## **Agrarian Elites:**

**Agrarian Elites** Enrico Dal Lago, 2005-11-01 Between 1815 and 1861 American slaveholders and southern Italian landowners presided over the economic and social life of two predominantly agricultural regions the U S South and Italy's Mezzogiorno Enrico Dal Lago ingeniously compares these agrarian elites demonstrating how the study of each enhances our understanding of the other as well as of their shared nineteenth century world *Agrarian Elites* charts the parallel developments of plantations and latifondi in relation to changes in the world economy At the same time it examines the spread of paternalistic models of family relations and of slave and free labor management that accompanied the rise of large groups of American slaveholders and southern Italian landed proprietors in the early to mid 1800s According to Dal Lago the most articulate and enlightened members of both elites combined the pursuit of profit with the implementation of modern contractual practices in dealing with their workforces Both elites also used their economic and social power for political advantage opposing the intervention of their national governments in local affairs The search for ever better protection of their respective interests in slaveholding and landed property led ultimately to their support for the creation of two nations the Confederate States of America and the Kingdom of Italy both in 1861 Dal Lago brings together two subjects that have generated considerable debate and research systems of slave and nominally free labor and the elites who employed them and nineteenth century nationalism With its pathbreaking approach and singular and comparative insights *Agrarian Elites* will inform not only American and Italian studies but also the very practice of comparative history

**The Political Economy of Extractivism** Hannes Warnecke-Berger, Jan Ickler, 2023-07-21 For many countries primarily in the Global South extractivism the exploiting and exporting of natural resources is big business For those exporting countries natural resource rents create hope and promise for development which can be a seductive force This book explores the depth of extractivism in economies around the world The contributions to this book investigate the connection between the political economy of extractivism and its impact on the sociopolitical

fabric of natural resource exporting societies in Asia Africa Latin America and Eastern Europe The book engages with a comparative perspective on the persistence of extractivism in these four different world regions The book focuses on the formative power of rents and argues that rents are seductive The individual contributions flesh out this seductive force of rents on different political scales and how this seduction affects a variety of actors The book investigates how these actors react to the prevalence of rent how they align or break with specific political and economic strategies and how myths of resource driven development play out on the ground The book therefore underlines that rent theory bridges current debates in different area communities and offers fresh insights into extractivist societies social economic and political dynamics This book will be of significant interest to readers in political economy political science development studies and area studies

*Shareholder Cities* Sai Balakrishnan, 2019-10-04 Economic corridors ambitious infrastructural development projects that newly liberalizing countries in Asia and Africa are undertaking are dramatically redefining the shape of urbanization Spanning multiple cities and croplands these corridors connect metropolises via high speed superhighways in an effort to make certain strategic regions attractive destinations for private investment As policy makers search for decentralized and market oriented means for the transfer of land from agrarian constituencies to infrastructural promoters and urban developers the reallocation of property control is erupting into volatile land based social conflicts In *Shareholder Cities* Sai Balakrishnan argues that some of India's most decisive conflicts over its urban future will unfold in the regions along the new economic corridors where electorally strong agrarian propertied classes directly encounter financially powerful incoming urban firms Balakrishnan focuses on the first economic corridor the Mumbai Pune Expressway and the construction of three new cities along it The book derives its title from a current mode of resolving agrarian urban conflicts in which agrarian landowners are being transformed into shareholders in the corridor cities and the distributional implications of these new land transformations Shifting the focus of the study of India's contemporary urbanization away from megacities to these in between corridor regions Balakrishnan explores the production of uneven urban development that unsettles older histories of agrarian capitalism and the emergence of agrarian propertied classes as protagonists in the making of urban real estate markets *Shareholder Cities* highlights the possibilities for a democratic politics of inclusion in which agrarian urban encounters can create opportunities for previously excluded groups to stake new claims for themselves in the corridor regions

**Authoritarianism in Syria** Steven Heydemann, 2018-10-18 For almost forty years Syria has been ruled by a populist authoritarian regime under the Ba th Party led since 1970 by President Hafiz al Asad The durability and resilience of this regime is a striking contrast to the instability and intense social conflict that preceded the Ba th s seizure of power when Syria was seen as among the least stable of Arab states This dramatic transition raises questions about how the Ba th succeeded in constructing the institutions needed to consolidate a radically populist and authoritarian system of rule The Ba th s accomplishment also poses a significant theoretical challenge to the widely held view that populist strategies of state building are inherently unstable Drawing on evidence from Syrian American and British archives as well as from published French and Arabic sources Steven Heydemann explains the capacity of the Ba th to overcome the obstacles that typically undermine the consolidation of radical populist regimes He links the Ba th s adoption of a radical populist strategy of state building and its capacity to implement this strategy to the dynamics of social conflict state expansion and structural change in the political economy of post independence Syria Arguing that conventional accounts of Syrian politics neglect the centrality of institutions and institutional change Heydemann shows how shifts in the pattern of state intervention after 1946 transformed Syria s political arena

American Slavery, Atlantic Slavery, and Beyond Enrico Dal Lago, 2015-12-22 American Slavery Atlantic Slavery and Beyond provides an up to date summary of past and present views of American slavery in international perspective and suggests new directions for current and future comparative scholarship It argues that we can better understand the nature and meaning of American slavery and antislavery if we place them clearly within a Euro American context Current scholarship on American slavery acknowledges the importance of the continental and Atlantic dimensions of the historical phenomenon comparing it often with slavery in the Caribbean and Latin America However since the 1980s a handful of studies has looked further and has compared American slavery with European forms of unfree and nominally free labor Building on this innovative scholarship this book treats the U S peculiar institution as part of both an Atlantic and a wider Euro American world It shows how the Euro American context is no less crucial than the Atlantic one in understanding colonial slavery and the American Revolution in an

age of global enlightenment reformism and revolutionary upheavals the Cotton Kingdom's heyday in a world of systems of unfree labor and the making of radical Abolitionism and the occurrence of the American Civil War at a time when nationalist ideologies and nation building movements were widespread

**Perspectives on the role of the state in economic development: Taking stock of the "Developmental State" after 35 years** Kyle, Jordan, 2017-01-13 This review evaluates the role of the state in development offering a new framework for understanding what capabilities states need to overcome different types of market failures This framework is employed to

understand the successes and failures of state led development in Malaysia The review addresses three key questions First what do we know about developmental states and why they emerged Second what have developmental states achieved In answering this question I look not only at growth but also at structural transformation economic upgrading equity and human capability enhancement In contrast to the idea of a single East Asian model of development I find five distinct development trajectories Third how did developmental states utilize state structures to pursue development To answer this final question I examine in depth the history of state led development in Malaysia including agricultural industrial and social policies This case study sheds light on what specific institutional and political capacities helped Malaysia to improve productivity in agriculture expand the manufacturing sector and reduce inequality It also explores why Malaysia has been less successful in developing linkages with the export based manufacturing sector

Handbook of Sociological Theory Jonathan H. Turner, 2006-05-17 Sociology is experiencing what can only be described as hyperdifferentiation of theories there are now many approaches competing for attention in the intellectual arena From this perspective we should see a weeding out of theories to a small number but this is not likely to occur because each of the many theoretical perspectives has a resource base of adherents As a result theories in sociology do not compete head on with each other as much as they coexist This seminal reference work was brought together with an eye to capturing the diversity of theoretical activity in sociology specifically the forefront of theory Contributors describe what they themselves are doing right now rather than what others have done in the past The goal of this volume is to allow prominent theorists working in a variety of traditions who wouldn't usually come together to review their work The chapters in this volume represent a mix of theoretical orientations and strategies but these theories are diverse and represent the prominent theoretical discussions in sociology today Some areas included are Section I Theoretical Methodologies and

Strategies Section II The Cultural Turn in Sociological Theorizing Section III Theorizing Interaction Processes Section IV Theorizing from the Systemic and Macrolevel Section V New Directions in Evolutionary Theorizing Section VI Theorizing on Power Conflict and Change Section VII Theorizing from Assumptions of Rationality This handbook will be of interest to those wanting a broad spectrum and overview of late 20th early 21st century sociological theory

Josiah's Passover Shigeyuki Nakanose, 2004-03-10 Focusing on the celebrated story of Josiah s Passover in 2 Kings Shigeyuki Nakanose provides a dramatic demonstration of the contribution of sociological hermeneutics to contemporary Biblical exegesis This method complements historical critical exegesis by reconstructing the social systems of Biblical communities in their religious as well as their economic and political orders After introducing the sociological method and a brief consideration of historical and literary critical readings of Josiah s Passover Nakanose explicates the method of sociological analysis and its facets economic social political and ideological Turning to the text itself he shows clearly how the process of liturgical purification it describes is intimately tied to the centralization of political and commercial interests in ancient Israel He then goes on to demonstrate using the experience of Brazilian base communities what happens when this critical reading is joined with critical reflection on the reader s own social location
