Aggression Lab George Robert Bach, Yetta M. Bernhard, 1971 A Program of Ten One Hour and Half for Groups of 8 to 10 People Sessions Focussing on the Development of Basic Interpersonal Skills Self Disclosure Self Expression Active Listening Ownership of Feelings Giving and Receiving Feedback and Interpersonal Risk Taking *From Research to Clinical Practice* George Stricker, Robert H. Keisner, 2013-11-11 It is an intriguing feature of human experience that in our present world amid thousands of indications of the effectiveness of the scientific method so many of us persist in demonstrably illusory or magical beliefs whether religiously related or simply reflections of long standing superstitions At a time when millions can observe on television the first landings of human beings on the moon when our daily lives in the so called developed countries are replete with conveniences that reflect scientific advances we still persist in daily wagers on the state lotteries in paying astrologers or palmists for their readings in investing thousands of dollars and hours of our legislators time in discussing such issues as the value of daily prayer in the elementary schools The emergence of modern medicine based increasingly on scientific research in chemistry biology and physics has considerably reduced people's resort to shamans and witch doctors within the major sectors of our own society although it has by no means eliminated such practitioners
