

An aerial photograph of a vast, green agricultural field. The field is divided into curved, parallel strips of varying shades of green, suggesting different crops or stages of growth. In the center of the field, a small yellow tractor is visible, moving across the land. The overall scene is bright and vibrant, with a clear sky and a well-maintained landscape.

**Agriculture and the Environment** Terry L. Anderson, Bruce Yandle, 2013-11-01 Although US agriculture is the envy of the world there is a growing gap between what is and what could be produced The gap is due in part to a growing morass of environmental regulations which limit US food production without necessarily improving environmental quality In this compilation leading experts examine a range of questions posed by these constraints and offer ideas for reform Authors explore whether we are really running out of prime farmland how best to preserve environmentally sensitive land and for how long whether controls on agricultural land use can prevent urban sprawl whether chemicals that contribute to agricultural productivity are harmful to the environment the connections between genetically modified crops and human health how taxes affect land use what role water markets play in balancing agricultural productivity and wildlife habitat and the effects of the Endangered Species Act on land use **Greener than Thou** Terry L. Anderson, Laura E.

Huggins, 2013-09-01 In a powerful argument for free market environmentalism Terry Anderson and Laura Huggins break down liberal and conservative stereotypes of what it means to be an environmentalist They show that by forming local coalitions around market principles stereotypes are replaced by pragmatic solutions that improve environmental quality without necessarily increasing red tape *Smarter Growth* John H. Spiers, 2018-04-17 Suburban sprawl has been the prevailing feature and double edged sword of metropolitan America's growth and development since 1945 The construction of homes businesses and highways that were signs of the nation's economic prosperity also eroded the presence of agriculture and polluted the environment This in turn provoked fierce activism from an array of local state and national environmental groups seeking to influence planning and policy Many places can lay claim to these twin legacies of sprawl and the attendant efforts to curb its impact but according to John H Spiers metropolitan Washington D C in particular laid the foundations for a smart growth movement that blossomed in the late twentieth century In *Smarter Growth* Spiers argues that civic and social activists played a key role in pushing state and local officials to address the environmental and fiscal costs of growth Drawing on case studies including the Potomac River's cleanup local development projects and agricultural preservation he identifies two periods of heightened environmental consciousness in the early to mid 1970s and the late 1990s that resulted in stronger development regulations and land preservation across much of metropolitan Washington *Smarter Growth* offers a fresh understanding of environmental politics in metropolitan America giving careful attention to the differences between rural suburban and urban communities and demonstrating how public officials and their constituents engaged in an ongoing dialogue that positioned environmental protection as an increasingly important facet of metropolitan development over the past four decades It reveals that federal policies were only one part of a larger decision making process and not always for the benefit of the environment Finally it underscores the continued importance of grassroots activists for pursuing growth that is environmentally fiscally and socially equitable in a word smarter **Food for a**
