**Higher Education in Partnership with Industry** David R. Powers, 1988 Looks at university affiliated industrial parks research and technical centers and on campus training programs and offers guidelines on developing cooperative programs Public Productivity Through Quality and Strategic Management Arie Halachmi, Geert Bouckaert, 1995 The book deals with the complexity of several concepts like the following example Quality is by no means a simple or single concept it can mean compliance with pre determined specifications of processes or outputs it can mean assessment of outcomes or gatekeeping in

other words assuring the quality of the inputs etc The parallels with measuring productivity are obvious if you cannot get good handles on outputs then use inputs and then politicians wonder why productivity appears to stagnate in services This problem of the simple becoming complicated was understood by the Japanese at the inception of their productivity movement Having carefully analyzed how Europe had adopted and adapted American productivity techniques and approaches and being faced with a turbulent system of industrial relations and a poor quality image the initiators of the Japanese productivity movement came to the conclusion that at least a cease fire and at best a treaty had to be negotiated between organised labour management and government The resulting 1955 productivity principles are being addressed in the book
