Preparation for Aging E. Heikkinen, J. Kuusinen, I. Ruoppila, 2012-12-06 Full of valuable definitions descriptions

discussion and succinct summaries the volume forms an interesting up to date reservoir of information on preparation for aging As a source of specific insights and alternative perspectives it is a welcome addition to the literature Aging and Society

Delaying Retirement Dirk Hofäcker, Moritz Hess, Stefanie König, 2016-12-14 To a backdrop of ageing societies pension crises and labour market reforms this book investigates how the policy shift from early retirement to active ageing has affected individual retirement behaviour Focusing on eleven European countries the United States and Japan it brings together leading international experts to analyze recent changes in pension systems Their findings demonstrate that there has been a fundamental transition in pension policies and a steep increase in older workers retirement ages and employment rates Yet changes in retirement behavior are not evenly distributed across all societal strata This raises the serious concern that an overall rise in the retirement age will be accompanied by the re emergence of social inequality in the transition from work to retirement This innovative edited collection will appeal to students and scholars of sociology economics political science human resources management gerontology and social policy and also to policy makers and professionals dealing with older workers

Challenges of Aging C. Torp, 2015-06-15 Population ageing is among the most important developments of our time This book explores the profound challenges faced by an aging world Leading experts from diverse disciplines describe the fundamental impact demographic aging has on pension systems on the concepts of retirement and old age and on the balance of generational justice

National Clearinghouse on Aging Thesaurus Documentation Associates, 1977

Retirement Policy in an Aging Society Robert Louis Clark, 1980 Monographic collection of essays on government policy regarding retirement in context with an ageing population in the USA discusses individual retirement decision making in relation to health self employed workers dual career couples labour supply private pension schemes etc and includes a contribution on a forecasting technique concerning occupational choice and labour force participation of woman workers

Advances in Research on Age in the Workplace and Retirement Cort W. Rudolph, Hannes Zacher, Susanne Scheibe, 2018-01-16 Shifts in the age composition of the workforce coupled with dynamic definitions of retirement represent important issues that influence work processes and more generally the experience of working across one's career For example redefinitions of careers and the changing nature of working have contributed to the emergence of distinct forms and patterns of work experiences across the prototypical work lifespan Likewise older individuals are increasingly delaying retirement in favor of longer term labor force participation The study of age and work and work and retirement by industrial work and organizational IWO psychologists and scholars of human resources management and organizational behavior HR OB has recently proliferated in part as a result of such trends along with the recognition that age related processes are important indicators of various proximal e.g job attitudes work behaviors work motives and wellbeing and distal outcomes e.g sustainable employability climates for aging and firm performance at various levels of abstraction in modern work environments Recent theoretical advances have suggested that age along with individual psychological factors

and various contextual influences can jointly influence work outcomes that contribute to long term employment success including work performance job attitudes work orientations and motivations Similar theoretical developments concerning retirement have postulated individual and contextual elements that drive success in the transition from career and work roles to non work and leisure as well as post retirement bridge employment roles In this Research Topic we aim to curate a collection of papers that are representative of current trends and advances in thinking about and investigating the role of age in workplace processes and the changing nature of retirement Our hope is to showcase various contemporary ideas and rigorous empirical studies as a means to inform broader thinking and to support enhanced theorizing and organizational practice regarding these processes

The Anthropology of Retirement Daniel Miller, Pauline Garvey, 2025-07-01 As a result of growing life expectancy the period of retirement is likely to surpass the entire period of working life in many countries There is little acknowledgement that retirement is not an event but an extended period of life that unfolds over several decades Experiences vary considerably across the globe from areas where most people cannot afford to retire to places where a multitude of new possibilities are being developed for retirees This book is an anthropological approach to consider life beyond retirement in a wide range of contexts and consequences
