Aging In Early Industrial Society Work Family And Social Policy In Nineteenth Century England:

Interdisciplinary Perspectives on Aging in Nineteenth-Century Culture Anne-Julia Zwierlein, Katharina

Boehm, Anna Farkas, 2013-08-15 This essay collection develops new perspectives on constructions of old age in literary legal scientific and periodical cultures of the nineteenth century Rigorously interdisciplinary the book places leading researchers of old age in nineteenth century literature in dialogue with experts from the fields of cultural legal and social history It revisits the origins of many modern debates about aging in the nineteenth century a period that saw the emergence of cultural and scientific frameworks for the understanding of old age that continue to be influential today The contributors provide fresh readings of canonical texts by Charles Dickens Elizabeth Gaskell Anthony Trollope Thomas Hardy Henry James and others The volume builds momentum in the burgeoning field of aging studies It argues that the study of old age in the nineteenth century has entered a new and distinctly interdisciplinary phase that is characterized by a set of research interests that are currently shared across a range of disciplines and that explore conceptions of old age in the nineteenth century by privileging respectively questions of agency of place of gender and sexuality and of narrative and aesthetic form

Foisted Upon the Government? Edgar-André Montigny, 1997 While government officials in the 1890s claimed that forcing families to take responsibility for caring for the aged was in the interest of the elderly Edgar Andr Montigny reveals that government policy had more to do with saving money than a desire to serve the aged He provides a harsh critique of Ontario government policies toward the elderly and their families at the end of the nineteenth century and highlights similarities between what happened in the 1890s and current policy reforms in the area of long term care Montigny argues that government played a central role in determining how society viewed the elderly and family obligations to them Using census data municipal records and institutional case files he demonstrates that the government created and promoted an image of the aged population that bore little resemblance to reality and manipulated the concept of family obligations to justify policies to reduce social welfare costs The effect of these policies passed in the name of helping the elderly and their families was almost universally negative By dispelling the myths that continue to influence public policy concerning the aged Montigny provides a useful warning of the negative consequences of policies that are enacted to cut costs rather than to serve the population they are supposed to help

Devoney Looser,2008-09-08 This groundbreaking study explores the later lives and late life writings of more than two dozen British women authors active during the long eighteenth century Drawing on biographical materials literary texts and reception histories Devoney Looser finds that far from fading into moribund old age female literary greats such as Anna Letitia Barbauld Frances Burney Maria Edgeworth Catharine Macaulay Hester Lynch Piozzi and Jane Porter toiled for

decades after they achieved acclaim despite seemingly concerted attempts by literary gatekeepers to marginalize their later contributions. Though these remarkable women wrote and published well into old age, Looser sees in their late careers the necessity of choosing among several different paths. These included receding into the background as authors of classics, adapting to grandmotherly standards of behavior, attempting to reshape masculinized conceptions of aged wisdom, or trying to create entirely new categories for older women writers. In assessing how these writers affected and were affected by the culture in which they lived and in examining their varied reactions to the prospect of aging, Looser constructs careful portraits of each of her subjects and explains why many turned toward retrospection in their later works. In illuminating the powerful and often poorly recognized legacy of the British women writers who spurred a marketplace revolution in their earlier years, only to find unanticipated barriers to acceptance in later life, Looser opens up new scholarly territory in the burgeoning field of feminist age studies.

The Transformation of Old Age Security Jill Quadagno, 1988-02-18. Why did the United States lag behind Germany, Britain, and Sweden in adopting a national plan for the elderly? When the Social Security Act was finally enacted in 1935, why did it depend on a class-based double standard? Why is old age welfare in the United States still less comprehensive than its European counterparts? In this sophisticated analytical chronicle of one hundred years of American welfare history, Jill Quadagno explores the curious birth of old age assistance in the United States. Grounded in historical research and informed by social science theory, the study reveals how public assistance grew from colonial-era poor laws, locally financed and administered, into a massive federal bureaucracy.

Old Age in Late Medieval England Joel T. Rosenthal, 1996-08-29. This view of a society composed of the aged as well as of the young and the middle-aged is reinforced by an examination of peers, bishops, and members of parliament and urban office holders for whom demographic and career length information exists. Many individuals had active careers until near the end of their lives; the aged were neither rarities nor outcasts within their world.

The Social Topography of a Rural Community Steve Hindle, 2023-05-11. The Social Topography of a Rural Community is a micro history of an exceptionally well-documented seventeenth-century English village, Chilvers Coton, in north-eastern Warwickshire. Drawing on a rich archive of sources, including an occupational census, detailed estate maps, account books, private journals, and hundreds of deeds and wills, and employing a novel micro-spatial methodology, it reconstructs the life experience of some 780 inhabitants spread across 176 households. This offers a unique opportunity to visualize members of an English rural community as they responded to and in turn initiated changes in social and economic activity, making their own history on their own terms. In so doing, the book brings to the fore the social, economic, and spatial lives of people who have been marginalized from conventional historical discourse and offers an unusual level of detail relating to the spatial and demographic details of local life. Each of the substantive chapters focuses on the contributions and experiences of a particular

household in the parish the mill the vicarage the alehouse the blacksmith's forge the hovels of the labourers and coalminers the cottages of the nail smiths and ribbon weavers the farms of the yeomen and craftsmen and the manor house of Arbury Hall itself locating them precisely on specific sites in the landscape and the built environment and sketching the evolving taskscapes in which the inhabitants dwelled A novel contribution to spatial history as well as early modern material social and economic history more generally this study represents a highly original analysis of the significance of place space and flow in the history of English rural communities
