research Associate in the McGill University of Montreal Joint Research Group in International Security. **REGIS**

A Study of Crisis Michael Brecher, Jonathan Wilkenfeld, 2022-06-07 As the twentieth century draws to a close it is time to look back on an epoch of widespread turmoil including two world wars the end of the colonial era in world history and a large number of international crises and conflicts. This book is designed to shed light on the causes and consequences of military security crises since the end of World War I in every region across diverse economic and political regimes and cultures. The primary aim of this volume is to uncover patterns of crises conflicts and wars and thereby to contribute to the advancement of international peace and world order. The culmination of more than twenty years of research by Michael Brecher and Jonathan Wilkenfeld the book analyzes crucial themes about crisis conflict and war and presents systematic knowledge about more than 400 crises thirty one protracted conflicts and almost 900 state participants. The authors explore many aspects of conflict including the ethnic dimension the effect of different kinds of political regimes notably the question whether democracies are more peaceful than authoritarian regimes and the role of violence in crisis management. They employ both case studies and aggregate data analysis in a Unified Model of Crisis to focus on two levels of analysis hostile interactions among states and the behavior of decision makers who must cope with the challenge posed by a threat to values time pressure and the increased likelihood that military hostilities will engulf them. This book will appeal to scholars in history political science

sociology and economics as well as policy makers interested in the causes and effects of crises in international relations The rich data sets will serve researchers for years to come as they probe additional aspects of crisis conflict and war in international relations Michael Brecher is R B Angus Professor of Political Science McGill University Jonathan Wilkenfeld is Professor and Chair of the Department of Government and Politics University of Maryland They are the coauthors of Crises in the Twentieth Century A Handbook of International Crisis among other books and articles

Negotiation and Conflict Management I. William Zartman, 2007-12-20 This book presents a series of essays by I William Zartman outlining the evolution of the key concepts required for the study of negotiation and conflict management such as formula ripeness pre negotiation mediation power process intractability escalation and order Responding to a lack of useful conceptualization for the analysis of international negotiation Zartman has developed an analytical framework and specific concepts that can serve as a basis for both study and practice Negotiation is analyzed as a process and is linked to other major themes in political science such as decision structure justice and order This analysis is then applied to negotiations to manage particular types of conflicts and cooperation including ethnic conflicts civil wars and regime building It also develops typologies and strategies of mediation dealing with such aspects as leverage bias interest and roles Written by the leading exponent of negotiation and mediation Negotiation and Conflict Management will be of great interest to all students of negotiation mediation and conflict studies in general

Weapons of Mass Migration Kelly M. Greenhill, 2011-06-23 At first glance the U S decision to escalate the war in Vietnam in the mid 1960s China s position on North Korea s nuclear program in the late 1990s and early 2000s and the EU resolution to lift what remained of the arms embargo against Libya in the mid 2000s would appear to share little in common Yet each of these seemingly unconnected and far reaching foreign policy decisions resulted at least in part from the exercise of a unique kind of coercion one predicated on the intentional creation manipulation and exploitation of real or threatened mass population movements In Weapons of Mass Migration Kelly M Greenhill offers the first systematic examination of this widely deployed but largely unrecognized instrument of state influence She shows both how often this unorthodox brand of coercion has been attempted more than fifty times in the last half century and how successful it has been well over half the time She also tackles the questions of who employs this policy tool to what ends and how and why it ever works Coercers aim to affect target states behavior by exploiting the existence of competing political interests and groups Greenhill argues and by manipulating the costs or risks imposed on target state populations This coercion by punishment strategy can be effected in two ways the first relies on straightforward threats to overwhelm a target s capacity to accommodate a refugee or migrant influx the second on a kind of norms enhanced political blackmail that exploits the existence of legal and normative

commitments to those fleeing violence persecution or privation The theory is further illustrated and tested in a variety of case studies from Europe East Asia and North America To help potential targets better respond to and protect themselves against this kind of unconventional predation Weapons of Mass Migration also offers practicable policy recommendations for scholars government officials and anyone concerned about the true victims of this kind of coercion the displaced themselves

The Rise of Indian Military Power: Evolution of an Indian Strategic Culture ,2015-07-15 This is a monumental and decisively shape outcomes For this economic power must be rapidly converted into usable military power India must field dominant war fighting capabilities in South Asia **Power in Global Governance** Michael Barnett,Raymond

Duvall,2004-12-23 This edited volume examines power in its different dimensions in global governance Scholars tend to underestimate the importance of power in international relations because of a failure to see its multiple forms To expand the conceptual aperture this book presents and employs a taxonomy that alerts scholars to the different kinds of power that are present in world politics A team of international scholars demonstrate how these different forms connect and intersect in global governance in a range of different issue areas Bringing together a variety of theoretical perspectives this volume invites scholars to reconsider their conceptualization of power in world politics and how such a move can enliven and enrich their understanding of global governance Fuses, Chains, and Backlashes Steve Chan,2025-05-16 Fuses Chains and

Backlashes analyzes the factors and processes that have historically ignited wars among the great powers and applies the resulting insights to examine the potential for contemporary Sino American competition to flare into conflict Distinguished political scientist Steve Chan emphasizes the importance of considering multiple enabling conditions for system level conflict including power shifts armament races alliance dynamics and enduring rivalries But these conditions in themselves do not always lead to war Chan introduces the idea of a catalyst or fuse that ignites the combustible mixture produced by these variables interactions By analyzing possible causal pathways to interstate war and applying this historical empirical context to the present day relationship between the US and China Chan hopes to help us learn from the past and avoid future catastrophe *Nuclear Weapons and Conflict Transformation* Saira Khan,2008-09-09 This new volume explores what the

acquisition of nuclear weapons means for the life of a protracted conflict using the case study of the conflict between India and Pakistan **International Order and the Future of World Politics** T. V. Paul,John A. Hall,1999-07-08 In this volume distinguished scholars from different social science disciplines assess the emerging international order The volume is divided into three main sections In the first theories and strategies of order realism liberalism institutionalism and post positivism are presented In the second the prospects of the major likely contenders for world leadership are analysed The strategic possibilities for the USA Russia China the European Union Japan and India are examined in detail Part III discusses some of the chief challenges to world order with contributors examining the problems posed by globalization nationalism ethnic and religious conflict environmental degradation and the spread of weapons of mass destruction This book offers a

comprehensive and interdisciplinary account of the prospects for a peaceful and just international order into the next century

Protean Power Peter J. Katzenstein, Lucia A. Seybert, 2018-01-18 Mainstream international relations continues to assume that the world is governed by calculable risk based on estimates of power despite repeatedly being surprised by unexpected change This ground breaking work departs from existing definitions of power that focus on the actors evolving ability to exercise control in situations of calculable risk It introduces the concept of protean power which focuses on the actors agility as they adapt to situations of uncertainty Protean Power uses twelve real world case studies to examine how the dynamics of protean and control power can be tracked in the relations among different state and non state actors operating in diverse sites stretching from local to global in both times of relative normalcy and moments of crisis Katzenstein and Seybert argue for a new approach to international relations where the inclusion of protean power in our analytical models helps in accounting for unforeseen changes in world politics

The Persistent Power of Human Rights Thomas Risse, Steve C. Ropp, Stephen C. Ropp, Kathryn Sikkink, 2013-03-07 This book offers a unique combination of quantitative and qualitative research arguing for the persistent power of human rights norms

Countering Terrorism and WMD Peter Katona, Michael D. Intriligator, John P. Sullivan, 2007-01-24 This volume shows us that in order to deal with today s Fourth Generation asymmetric warfare by terrorist groups using conventional arms and weapons of mass destruction we need a new global networked approach The contributors examine the various attempts that have been made to counter the latest wave of terrorism including the US strikes against Afghanistan and Iraq President George W Bush s declaration of a war against terrorism the creation of the US Department of Homeland Security and the 9 11 Commission Drawing from our experience with Terrorism Early Warning and the co production of counter terrorism intelligence this book explains the need for such a network and shows how it could be formed It compiles the opinions of experts from clinical medicine public policy law enforcement and the military These expert contributors identify the nature of a global counter terrorism network show how it could be created and provide clear guidelines for gauging its future effectiveness This book will be of great interest to all students of terrorism studies US national security international relations and political science in general
