## **Agriculture In Uganda Volume 1 General Infor:**

**Agriculture in Uganda: General information** Joseph K. Mukiibi, 2001 The first comprehensive account of agriculture in Uganda was made in 1940 and updated in 1970 Since that publication agriculture in Uganda has undergone a number of developments taking advantage of the economic and technical changes now available In this context the National Agricultural Research Organisation NARO and the CTA have written a new four volume series focussing on the strategic issues facing agriculture It is written for farmers and agro based industrialists as well as researchers civil leaders and NGOs universities and collaborating partners in agricultural research and development in Uganda and more broadly in sub Saharan Africa It aims to provide guidelines for increased and sustainable agricultural production and productivity This the first volume provides background information to the physical environment research techniques and methodology and marketing and agricultural technology in anticipation of the next three volumes Crops Forestry and Livestock and Fisheries **China**

## **Agricultural Laws and Regulations Handbook Volume 1 Strategic Information and Basic Laws** IBP, Inc., 2013-08

**China Agricultural Laws and Regulations Handbook** *Mapping study of food-grain value chains in Eastern Africa* CTA, Kilomo Trust, 2017-11-28 Agriculture is one of the East African Community s most important economic sectors The major staple foods in the region are maize rice potatoes bananas cassava wheat sorghum millet and pulses However agricultural production in the region is prone to the vagaries of climate change fluctuating food prices a rapidly growing population in the urban areas and natural resource degradation Even though governments have intensified efforts to develop agriculture in the region intra regional trade in staple food grains is still very low The main objective of the study is to provide CTA with an understanding of the salient features of the four food grain value chains in the EAC region and information and possible entry points about the types of commodities to be supported and the nodes of the food grain value chains that interventions should focus on

**Agriculture in Uganda: Crops** Joseph K. Mukiibi, 2001 Crops offers a comprehensive survey of the various strategies for managing and developing increased and sustainable crop production The study is organised into eight parts which are plant genetics and plant genetic resources in Uganda cereals millets sorghum and maize oil crops grain and legumes roots and tubers cassava yams sweet potatoes and solanum potatoes and plantains The remainder of the study concentrates on the agricultural production of traditional cash crop cotton coffee tea cocoa and sugar and touches upon new areas such as sericulture and mushroom cultivation

Stepping-stones to improve upon functioning of participatory agricultural extension programs Prossy Isubikalu, 2023-08-28 The Farmer Field School FFS originated in the 1980s in the context of integrated pest management in Indonesian rice farming With the hope that it is the remedy for agricultural extension system FFS has been promoted as a tool for participatory learning and experimentation all over the world This work results from a critical analysis of the introduction of the FFS concept into the agricultural innovation system in Uganda Ideally an FFS produces new technical knowledge in the context of application through the input of local human resources

The analysis framed as a technography shows that implementation and operation of an FFS is hugely complex. This detailed study of institutional factors from the level of international donor organizations down to the level of local leadership and gender relations and analysis of technical factors in different rural areas of Uganda makes clear that FFS is more than a local tool for farmer participation in agricultural improvement. Implementation of a FFS requires adjustment of the agricultural innovation system at all levels and an integrated tackling of agricultural problems in order to meet its objectives. Isubikalu shows that it is imperative to demolish existing organizational structures and create new ones which align scientifically with local structures to produce an appropriate people centered system that is more responsive to agricultural and rural development. She provides stepping stones in redesigning FFS to fit the specific conditions in Uganda.

*Achieving sustainable cultivation of bananas Volume 1* Prof Gert H. J. Kema, Prof André Drenth, 2018-10-05. Assesses current yields in different regions and constraints in improving productivity. Discusses all the key stages in cultivation needed to make banana production more efficient. Reviews ways of assessing and improving the sustainability of banana cultivation.

*Agriculture in Uganda: Livestock and fisheries* Joseph K. Mukiibi, 2001. This study addresses the challenges and prospects of managing and developing Uganda's livestock and fisheries resources. The volume is divided into two parts. The first livestock deals with beef production, dairy production, small ruminant production, poultry production, pig production, bee keeping, livestock diseases and pests, animal feed resources and pastures and range management. Part two fisheries provides a general overview of the fisheries sector in Africa and then of the fish and fisheries of Uganda, the water environment, aquaculture and post harvest fisheries.

**World Programme for the Census of Agriculture 2020** Food and Agriculture Organization of the United Nations, 2019-02-04. FAO has supported member countries to carry out their national agricultural censuses since 1945 through the development and dissemination of international standards, concepts, definitions and methodologies as well as technical assistance. In 2015 FAO published Volume 1 of the World Programme for the Census of Agriculture 2020 (WCA 2020 Programme concepts and definitions), the tenth decennial programme that provides guidelines for implementation of national agricultural censuses in the 2016-2025 decade. Volume 1 deals with the methodological and conceptual aspects of the census of agriculture. In addition to the use of international standards, the proper conduct of an agricultural census also depends on adequate planning, implementation, use of resources and quality assurance throughout all stages of the census. In light of this, Volume 2 of WCA 2020 (Operational guidelines) has been designed to guide national census practitioners responsible for conducting the agricultural census. It deals with the practical steps involved in actually conducting an agricultural census in the field. Volume 2 is a revised and updated edition of *Conducting Agricultural Censuses and Surveys* published by FAO in 1996. The revision is opportune not only in view of the recent publication of the new census programme and methodology but also in view of the substantial changes witnessed in the census technological environment over the last two decades. The availability of digital mobile and more affordable tools for data capture, geo-positioning, remote sensing, imaging, digital

archiving and online dissemination have provided new cost effective alternatives to traditional ways of conducting the agricultural census

*Agriculture in Uganda: Forestry* Joseph K. Mukiibi, 2001 This study describes the nature and composition of Uganda's forest resources and analyses the history progress and prospects of managing and developing forest resources The work is organised into five chapters forest tree genetic resources in Uganda agroforestry the management of natural forests plantation forestry and forest products and their utilisation Full tables of timber tree species classifications are included
