Dismantling the Mexican State? Rob Aitken,Nikki Craske,David E. Stansfield,2016-07-27 In assessing Carlos Salinas socio economic reforms the authors question the extent to which the Mexican state has been radically transformed and possibly dismantled The authors show that the changes which have occurred are uneven limited and reversible Despite the aura of reform it is the degree of continuity which is the most noticeable feature In many respects the Mexican State remains highly authoritarian

The Concept of Other in Latin American Liberation Eugene Walker Gogol,2002-01-01 In this exciting new study Eugene Gogol interweaves three strands that form the intellectual bedrock for the concept of the Other in the Latin American context Hegel s dialectic of negativity Marx s humanism and autochthonal emancipatory thought From this foundation the book explores the relation of liberatory philosophic thought to today s social and class movements Gogol considers the logic of capitalism on Latin American soil the ecological crisis in Latin America and the concept and practice of self liberation Still one of the most contested terrains of Latin American thought the Other has been of central concern for many luminary thinkers including Leopoldo Zea Octavio Paz and JosZ Carlos MariOtegui While these writers may not garner much publicity in the world press the highly public and ongoing struggles of the Zapatistas and Brazil s Landless Workers Movement demonstrate the continuing need to theorize the volatile nature of Latin American social reality

Transforming Agrarian Economies Thomas P. Tomich,Peter Kilby,Bruce F. Johnston,2018-05-31 The world s 58 poorest countries are diverse in many respects but they share the characteristic of a labor force overwhelmingly dependent on agriculture Challenging the assumption that mass poverty and chronic hunger are insoluble problems this book systematically explores the multiple aspects of economic development in these countries which are home to 60 percent of the world s population The authors offer a broad based development strategy to raise incomes through agricultural productivity growth and expanded rural employment They present rich new information on the rural informal sector and on agriculture

industry interactions and they analyze the impact of macroeconomic and social policies on the rural economy Policy instruments aimed at bringing about broad based development are carefully assessed from fiscal policy to development of new seeds and farm implements The book includes detailed case studies of countries that have seized or missed development opportunities Comparison of the successful economic transformations of Japan and the United States shows how key ideas which the authors call strategic notions have enabled policymakers to act with foresight Analyses of strategic choices in China the Soviet Union Taiwan Mexico Kenya and Tanzania also show how development strategies that emerge from the real world political economy reflect a mix of individual interests and strategic notions

Popular Movements in Autocracies Guillermo Trejo, 2012-08-13 A new explanation of the rise development and demise of social movements and cycles of protest in autocracies

Democratization and Authoritarian Party Survival Joy Kathryn Langston, 2017 By focusing on political institutions to understand the new power sharing agreement between the national party headquarters and the party's governors this work explores why Mexico's hegemonic PRI was able to survive out of power after it was ousted from the executive in 2000

The Reinvention of Mexico Gavin O'Toole, 2010-10-25 This book examines a sophisticated effort by radical economic reformers to change the ideology of nationalism in Mexico from 1988-94 and so reinvent the country in a way that was more friendly to their market policies and responses to this by opposition parties

Cutting Edge Jim Davis, Thomas Hirschl, Michael Stack, 1997 The rapid expansion of laborless production systems creates enormous instability Money previously paid in wages is spent on technology Workers lose jobs to robotic intelligence and therefore have no money to buy the goods produced by the technology CUTTING EDGE provides an up to the minute analysis of the complex relations between technology and work and how jobs and living standards can be protected

The Other Mirror Miguel Angel Centeno, Fernando López-Alves, 2001 If social science's cultural turn has taught us anything it is that knowledge is constrained by the time and place in which it is produced In response scholars have begun to reassess social theory from the standpoints of groups and places outside of the European context upon which most grand theory is based Here a distinguished group of scholars reevaluates widely accepted theories of state property race and economics against Latin American experiences with a two fold purpose They seek to deepen our understanding of Latin America and the problems it faces And by testing social science paradigms against a broader variety of cases they pursue a better and truly generalizable map of the social world Bringing universal theory into dialogue with specific history the contributors consider

what forms Latin American variations of classical themes might take and which theories are most useful in describing Latin America For example the Argentinian experience reveals the limitations of neoclassical descriptions of economic development but Charles Tilly s emphasis on the importance of war and collective action to statemaking holds up well when thoughtfully adapted to Latin American situations Marxist structural analysis is problematic in a region where political divisions do not fully express class cleavages but aspects of Karl Polanyi s socioeconomic theory cross borders with relative ease This fresh theoretical discussion expands the scope of Latin American studies and social theory bringing the two into an unprecedented conversation that will benefit both Contributors are in addition to the editors Jeremy Adelman Jorge I Domínguez Paul Gootenberg Alan Knight Robert M Levine Claudio Lomnitz John Markoff Verónica Montecinos Steven C Topik and J Samuel Valenzuela *The Punitive City* Markus-Michael Müller, 2016-06-15 In the eyes of the global media modern Mexico has become synonymous with crime violence and insecurity But while media fascination and academic engagement has focussed on the drug war an equally dangerous phenomenon has taken root In *The Punitive City* Markus Michael Müller argues that what has emerged in Mexico is not just a punitive urban democracy in which those at the social and political margins face growing violence and exclusion More alarmingly it would seem that clientelism in the region is morphing into a private political protection racket Vital reading for anyone seeking to understand the implications of a phenomenon that is becoming increasingly widespread across Latin America *Reinventing the Lacandón* Brian Gollnick, 2022-08-23 Before massive deforestation began in the 1960s the Lacandón jungle which lies on the border of Mexico and Guatemala was part of the largest tropical rain forest north of the Amazon The destruction of the Lacandón occurred with little attention from the international press until January 1 1994 when a group of armed Maya rebels led by a charismatic spokesperson who called himself Subcomandante Marcos emerged from jungle communities and briefly occupied several towns in the Mexican state of Chiapas These rebels known as the Zapatista National Liberation Army became front page news around the globe and they used their notoriety to issue rhetorically powerful communiqués that denounced political corruption the Mexican government s treatment of indigenous peoples and the negative impact of globalization As Brian Gollnick reveals the Zapatista communiqués had deeper roots in the Mayan rain forest than Westerners realized and he points out that the very idea of the jungle is also deeply rooted though in different ways in the Western imagination Gollnick draws on theoretical innovations offered by subaltern studies to discover oral traces left by indigenous inhabitants in dominant cultural productions He explores both how the jungle region and its inhabitants have been represented in literary writings from the time of the Spanish conquest to the present and how the indigenous people have represented themselves in such works including post colonial and anti colonial narratives poetry video and photography His goal is to show how popular and elite cultures have interacted in creating depictions of life in the rain forest and to offer new critical vocabularies for analyzing forms of cross cultural expression **The Statesman's Yearbook 2005** B. Turner, 2017-02-07 For one hundred and forty one years The
