Aid And Development In Southern Africa Evaluating A Participatory Learning Process:

Aid & Development in Southern Africa Denny Kalyalya, 1988 **Transforming Southern African Agriculture** Ann Willcox Seidman, 1992 *Corruption and Human Development in Africa* Jacques P. Nguemegne, 2011-11-09 This study is to the authors knowledge the first empirical cross country analysis of the relationship between corruption and human development HD in Africa In most African countries the current state of HD is critically poor In spite of two decades of democratization and substantial economic growth or stability corruption has become endemic and tends to adversely affect HD conditions and needs Using a pooled cross section across time design and a sample of 40 African countries over many years 2003 2007 and based on an OLS Analysis this study attempts an empirical examination of the association between corruption and HD in Africa while holding constant economic growth government socioeconomic or welfare expenditures and political system and controlling for some major internal and external economic variables As found corruption adversely affects human development in Africa Overall based on the main study model Model 1 a unit increase in the corruption level CPI on a scale of 1 to 10 will cause a 48 percent decrease in the state of HD HDI The relationship between corruption and HD is however non linear using Model 3 which incorporate a square term of corruption it was found that at and below 4 577 RCPI i e 5 42 normal CPI corruptions is likely to positively affect HD whereas at and above 4 577 RCPI corruption rather tends to adversely affect HD with an increasing return Besides it was also found using Model 2 which incorporates an interaction term of corruption and political system that democratization has deceived scientists theoretical projections and peoples political expectations of the 1990s Democracy has not improved HD in Africa Both non and partly democratic i e authoritarian and democratic political systems adversely affect HD The adverse impact of corruption on HD is even worse in the latter systems After checking for the main effect Model 2 it appears that as corruption increases by one unit HD decreases by 9 48 percent in African countries with authoritarian systems In contrast the same one unit increase in corruption will have an additional 5 23 percent decrease in the HD of African countries with a democratic system This study brings new insights about public policies ineffectiveness and failures to satisfy increasing HD needs in Africa It throws new lights on the relationship existing between economic growth democracy and corruption and HD It suggests some policy reforms which could improve the state of HD in Africa Overall it is an important contribution to the theoretical and empirical body of administrative theory and knowledge Africa After the Cold War Adebayo Oyeade, Abiodun Alao, 1998 Although it is widely recognised that Africa's security problems are acute it has never been a subject of much intellectual inquiry This lack of scholarly discourse on the many dimensions of the problems of African security is the major consideration of this book The approach to the questions of security differ markedly from the traditional approach that gives primacy to the threat of military aggression as sole factor in state security A departure must be made from this dominant preoccupation in a new global order that has seen profound changes *The International Journal of African Historical Studies* , 1991 **African**

Rosalind Eyben,2012-04-27 International aid is about much more than money The UN Millennium Development Goals and major events like Live 8 have focused the world spotlight on issues of poverty relief and aid like never before but have not concentrated on the quality of relationships that can make aid succeed or fail This book authored by an internationally renowned group of aid practitioners reveals the contradictions and challenges involved in forging these relationships International development organizations combine the unbridled play of power and arrogant amnesia with serious and innovative efforts to create a more democratic world to support transformative learning and to strengthen accountability The book explores recent attempts from within aid agencies to go against the current flow of top down results based management by learning how to build lasting partnerships that transfer power to those at the receiving end of aid More than just a critique the authors offer a practical framework for understanding relationships in the international aid system and look at the relevance of organizational learning theory which is widely used in business
