The Sustainability of Rural Systems I.R. Bowler, C.R. Bryant, C. Cocklin, 2013-06-29 Economy society and environment comprise the three main dimensions of sustainable development but too often they are considered separately This book by comparison examines the interaction of the three dimensions in the context of rural systems embracing a wide range of topics including globalisation and reregulation in sustainable food production conservation and sustainability the development of sustainable rural communities and sustainable rural urban interaction An international team of geographers drawn from the International Geographical Union's Commission on The Sustainability of Rural Systems summarises the basis of unsustainable rural development in these topics the remedial policies being pursued and their own evaluations of the policies Rather than deal just with generalisations their analyses are illustrated by detailed case studies drawn from a variety of rural systems in both developed and developing countries

Organic Agriculture Sustainability, Markets and Policies OECD, 2003-06-04 This publication reveals that organic agriculture is disadvantaged by current agricultural support policies and the proliferation of standards and labels has sometimes confused consumers and impeded trade

Environmental Change and Agricultural Sustainability in the Mekong Delta Mart A. Stewart, Peter A. Coclanis, 2011-05-13 The Mekong Delta of Vietnam is one of the most productive agricultural areas in the world The Mekong River fans out over an area of about 40 000 sq kilometers and over the course of many millennia has produced a region of fertile alluvial soils and constant flows of energy Today about a fourth of the Delta is under rice cultivation making this area one of the premier rice granaries in the world The Delta has always proven a difficult environment to manipulate however and because of population pressures increasing acidification of soils and changes in the Mekong's flow environmental problems have intensified The changing way in which the region has been linked to larger flows of commodities and capital over time has also had an impact on the region For example its re emergence in recent decades as a major rice exporting area has linked it inextricably to global markets and their vicissitudes And most recently the potential for sea level increases because of global warming has added a new threat Because most of the region is on average only a few meters above sea level and because any increase of sea level will change the complex relationship between tides and down river water flow the Mekong Delta is one of the areas in the world most vulnerable to the effects of climate change How governmental policy and resident populations have in the past and will in coming decades adapt to climate change as well as several other emerging

or ongoing environmental and economic problems is the focus of this collection Sustainability and Change in Rural Australia Chris Cocklin, Jacqui Dibden, 2005 By addressing themes such as social and economic change government policy and gender relations this volume tackles the thematic complexities of sustainability It attempts to understand how small rural communities have survived in the past what factors shaped them and how these factors will impact on their future survival
