Agrarian Reform And Counterreform In Chile:

Agrarian Reform and Counter-reform in Chile Joseph Collins, 1979 **The agrarian reform experiment in Chile**

Valdés, Alberto, Foster, William E., 2014-09-01 This paper presents what is known about the role of agrarian reform and the subsequent counter reform in producing a successful dynamic evolution of Chilean agriculture Latin American Peasants

Tom Brass, 2004-08-02 The essays in this collection examine agrarian transformation in Latin America and the role in this of peasants with particular reference to Bolivia Peru Chile Brazil and Central America Among the issues covered are the impact of globalization and neo liberal economic policies *The Agrarian Question and Reformism in Latin America* Alain de Janvry, 1981-12-01 The Agrarian Question and Reformism in Latin America epitomizes the emerging tradition of conflict oriented approaches to problems of economic agricultural and rural development in Third World nations Drawing on firsthand observations of the agrarian crises in Argentina Chile Colombia Peru and ten other Latin American nations Alain de Janvry effectively blends Marxist theories of world wide economic development with empirical analysis and policy recommendations De Janvry offers both a careful examination of the conditions of underdevelopment in Latin America and detailed discussions of the achievements and limits of technological change land reform integrated rural development and basic needs program The Agrarian Question and Reformism in Latin America is written for both practitioners and academicians Students of economic development will benefit especially from its intelligent explication of conflict oriented theory and technique Free Market Democracy and the Chilean and Mexican Countryside Marcus J. Kurtz, 2004-04-05 This book examines the relationship between free markets and democracy It demonstrates how the implementation of even very painful free market economic reforms in Chile and Mexico have helped to consolidate democratic politics without engendering a backlash against either reform or democratization This national level compatibility between free markets and democracy however is founded on their rural incompatibility In the countryside free market reforms socially isolate peasants to such a degree that they become unable to organize independently and are vulnerable to the pressures of local economic elites This helps to create an electoral coalition behind free market reforms that is critically based in some of the market s biggest victims the peasantry The book concludes that the comparatively stable free market democracy in Latin America hinges critically on its defects in the countryside conservative free market elites may consent to open politics only if they have a rural electoral redoubt **Ecological Economic and Socio Ecological Strategies for Forest Conservation** Felix Fuders, Pablo J. Donoso, 2020-05-13 This book proposes strategies for improving the resilience and conservation of temperate forests in South America such that these forests can provide ecosystem services in a sustainable way As such it contributes to the design of a resilient human forest model that takes into account the multiculturalism of local communities in many cases including aspects of ecological economics development economics and territorial development planning that are related to indigenous peoples or first nations Further it provides proposals for public and territorial policies that improve the state of

conservation of native forests and forest ecosystems based on a critical analysis of the economic factors that lead to the degradation of forest ecosystems in South America today This edition was conceived by members of the Transdisciplinary Research Center for Social and Ecological Strategies for Sustainable Forest Management in South America at the Universidad Austral de Chile It includes contributions by distinguished researchers from around the world combining the fields of economics ecology biology anthropology sociology and statistics It is not however simply a collection of works written by authors from different disciplines but rather each chapter is in itself transdisciplinary This approach makes the book a unique contribution to enhancing social managerial and political approaches to forestry management helping to protect forest ecosystem services and make them more sustainable This in turn will benefit local communities and society as a whole by reducing the negative externalities of forestry management and enhancing future opportunities

Resiliency in Hostile Environments William L. Alexander, 2008 The agricultural communities *comunidades agrícolas* of Chile's Norte Chico are dynamic systems of indivisible communal land inherited use rights democratic decision making and diverse economic strategies closely linked to changing environmental conditions In this semi arid region where drought is chronic and poverty is widespread families reproduce their livelihood and *comunero* culture through a variety of integrated economic subsistence and social practices Based on fieldwork spanning years of extreme climate changes this vividly detailed ethnography of daily life in a peasant community explores the full range of income generating and resource management strategies and forms of cooperative mutual assistance that are available to these households One family's story is highlighted to illustrate the extraordinary resiliency of these communities despite the harsh ecological and at times social and political environments in which they are situated The book places these descriptions within the political economy of development in Chile's current transition to democracy While the state is more attentive to rural poverty in the post dictatorship era some programs and policies informed by a discourse of modernization and standardization limit these traditionally flexible livelihood options

Political Change in the Third World Charles Andrain, 2012-07-26 In this informative and highly readable book first published in 1988 Charles Andrain explores the ways in which public policies and socio political beliefs and structures cause political change in the Third World The author examines 3 types of political change 1 transitions in political leaders and their policies 2 fundamental transformations in political structures policy priorities and political strategies for dealing with policy issues and 3 the impact of economic education and health care policies on the society itself including changes in unemployment inflation economic growth literacy and birth and death rates In the first part of the book Professor Andrain presents a general overview of political change in the Third World explaining how different models of political systems explain the dynamics of political events in Latin America Asia Africa and the Middle East In the second part of the book he then applies these models to specific changes in five developing nations Vietnam Cuba Chile Nigeria and Iran The book is unique in its careful blending of a policy focus with a structural analysis of nation states domestic social groups
