Instructor Experiences with Implementing Technology in Blended Learning Courses NELLIE. DEUTSCH ED D.,Nellie Deutsch,2010-05-21 Organizational leaders in institutions of higher education expect instructors to implement blended learning courses without understanding instructor experiences with technology Requiring faculty to teach blended learning courses without fully understanding the experiences instructors had implementing technology may lead to developing inappropriate professional training programs ineffective use of technology or to instructor disuse of technology in the future The purpose of this qualitative phenomenological research study was to explore the experiences instructors had implementing technology in blended learning courses in campus based institutions of higher education worldwide This qualitative phenomenological research study used a modified van Kaam method by Moustakas 1994 with in depth semi structured interviews to explore the experiences instructors had implementing

technology in blended learning courses The analysis of the transcribed interviews revealed four themes a facilitating instruction and learning b frustrating c satisfying and rewarding and d socially connecting The conclusions derived from the study suggest that learning about the experiences instructors had implementing technology in blended learning courses may guide educational leaders in providing support and in preparing professional development workshops on how to teach blended learning courses Uncertain Histories Kate Palmer Albers,2015-07-21 The compulsion to dwell on history on how it is recorded stored saved forgotten narrated lost remembered and made public has been at the heart of artists engagement with the photographic medium since the late 1960s *Uncertain Histories* considers some of that work ranging from installations that incorporate vast numbers of personal and vernacular photographs by Christian Boltanski Dinh Q L and Gerhard Richter to confrontations with absence in the work of Joel Sternfeld and Ken Gonzales Day Projects such as these revolve around a photographic paradox that hinges equally on knowing and not knowing on definitive proof coupled with uncertainty on abundance of imagery being met squarely with its own inadequacy Photography is seen as a fundamentally ambiguous medium that can be evocative of the historical past while at the same time limited in the stories it can convey Rather than proclaiming definitively what photography is the work discussed here posits photographs as objects always held in suspension perpetually oscillating in their ability to tell history Yet this ultimately leads to a new kind of knowledge production uncertainty is not a dead end but a generative space for the viewer s engagement with the construction of history
