The Ottoman Age of Exploration Giancarlo Casale, 2010-02-25 In 1517 the Ottoman Sultan Selim the Grim conquered Egypt and brought his empire for the first time in history into direct contact with the trading world of the Indian Ocean During the decades that followed the Ottomans became progressively more engaged in the affairs of this vast and previously unfamiliar region eventually to the point of launching a systematic ideological military and commercial challenge to the Portuguese Empire their main rival for control of the lucrative trade routes of maritime Asia The Ottoman Age of Exploration is the first comprehensive historical account of this century long struggle for global dominance a struggle that raged from the shores of the Mediterranean to the Straits of Malacca and from the interior of Africa to the steppes of Central Asia Based on extensive research in the archives of Turkey and Portugal as well as materials written on three continents and in a half dozen languages it presents an unprecedented picture of the global reach of the Ottoman state during the sixteenth century It does so through a dramatic recounting of the lives of sultans and viziers spies corsairs soldiers of fortune and women from the imperial harem Challenging traditional narratives of Western dominance it argues that the Ottomans were not only active participants in the Age of Exploration but ultimately bested the Portuguese in the game of global politics by using sea power dynastic prestige and commercial savoir faire to create their own imperial dominion throughout the Indian Ocean

Memory Maps Mariko Asano Tamanoi,2008-10-31 Between 1932 and 1945 more than 320 000 Japanese emigrated to Manchuria in northeast China with the dream of becoming land owning farmers Following the Soviet invasion of Manchuria and Japan s surrender in August 1945 their dream turned into a nightmare Since the late 1980s popular Japanese conceptions have overlooked the disastrous impact of colonization and resurrected the utopian justification for creating Manchukuo as the puppet state was known This re remembering Mariko Tamanoi argues constitutes a source of friction between China and Japan today Memory Maps tells the compelling story of both the promise of a utopia and the tragic aftermath of its failure An anthropologist Tamanoi approaches her investigation of Manchuria s colonization and collapse as a complex history of the present which in postcolonial studies refers to the examination of popular memory of past colonial

relations of power To mitigate this complexity she has created four memory maps that draw on the recollections of former Japanese settlers their children who were left in China and later repatriated and Chinese who lived under Japanese rule in Manchuria The first map presents the oral histories of farmers who emigrated from Nagano Japan to Manchuria between 1932 and 1945 and returned home after the war Interviewees were asked to remember the colonization of Manchuria during Japan's age of empire Hikiage mono autobiographies make up the second map These are written memories of repatriation from the Soviet invasion to some time between 1946 and 1949 The third memory map is entitled Orphans Voices It examines the oral and written memories of the children of Japanese settlers who were left behind at the war's end but returned to Japan after relations between China and Japan were normalized in 1972 The memories of Chinese who lived the age of empire in Manchuria make up the fourth map This map also includes the memories of Chinese couples who adopted the abandoned children of Japanese settlers as well as the children themselves who renounced their Japanese nationality and chose to remain in China In the final chapter Tamanoi considers theoretical questions of the state and the relationship between place voice and nostalgia She also attempts to integrate the four memory maps in the transnational space covering Japan and China Both fastidious in dealing with theoretical questions and engagingly written Memory Maps contributes not only to the empirical study of the Japanese empire and its effects on the daily lives of Japanese and Chinese but also to postcolonial theory as it applies to the use of memory

foundational look at social virtual worlds from the geographer's perspective How can the geographer's craft be applied to social virtual worlds This question is addressed through careful analysis of what social virtual worlds are how interest in these worlds has waxed and waned during the twenty first century and the meaning of their concocted spaces Examining one of the key features of the social virtual world the avatar the book focuses on its user's motivations and identity choices The

book draws on the geographical understanding of place to examine where avatars live work and roam and describes how virtual world places resemble and diverge from actual world places A mixed methods survey conducted in Second Life adds additional breadth to the discussion whilst a series of vignettes gives extra life to the subject matter This original exploration of the content and meaning of social virtual worlds is an essential resource for geographers and for anyone interested in the virtual world experience
