Aids Drugs And Prevention:

AIDS, Drugs and Prevention Tim Rhodes, 1996 In developing HIV prevention community orientated approaches have emerged within statutory and voluntary sectors and from the communities themselves This book considers the diverse approaches and problems for professional practice *AIDS, Drugs and Prevention* Richard Hartnoll, Tim Rhodes, 2002-03-11 Strong international focus with high profile contributors from the UK US France Spain and the Netherlands Lack of material attempting to evaluate critically health promotion and health service responses particularly with regard to community based interventions among hard to reach populations Richard Hartnoll is Co ordinator of the European Multi City Study of Drug Misuse and Principle Investigator on the Multi City Study of Cocaine Use **The Prevention Pipeline** , 1996-03 HIV Prevention Kenneth H. Mayer, H.F. Pizer, 2009-03-13 HIV AIDS continues to be the pandemic of our times and there has not been a comprehensive medically based AIDS prevention book published in the last 5 years It is estimated that 36 to 45 million people including 2 3 million children already are infected worldwide and an additional 4 7 million more are infected each year There are about 6 000 new infections daily and about 12 million AIDS orphans People receiving AIDS treatments feel well and have no detectable viral load but still can infect others And even when a vaccine is found it will take many years before it can be administered across the developing world Discusses all aspects of AIDS prevention from epidemiology molecular immunology and virology to the principles of broad based public health prevention interventions Special focus on the array of interventions that have been proven effective through rigorous study Identifies new trends in HIV AID epidemiology and their impact on creating and implementing prevention interventions Incorporates virology biology infectious diseases vaccinology microbicides and research methodologies into AIDS prevention Prevention Primer DIANE Publishing Company, 1995-08 Over 60 terms defined Provides a brief history of prevention efforts as well as an overview of the issues principles approaches that work best Topics are listed in alpha order include acronyms AIDS binge drinking children of alcoholics cocaine evaluation federal agencies heroin Hispanic Latino impaired driving marijuana media advocacy older adults parents prevention PCP prevention risk factors social bonding social marketing steroids tobacco violence youth participation etc Each entry includes a list of references *Citizen's Alcohol and Other Drug Prevention Directory* , 1990 Directory of prevention contacts programs and services Arranged under federal agencies national organizations states and territories and clearinghouses resource centers Entries give identification and descriptive information Glossary Assessing AIDS Prevention PACCAUD, VADER, GUTZWILLER, 2012-12-06 In most countries primary prevention programmes against the HIV AIDS epidemic have been implemented Broadly speaking three levels of intervention can be identified national campaigns directed to the general population most of them are multi phase campaigns aimed at providing information about HIV transmission and protective behaviour they use the various mass media channels and are mainly directed to sexual behaviour modification community based interventions addressed to specific target populations these populations have been

typically selected according to both the high risk of infection gay men and prostitutes and the difficulty to reach the members of these communities intravenous drug users individual testing and counselling often supported by public funds or large non governmental organizations Major efforts have been devoted to the development and the implementation of these preventive programmes both in terms of human resources and financial support On the other hand in most countries far less energy has been put into the evaluation of these campaigns This gap is not explained by the fact that evaluation of AIDS HIV campaigns is a totally new challenge in terms of methodology there are classical methods developed over twenty years and used in other fields of prevention Biomedical Index to PHS-supported Research ,1990 *Research Awards Index* ,1989 **NIDA**
