Aids Cult:

Serious Adverse Events Celia Farber, 2023-03-23 Farber a lucid and courageous witness to the power play behind the first scamdemic Her work is journalism at its best solid lucid and humane attacking wrongs that few dare touch and thereby helping right them Mark Crispin Miller bestselling author and professor of media studies at NYU On April 23 1984 in a packed press conference room in Washington DC the secretary of health and human services declared The probable cause of AIDS has been found By the next day probable had fallen away and the novel retrovirus later named HIV became forever lodged in global consciousness as the AIDS virus Celia Farber then an intrepid young reporter for SPIN magazine was the only journalist to question the official narrative and dig into the science of AIDS She reported on the evidence that was being continually cited and repeated by health officials and the press the deadliness of AZT and Dr Fauci's trials on children infants and pregnant mothers Throughout Faber's reportage was largely ignored She was maligned maliciously attacked and ultimately canceled Now forty years after her original reporting Farber's *Serious Adverse Events An Uncensored History of AIDS* is reissued with a new foreword by Mark Crispin Miller shining much needed light on her groundbreaking work once again More relevant than ever this book serves as an essential foundation to understanding its catastrophic sequel COVID 19 *Serious Adverse Events* makes clear that the tactics employed at the height of HIV AIDS the fearmongering cancel culture and woke takeover of science medicine and journalism persist today The response to COVID 19 isn't new it is a well trod and dangerous path in the social landscape Groundbreaking work Bob Guccione Jr founder of SPIN magazine Farber's research give context to the Covid catastrophe which she all but predicted Despite the medical cartel's brutal crusade to silence and vilify her Farber never compromised I'm happy she has lived to experience her own utter vindication I also love her writing style Robert F Kennedy Jr *AIDS Bibliography*, 1994 **Women, Motherhood and Living with HIV/AIDS** Pranee Liamputpong, 2013-03-12 There are about 34 million people worldwide living with HIV AIDS Half are women There has been a dramatic global increase in the rates of women living with HIV AIDS Among young women especially in developing countries infection rates are rapidly increasing Many of these women are also mothers with young infants When a woman is labeled as having HIV she is treated with suspicion and her morality is being questioned Previous research has suggested that women living with HIV AIDS can be affected by delay in diagnosis inferior access to health care services internalized stigma and a poor utilization of health services This makes it extremely difficult for women to take care of their own health needs Women are also reluctant to disclose their HIV positive status as they fear this may result in physical feelings of shame social ostracism violence or expulsion from home Women living with HIV AIDS who are also mothers carry a particularly heavy burden of being HIV infected This unique book attempts to put together results from empirical research and focuses on issues relevant to women motherhood and living with HIV AIDS which have occurred to individual women in different parts of the globe The book comprises chapters written by researchers who carry out their projects in different parts of the world

and each chapter contains empirical information based on real life situations This can be used as evidence for health care providers to implement socially and culturally appropriate services to assist individuals and groups who are living with HIV AIDS in many societies The book is of interest to scholars and students in the domains of anthropology sociology social work nursing public health medicine and health professionals who have a specific interest in issues concerning women who are mothers and living with HIV AIDS from cross cultural perspective

The Medical-Pharmaceutical Killing Machine

Children's Health Defense,2024-11-26 Medical and pharmaceutical history is replete with examples of dangerous interventions that have poisoned injured or killed However events since 2020 have attracted attention as never before to medicine s potential to be both lethal and malevolent In The Medical Pharmaceutical Killing Machine Children s Health Defense situates current perils in their broader context with the aim of helping readers understand how to protect themselves and their loved ones In the Greek Trojan War saga the god Apollo ensured that Cassandra s prophecies would never be believed with disastrous consequences As recounted in the book modern medicine too has produced its fair share of medical Cassandras doctors and writers who have tried to warn the public about medicine s life threatening underbelly generally to little avail A chapter dedicated to nine of these medical skeptics beginning with Ivan Illich and his coining of the term iatrogenesis to describe adverse outcomes caused by doctors weaves a powerful portrait of harms regularly denied and ignored with those making the claims typically marginalized and canceled The book shows that there is no shortage of tools in the killing machine arsenal One chapter highlights the mRNA vaccine technology inaugurated with COVID illustrating how this new mechanism for iatrogenesis is inflicting novel forms of toxicity not all of which are yet understood Another chapter about assisted suicide and euthanasia describes the chilling global proliferation of policies and propaganda promoting those practices for vulnerable populations that include babies children people diagnosed with autism and the mentally ill The book also describes factors that make it possible for the killing machine to continue operating with impunity including the ascendance of an evidence based medicine juggernaut medical gaslighting and a ballooning global enforcement

infrastructure Nor does it shy away from confronting what some now characterize as iatrogenocide a chapter asking Why Do They Do It considers money prestige and control as three possible answers Ultimately it is only by acknowledging the long standing reality of an all too effective medical pharmaceutical killing machine that people can learn to dodge the threats and work toward building a different model that prioritizes life and genuine health

The Sounds of Furious Living

Matthew Kelly,2023-10-13 Four decades have passed since reports of a mysterious gay cancer first appeared in US newspapers In the ensuing years the pandemic that would come to be called AIDS changed the world in innumerable ways It also gave rise to one of the late twentieth century s largest health based empowerment movements Scholars across diverse traditions have documented the rise of the AIDS activist movement chronicling the impassioned echoes of protestors who took to the streets to demand drugs into bodies And yet not all activism creates echoes Included among the ranks of 1980s and 1990s era AIDS

activists were individuals whose expressions of empowerment differed markedly from those demanding open access to mainstream pharmaceutical agents. Largely forgotten today this activist tradition was comprised of individuals who embraced unorthodox approaches for conceptualizing and treating their condition. Rejecting biomedical expertise they shared alternative clinical paradigms created underground networks for distributing unorthodox nostrums and endorsed etiological models that challenged the association between HIV and AIDS. The theatre of their protests was not the streets of New York City's Greenwich Village but rather their bodies. And their language was not the riotous chants of public demonstration but the often invisible embrace of contrarian systems for defining and treating their disease. *The Sounds of Furious Living* seeks to understand the AIDS activist tradition identifying the historical currents out of which it arose. Embracing a patient centered social historical lens it traces historic shifts in popular understanding of health and perceptions of biomedicine through the nineteenth and twentieth centuries to explain the lasting appeal of unorthodox health activism into the modern era. In asking how unorthodox health activism flourished during the twentieth century's last major pandemic Kelly also seeks to inform our understanding of resistance to biomedical authority in the setting of the twenty first century's first major pandemic COVID 19. As a deeply researched portrait of distrust and disenchantment *The Sounds of Furious Living* helps explain the persistence of movements that challenge biomedicine's authority well into a century marked by biomedical innovation while simultaneously posing important questions regarding the meaning and metrics of patient empowerment in clinical practice.

AIDS, Ancestors, and Salvation Peter Knox, 2008 **Kicking the Sacred Cow** James P. Hogan, 2004

Galileo may have been forced to deny that the Earth moves around the Sun but in the end science triumphed. Nowadays science fearlessly pursues truth shining the pure light of reason on the mysteries of the universe. Or does it? As bestselling author James P Hogan demonstrates in this fact filled and thoroughly documented study science has its own roster of hidebound pronouncements which are Not to be Questioned. And those who question them may face a modern day Inquisition. As the author puts it This book is not concerned with cranks or simple die hards who are entitled to their foibles and come as part of life's pattern. Rather it looks at instances of present day orthodoxies tenaciously defending beliefs in the face of what would appear to be verified fact and plain logic or doggedly closing eyes and minds to ideas whose time has surely come. In short where scientific authority seems to be functioning more in the role of religion protecting doctrine and putting down heresy than championing the spirit of the free inquiry that science should be. Among the dogma laden topics he examines are Darwinism global warming the big bang problems with relativity radon and radiation holes in the ozone layer the cause of AIDS and the controversy over Velikovsky. Hogan explains the basics of each controversy with his clear informative style in a book that will be fascinating for anyone with an interest in the frontiers of modern science.
