Aging, Society, and the Life Course, Sixth Edition Suzanne R. Kunkel, Richard Settersten, 2021-05-07

Newly revised and updated this classic text examines the impact of social forces on the aging process. It considers aging from personal, family, community, societal, and global perspectives. The sixth edition reflects significant changes in the field of social gerontology. It delves deeply into the life course paradigm to demonstrate how aging experiences are shaped by individuals' pasts and by a sweeping range of social factors. It uses a diversity, equity, and inclusion lens to underscore how social and economic advantages and disadvantages can accumulate with aging. Chapters reflect the richness and complexity of family, life, work, and retirement, health, and community engagement. The book addresses landmark changes in laws and policies and highlights innovative developments to enhance the independence of elders. It emphasizes what an aging society means for people of all ages and generations and the causes and consequences of pervasive ageism. Provocative essays explore contemporary ethical, legal, and social issues. Especially written for courses in social gerontology and sociology of aging, the book is also valuable for curricula in social work, allied health, and the ever-growing range of disciplines and professions that are affected by individual and population aging. The sixth edition offers several new features to enhance the teaching and learning experiences, including Stop and Think boxes to foster curiosity, critical thinking, and personal connections to the ideas; bullet point summaries to reinforce chapter takeaways; and an updated and expanded Instructor's Manual. Purchase includes digital access for use on most mobile devices or computers.
