## **Aids Prevention Through Education A World View:**

**AIDS** Jaime Sepúlveda Amor, Harvey V. Fineberg, Jonathan M. Mann, 1992 A decade after AIDS was first recognized the simple idea that education is the most effective weapon to prevent infection remains valid This is true because AIDS will not disappear just as the majority of infectious diseases have not disappeared even those for which effective methods of treatment and prevention already exist Therefore education is not a transitory strategy if and when effective drugs and vaccines are developed education will still play a major role in contending with the epidemic Enough has been learned about AIDS prevention through education during the last decade to merit reflection on both the failures and successes of this short tragic but also intense and vital period The original education models based on fear have been replaced with more optimistic and even humorous campaigns Health promotion has moved to center stage in the global fight against AIDS This book is an effort to collect and organize a wealth of global experience from many experts and to consolidate new information Included among the variety of strategies are discussions of the role of both the print and electronic media in the national fight as well as presentations of international lessons gleaned from community and regional efforts in Brazil Africa Mexico and Europe The book offers the reader a range of views and perspectives from experts in the varied disciplines that make up the very broad field of AIDS education This timely important volume offers AIDS researchers clinicians and educators as well as public health and infectious disease professionals key practical insights for global AIDS prevention The Prevention Marketing Initiative ,1996 *The No-nonsense Guide to HIV/AIDS* Shereen Usdin, 2003 Tells the story so far looking at the origins of the disease the way it spreads and examining the profits made by drug companies women s special vulnerability and the positive action being taken by people and communities to fight back back cover *Using Research For Effective Health Promotion* Oliver, Sandy, Peersman, Greet, 2001-08-01 Well before evidence based practice became fashionable beyond clinical medicine the team at SSRU was telling us what we ought to already know that some interventions work better than others and that that some well meaning attempts at health promotion just like medicine and surgery may do harm This book is a must for policy makers and practitioners who want to make a real difference and understand how research evidence can inform their practice The book will also be an important tool for researchers who will increasingly be using the tools of systematic review if they want to inform and influence those who deliver services Helen Roberts Professor of Child Health City University This book bridges the gap between research and practice in health promotion It advances evidence based health promotion by illustrating how service providers and researchers can change their working practices to benefit the public It addresses the need for health promotion services to be grounded in empirical research and for research to focus on issues important to those delivering as well as those receiving the services *Using Research for Effective Health Promotion* advances the debate about the relative values of qualitative and experimental research in health promotion and encourages an increased participation of service users in the development and evaluation of services It provides health promotion

specialists with time saving tools to draw upon research quickly and critically and is an important resource for students and professionals in fields such as public health nursing education social work and voluntary services Primary Prevention Practices Martin Bloom,1996-03-26 Intended for use by students in the helping professions as well as by practitioners and researchers in the field Primary Prevention Practices offers step by step procedures on how to use more than 50 techniques of prevention practice **Global Research Network Meeting on HIV Prevention in Drug-Using Populations** ,1999

**Persuading People To Have Safer Sex** Richard M. Perloff,2000-11-01 Persuading People to Have Safer Sex offers a lucid in depth student friendly and academically thorough discussion of AIDS prevention and health persuasion In so doing it provides an introduction to the ways that social scientific research can be brought to bear on a daunting health problem Covering many aspects of the AIDS crisis the book introduces readers to the severity of the AIDS problem and explains the epidemiology of the disease It discusses why persuasion is so important explicates cognitive theories of AIDS prevention and notes the role emotions and communication play in safer sex prevention It also discusses functions that unsafe sex plays in peoples lives why people notably minority women frequently choose to engage in unsafe sex and social factors underlying the spread of AIDS in urban America and portions of Africa As a resource for introducing students to the role that theory and research play in health communication and psychology the volume is appropriate for use in communication journalism social psychology and public health courses and will be of value to scholars researchers and all who seek to understand the use of persuasion in changing behavior *The Rise of Global Health* Joshua K. Leon,2015-02-10 Since the year 2000

unprecedented resources have been committed to the complex challenge of developing global public health solutions by national governments multilateral organizations and civil society groups This vast global movement is one of the most remarkable political phenomena of twenty first century international relations but is it working In *The Rise of Global Health* Joshua K Leon argues against the conventional wisdom which argues that collective action on development issues including controversial increases in foreign aid is too inherently inefficient to succeed Leon shows that public action on a global level can successfully pursue health equality Often at the behest of grassroots activists these disparate groups of actors are cooperating more than ever with the aim of improving our human potential through better health Though operating at cross purposes with unequal trade agreements and other factors within the global economy harming the Global South we learn something surprising about global health governance it is evolving in ways more efficient than we think **Prescribing**

**HIV Prevention** Nicola Bulled,2016-06-16 Critical health communication scholars point out that the acceptance of HIV risk prevention methods are bound inside inequitable structures of power and knowledge Nicola Bulled s in depth ethnographic account of how these messages are selected transmitted and reacted to by young adults in the AIDS torn population of Lesotho in southern Africa provides a crucial example of the importance of a culture centered approach to health communication She shows the clash between traditional western perceptions of how increased knowledge will increase

compliance with western ideas of prevention and mixed messages offered by local religious educational and media institutions Bullard also demonstrates how structural and geographical forces prevent the delivery and acceptance of health messages and how local communities shape their own knowledge of health disease and illness This volume will be of interest to medical anthropologists and sociologists to those in health communication and to researchers working on issues related to HIV

*Infectious Ideas* Jennifer Brier, 2009 In *Infectious Ideas* Jennifer Brier argues that the AIDS epidemic had a profound effect on the American political landscape Viewing contemporary history from the perspective of the AIDS crisis she provides rich new understandings of the complex social and political trends of the post 1960s era *Infectious Ideas* places recent social cultural and political events in a new light making an important contribution to our understanding of the United States at the end of the twentieth century
