Desde el Desierto - Notas sobre Paramilitares y Violencia en Territorio Wayuu de la Media Guajira ,2007

The Darién Gap Belén Fernández,2025-08-12 The narrow Darién Gap the only land bridge connecting South and Central America encompasses a spectacularly hostile jungle covered in steep mountains dense rainforests and flood prone marshes Known in Spanish as el infierno verde or the green hell it is one of the most inhospitable places in the world Its terrain is too treacherous for roads yet hundreds of thousands of refugee seekers contend with its horrors every year in the hopes of reaching the United States still some three thousand miles away And of the countless who set out for the border an untold number never arrive In this book journalist Belén Fernández visits the Darién Gap to report on the dehumanizing and deadly stretch of land that has become a mass graveyard for migrants Fernández's travels bring her into contact with refugee seekers people smugglers law enforcement officials and many more whose stories bring life to a place overwhelmingly associated with death Combining history on the ground reporting travelogue memoir and searing politico economic analysis she shines light on a largely made in the USA crisis that has come to define our modern era Engrossing and heartrending The Darién Gap is a poignant and compassionate indictment of structural inequality and institutionalized inhumanity in a world where the have nots must risk death for a chance at a better life or any life at all [The Global Challenge of Militias and Paramilitary Violence](#)

Paul Rexton Kan,2019-02-25 This book describes militias as significant and prevalent actors in today's international security environment To separate them from other types of violent non state groups such as terrorists guerrillas and insurgents the author describes militias as local guardians that use violence to fill a variety of political social and security gaps which have created vulnerabilities for their particular constituencies Although militias are local in orientation their effects are not contained to particular countries and have only added to the instability in the international system This book explores how militias contribute to international security issues by furthering state fragility undermining human rights and democratization enabling illicit trafficking prolonging internal conflicts and fostering proxy wars **The Politics of**

Cocaine William L. Marcy,2010-02-01 Drawing on declassified documents and extensive firsthand research The Politics of Cocaine takes a hard look at the role the United States played in creating the drug industry that thrives in Central and South America Author William L Marcy contends that by conflating anti Communist and counternarcotics policies the United States helped establish and strengthen the drug trade as the area's economic base Increased militarization destabilization of governments uncontrollable drug trafficking more violence and higher death tolls resulted Marcy explores how the counternarcotics policies of the 1970s collapsed during the 1980s when economic calamity Andean guerrilla insurgencies and Reagan's anti Communist struggle with Nicaragua and Cuba became conflated as part of the War on Drugs The book then explores how the U S invasion of Panama and narcotics related violence throughout Andean region during the 1990s led to the militarization of the War on Drugs as a way to confront narcotics production narco traffickers and narco guerrillas

alike Marcy brings to the reader up to the end of the George W Bush administration and explains why to this date the United States remains unable to control the flow of cocaine into the United States and why the War on Drugs appears to be spiraling out of control The Politics of Cocaine fills in historical gaps and provides a new and controversial analysis of a complex and seemingly unsolvable problem **Witnessing Peace** Janna L. Hunter-Bowman,2022-07-21 This book rooted in the

disciplines of theology and peace studies reflects with and on war affected communities in Colombia about transitioning from violence to peace It argues that much that is significant for peace building in situations of war escapes the notice of governments human rights organizations and academics because it is accomplished through a kind of agency they do not recognize This book names that agency as constructive agency under duress and demonstrates its significance for peacebuilding by reflecting on a form that the author has seen operating in Colombia over nearly two decades *The*

extensive ethnographic research to provide cutting edge insights The author argues that the key to understanding violence against women lies at the intersection of transnational capital race and gender that not only contribute to its production but also to its persistence The book uses the Colombian armed conflict as the primary case study but develops a broader framework for theorizing the relationship between the global political economy the history of coloniality and intersectional constructions of gender and race with regard to conflict and violence It offers an understanding of violence against women as not isolated from but part and a symptom of a larger system of political social and economic inequality that is rooted in colonialism and exploited and exacerbated by transnational capital relations The author also shows how the state and non state actors most prominently paramilitaries are involved in this relationship of violence The book highlights implications for meaningful and sustainable peace in post conflict contexts This book will be of great interest to students and scholars of international relations gender studies and conflict studies as well as policymakers non governmental organizations and practitioners interested in conflict and security

Purewal, Sophia Dingli, 2020-06-05 Security studies and international relations have conventionally relegated gendered analysis to the margins of academic concern most commonly through the women in or women and politics and IR discourse This comprehensive volume contributes to debates which seek to move feminist scholarship away

from the reification of the war peace and security economy divides By foregrounding the empirical reality of the breakdown of these traditional divisions the authors pay particular attention to frameworks which query their very existence In doing so the collection as a whole troubles the ubiquitous concept and practices of in security and their effects on differentially positioned subjects By gendering in securities in states of exception and other paradigms of government related to it especially in postcolonial and neocolonial contexts the book provides an approach that allows us to study the complex and interrelated security logics which constitute the messy realities of different and particularly vulnerable subjects lives In other words it suggests that these frameworks are ripe for feminist interventions and analysis of the logics and production of in securities as well as of resistance and hybridisation This book was originally published as an online special issue of the journal Third World Thematics Dealing with Wars and Dictatorships Liora Israël,Guillaume Mouralis,2013-12-02

Democratic transitions in Latin America Eastern Europe and South Africa often studied under the conceptual rubric of transitional justice have involved the formation of public policies toward the past that are multifaceted and often ambitious Recent scholarship rarely questions the concepts and categories transposed from one country to another This is true both in the language of political life and in the social sciences examining past oriented public policy especially policy toward ethnic cleansing and the line between the language of political practice legal analysis and scholarly discourse has been quite porous This book examines how these phenomena have been described and understood by focusing recent processes such as the advent of international criminal justice in relation to previous postwar and recent purges By crossing disciplinary approaches and periods the authors pay attention to three main aspects the legal or political concepts used and or the ones mobilized in the academic work the circulation of categories know how and arguments the different levels that can shed light on transitions **Juan N. Cortina and the Struggle for Justice in Texas** Carlos Larralde,2000 **Borderland Battles**
