Asian development and features particular to the political economy of agriculture in each country **After the Green Revolution** Gordon R. Conway, Edward B. Barbier, 2013-11-05 The Green Revolution of the 60 s and 70 s produced immense gains in food cereal production in the Third World But there are huge problems in the post revolutionary era farmers with small or marginal holdings have benefited less than wealthier farmers intensive mono cropping has made production more susceptible to environmental stresses and shocks Now there is evidence of diminishing returns from intensive and intensively chemical agricultural production What is needed is a new approach equally revolutionary but different in its ideas and style The authors set out what they mean by sustainable agriculture in the new era and look at the effects of international economic restraints and of national policies on the kind of development they see as necessary They chart a path for sustainable livelihoods for Third World farmers enmeshed by forces outside their control They describe methods of evaluating and resolving the tough trade offs all levels of intervention from international trade down to the individual farm This book cannot provide all the answers but it does indicate what international conditions we need to be aware of what national policies we need to advocate and what approaches at the local level we need to adopt to ensure the goal of agricultural sustainability Originally published in 1990 **Protectionism and World Welfare** Dominick Salvatore, 1993-09-23 This volume addresses highly topical issues at a crucial time in international economic relations The world has never been closer to dismantling the liberal multilateral trading system which has been painstakingly established and successfully operated since the Second World War In this volume many of the world s most distinguished economists examine the movement toward protectionism bilateralism and regionalism and its causes effects and possible solutions The contributors are theorists researchers and advisors to governments and international organizations who are at the forefront of trade theory policy and practice and whose analyses have a real impact on international trade By collecting together these analyses in a single volume this book provides a unique survey for students and scholars of economics and all those concerned with trade theory and policy in business and government Crafting a Global Trade Strategy: the U.S. and the WTO ,
