**Encyclopedia of Gay Histories and Cultures** George Haggerty, 2013-11-05 First Published in 2000 A rich heritage that needs to be documented Beginning in 1869 when the study of homosexuality can be said to have begun with the establishment of sexology this encyclopedia offers accounts of the most important international developments in an area that now occupies a critical place in many fields of academic endeavors It covers a long history and a dynamic and ever changing present while opening up the academic profession to new scholarship and new ways of thinking A groundbreaking new approach While gays and lesbians have shared many aspects of life their histories and cultures developed in profoundly different ways To reflect this crucial fact the encyclopedia has been prepared in two separate volumes assuring that both histories receive full unbiased attention and that a broad range of human experience is covered Written for and by a wide range of people Intended as a reference for students and scholars in all fields as well as for the general public the

encyclopedia is written in user friendly language At the same time it maintains a high level of scholarship that incorporates both passion and objectivity It is written by some of the most famous names in the field as well as new scholars whose research continues to advance gender studies into the future      **The Oxford Handbook of Music Censorship** Patricia Ann Hall,2018 Addresses censorship as a worldwide issue from its earliest recorded form to the modern day Includes unique case studies of music censorship unfamiliar to Western audiences Documents censorship through a necessarily intersectional lens Oxford University Press      **Audible Loss** Andrea Zarafshon Moore,2025-04-01 An innovative and much needed critical work on music and memorialization in relation to AIDS 9 11 and anti Black violence in America Music has long served as a powerful medium for communal mourning and remembrance in times of crisis Audible Loss examines musical responses to three major crises in US society at the turn of the twenty first century the AIDS epidemic the terrorist attacks of September 11 2001 and the ongoing conditions of anti Black violence Analyzing a range of works written to commemorate these losses Andrea Zarafshon Moore explores how contemporary classical music aka new music frames and narrates these crises gives voice to grief imagines other possibilities and makes loss audible These crises are read alongside one another to reveal the ways they are mutually imbricated while also recognizing the sheer commemorative dominance of 9 11 in this century Attending to broader debates and discourses through which commemoration is always filtered and the ways interpretive consensus has been sought and articulated in both musical and other memorial forms Moore probes the conventional claims of commemoration particularly those for the necessity of remembrance to healing and the prevention of future crises Audible Loss concludes by reflecting on the limits of existing commemorative forms and the possibility even necessity of new ones Taking the COVID 19 pandemic as a case study it proposes that while memorials of all kinds may provide outlets for collective remembrance and even mourning their power to forge a sense of collectivity is diminished as public discourse grows more fragmented Deeply informed yet highly approachable Audible Loss is a major contribution to the fields of music and memory studies and essential reading for anyone interested in memory culture in the United States today      Sounding Off: Theorizing Disability in Music Neil Lerner,Joseph Straus,2006-11-06 Disability understood as culturally stigmatized bodily difference including physical and mental impairments of all kinds is a pervasive and permanent aspect of the human condition While the biology of bodily difference is the proper study for science and medicine the meaning that we attach to bodily difference is the proper study of humanists The interdisciplinary field of Disability Studies has recently emerged to theorize social and cultural constructions of the meaning of disability Although there has been an astonishing outpouring of humanistic work in Disability Studies in the past ten years there has been virtually no echo in musicology or music theory Sounding Off Theorizing Disability in Music is the first book length work to focus on the historical and theoretical issues of music as it relates to disability It shows that music like literature and the other arts simultaneously reflects and constructs cultural attitudes toward disability Sounding Off Theorizing Disability in Music promises to be a landmark study for scholars
