Aim Straight A Biography Of Admiral Sir:

Special Bibliographic Series US Army Military History Research Collection, 1978 **The Oxford Illustrated History of the Royal Navy** J. R. Hill, Bryan Ranft, 2002 Throughout its history the Royal Navy has been of great importance for the defense of Britain and has over the centuries entrenched itself in the national psyche making itself manifest not only through the hero worship of its principal characters such as Horatio Nelson and Sir Francis Drake but also finding expression through art music and literature The Oxford Illustrated History of the Royal Navy is the definitive one volume history of the Royal Navy The text has now been updated for this paperback edition to cover more recent events and developments covering every aspect of naval history from the Anglo Saxon period to the dawn of the new millennium including terrorist attacks on New York and Washington and the subsequent retaliation on terrorist bases in Afghanistan With a full chronology which has been brought up to date to the end of 2001 and an extensive list of further reading this highly illustrated reference book gives an authoritative and highly readable account of a unique fighting service and its people God Save the Queen US Army Military History Institute, Lawrence James-Alexander Lentz, 1979 **The Challenges of Command** Robert L. Davison, 2016-04-01 In the period leading up to the First World War Britain's naval supremacy was challenged by an arms race with Germany fuelled not only by military and geo strategic rivalries but an onrush of technological developments As this book demonstrates steam turbines bigger guns mechanical computing devices and ever increasing tonnage meant that the Royal Navy was forced to confront many long cherished beliefs and sensitive social and political issues By looking at key continuities over the period of 1880 1919 the study explores how the service and its officers attempted to deal with fundamental changes in professional requirements and how cultural and social values underwent a transformation in the run up to the First World War In particular the book looks at how the executive officer corps was presented with a revolution in naval affairs As the Navy was transformed into an industrialized workplace officers were challenged by an alteration in the culture of command as arrangements carried over from the days of sail began to breakdown under the practical requirements of a steam and steel fleet The book charts the ebb and flow of the debate and the various ideas put forward to deal with the structural challenges faced by the Royal Navy The writings of reformers and commentators such as Fisher Beresford Corbett Laughton and Mahan provide the background to the specific problems faced and are analysed both in relation to the nature of the reforms implemented and more crucially the performance of the Senior Service during the First World War **A Guide to the Sources of British Military History** Robin Higham, 2015-10-05 Designed to fill an overlooked gap this book originally published in 1972 provides a single unified introduction to bibliographical sources of British military history Moreover it includes guidance in a number of fields in which no similar source is available at all giving information on how to obtain access to special collections and private archives and links military history especially during peacetime with the development of science and technology *Admiral Von Hipper* Tobias R. Philbin, 1982 This work

aims to constitute an objective analysis of a German World War I naval combat commander within his proper context by closely defining both the military technical and military political milieus in which Franz Hipper operated. The description of Hipper's actions in the battles of Dogger Bank and Jutland and his handling of communications, airships and the new technologies of war demonstrate the importance of the military environment. The volume also provides a glimpse into the decision making process involved in the construction of German battle cruisers and the impact these decisions had in combat.

Between Human and Machine David A. Mindell, 2003-04-30 Today we associate the relationship between feedback control and computing with Norbert Wiener's 1948 formulation of cybernetics. But the theoretical and practical foundations for cybernetics, control engineering and digital computing were laid earlier, between the two world wars. In Between Human and Machine: Feedback Control and Computing before Cybernetics David A. Mindell shows how the modern sciences of systems emerged from disparate engineering cultures and their convergence during World War II. Mindell examines four different arenas of control systems research in the United States between the world wars: naval fire control, the Sperry Gyroscope Company, the Bell Telephone Laboratories and Vannevar Bush's laboratory at MIT. Each of these institutional sites had unique technical problems, organizational imperatives and working environments and each fostered a distinct engineering culture. Each also developed technologies to represent the world in a machine. At the beginning of World War II President Roosevelt established the National Defense Research Committee, one division of which was devoted to control systems. Mindell shows how the NDRC brought together representatives from the four pre-war engineering cultures and how its projects synthesized conceptions of control, communications and computing. By the time Wiener articulated his vision, these ideas were already suffusing through engineering. They would profoundly influence the digital world. As a new way to conceptualize the history of computing, this book will be of great interest to historians of science, technology and culture as well as computer scientists and theorists. Between Human and Machine: Feedback Control and Computing before Cybernetics

Night Flight to Dungavel Peter Padfield, 2014-05-06 Until now there has been no satisfactory answer to the question of why in May of 1941 Hitler's deputy Rudolf Hess flew a German fighter plane across the channel to Scotland, crashing at night in a muddy field near Dungavel House. Though Hess had been one of Hitler's closest confidantes, he was immediately denounced as a traitor in Berlin. Imprisoned in England, he was questioned by British MI6 and Churchill himself. The documents he had brought with him were confiscated and have not been made public to this day. Hess was tried at Nuremberg at the war's end and imprisoned at Spandau in Berlin, one of only seven former Nazis held there. The other six were all released, but Hess lingered there alone until his death in 1987, possibly by suicide, possibly not. The official report on Hess has always been that he acted alone, but many historians question this conclusion. In Night Flight to Dungavel, award-winning historian Peter Padfield presents striking new evidence that spurs a wholesale reappraisal of the mystery: what actually happened, what role was played by Churchill and British intelligence and what has been this episode's significance as

a real turning point of the war Expertly woven into a compelling narrative that touches on Nazi sympathizers among the British aristocracy possible British foreknowledge of the final solution and the mysterious circumstances of Hess's death in Spandau prison Night Flight to Dungavel is among the most important and gripping stories of World War Two

Special Bibliography , War Beneath the Sea Peter Padfield, 2008-05-02 Praise for War Beneath the Sea I am truly filled with awe and admiration fascinating and a great contribution to the entire lore of submarines I wish I had written the book Capt Edward L Beach USN Ret author of Run Silent Run Deep Peter Padfield is the best British naval historian of his generation now working His book will now become the standard work on the subject Daily Telegraph London Peter Padfield has produced by far the best and most complete critical history of the submarine operations of all the combatants in the Second World War at the same time providing vivid narrative accounts of particular actions and events Lloyd's List London An excellent account of submarine warfare in 1939-45 it recreates the tribulations and horrors of that especially brutal form of warfare within a sturdily analytical and often critical framework The Economist A marvelously complete and detailed study of World War II submarine warfare an interesting serious and timely book Houston Chronicle A brilliant submarine warfare study Military Review

Analog Superpowers Katherine C. Epstein, 2024-10-01 A gripping history that spans law international affairs and top secret technology to unmask the tension between intellectual property rights and national security At the beginning of the twentieth century two British inventors Arthur Pollen and Harold Isherwood became fascinated by a major military question how to aim the big guns of battleships These warships of enormous geopolitical import before the advent of intercontinental missiles or drones had to shoot in poor light and choppy seas at distant moving targets conditions that impeded accurate gunfire Seeing the need to account for a plethora of variables Pollen and Isherwood built an integrated system for gathering data calculating predictions and transmitting the results to the gunners At the heart of their invention was the most advanced analog computer of the day a technological breakthrough that anticipated the famous Norden bombsight of World War II the inertial guidance systems of nuclear missiles and the networked smart systems that dominate combat today Recognizing the value of Pollen and Isherwood's invention the British Royal Navy and the United States Navy pirated it one after the other When the inventors sued both the British and US governments invoked secrecy citing national security concerns Drawing on a wealth of archival evidence *Analog Superpowers* analyzes these and related legal battles over naval technology exploring how national defense tested the two countries' commitment to individual rights and the free market Katherine C Epstein deftly sets out Pollen's and Isherwood's pioneering achievements the patent questions raised the geopolitical rivalry between Britain and the United States and the legal precedents each country developed to control military tools built by private contractors Epstein's account reveals that long before the US national security state sought to restrict information about atomic energy it was already embroiled in another contest between innovation and secrecy The America portrayed in this sweeping and accessible history isn't yet a global hegemon but a rising

superpower ready to acquire foreign technology by fair means or foul much as it accuses China of doing today Strategy and War Planning in the British Navy, 1887-1918 Shawn T. Grimes, 2012 Overturns existing thinking to show that the Royal Navy engaged professionally in war planning in the years before the First World War It has been widely accepted that British naval war planning from the late nineteenth century to the First World War was amateur and driven by personal political agenda But Shawn T Grimes argues that this was far from the case His extensive original research shows that in fact the Royal Navy had a definitive war strategy which was well thought through and formulated in a professional manner Faced by a perceived Franco Russian naval threat the Admiralty adopted an offensive strategy from 1888 to 1905 based on observational blockade and combined operations This strategy was modified after 1905 for war with Wilhelmine Germany The book shows how specific war plans aimed at Germany's naval and economic assets in the Baltic were drawn up between 1906 and 1908 and that the strategy of primary distant blockade formulated between 1897 and 1907 became a reality in late 1912 and not July 1914 as previously thought The book argues that the Naval Intelligence Department which took a lead in devising these plans was the Navy's de facto staff Overall it is clear that there was a continuity underpinning British thinking about how to wage a naval war SHAWN GRIMES received his PhD in history from the University of London and has been a Lecturer in European History at the University of Saskatchewan *No More Heroes* Charles Owen, 2015-10-05 This book originally published in 1975 and authored by an ex Naval officer assesses the performance and management of the Royal Navy in the twentieth century It examines the nature and tasks of the twentieth century Navy by tracing the fortunes of it under successive First Sea Lords It examines how the higher echelons of the service have altered and how and why naval policy has changed Among other issues the book discusses the actions of Beresford and Fisher Beatty and Jellicoe Chatfield Pound and Mountbatten It appraises Churchill the Invergordon Mutiny and the strains of the 1930s discusses the Navy's role in two World Wars and post war disarmament Preparing for Blockade 1885-1914 Stephen Cobb, 2016-04-08 Today the First World War is remembered chiefly for the carnage of the Western Front but at the time the Royal Navy's blockade of Germany was a more frequent source of debate For even at a time of war there were influential voices in Britain who balked at a concept of economic warfare that hindered the free passage of goods on the high seas and brought German society to the brink of famine To further our understanding of these issues this book looks at the background to the blockade and the effects of its implementation in 1914 It argues that there was a widely shared but largely unwritten strategic culture within British naval circles which accepted that in a war with a major maritime power the British response would be to attack enemy trade This is demonstrated by the fact that from at least the late 1880s the Royal Navy planned for the use of armed merchantmen to enforce an economic blockade of an enemy This it did by entering into detailed arrangements with major British shipping companies for the design and subsidy of liners with the potential for use as merchant cruisers and stockpiling their prospective armament In line with the contemporary Corbettian view that seapower depends upon free

communications the book concludes by asserting that the primary role of the Grand Fleet in the First World War was to guarantee the ability of the merchant cruisers on the Northern Patrol to interdict German seaborne trade rather than to engage in large set piece battles

Sailor-Scholar Barry D. Hunt, 2006-01-01 Admiral Sir Herbert Richmond was a unique phenomenon in the Victorian Edwardian navy a professionally competent and successful officer who was also an intellectual writes the author This was enough to ensure that his progress would be stormy This thoroughly documented biographical study of Richmond s professional career reveals a fully experienced clear thinking officer with a profound understanding of naval history a restless and uncompromising personality and a passionate concern with naval strategy the art of war and the most effective training programme for officers Richmond persistently challenged the accepted practices and prejudices of the naval profession He and his small group of disciples the Young Turks found themselves in the thick of the most crucial controversies in the British Navy In spite of frequent official displeasure however Richmond became an influential naval historian and educator responsible for the creation of the modern naval staff and the Imperial Defence College The volume rests on extensive research in the official records and the private papers of Richmond and his close associates It will interest not only naval historians but also those with a general interest in the impact of one man s thought and actions on Britain s defence policy and the outcome of two World Wars

From the Dreadnought to Scapa Flow Arthur J Marder, 2014-06-13 The five volumes that constitute Arthur Marder s From the Dreadnought to Scapa Flow represented arguably the finest contribution to the literature of naval history since Alfred Mahan A J P Taylor wrote that his naval history has a unique fascination To unrivalled mastery of sources he adds a gift of simple narrative He is beyond praise as he is beyond cavil The five volumes were subtitled The Royal Navy in the Fisher Era 1904 1919 and they are still despite recent major contributions from Robert Massie and Andrew Gordon regarded by many as the definitive history of naval events leading up to and including the Great War This last volume describes the Royal Navy s final triumph The convoy system brought rewards and the US Navy arrived in European waters The striking 1918 raid on Zeebrugge was a big morale booster and in November 1918 Beatty received the surrender of the German High Seas Fleet In June the following year the Germans scuttled their fleet at Scapa Flow and so came to an end a major era in naval history A new introduction by Barry Gough the distinguished Canadian maritime and naval historian assesses the importance of Marder s work and anchors it firmly amongst the great naval narrative histories of this era This new paperback edition will bring a truly great work to a new generation of historians and general readers

Information Systems: Failure Analysis John A. Wise, Anthony Debons, 2012-12-06 Although system analysis is a well established methodology the specific application of such analysis to information systems is a relatively new endeavor Indeed it may be said to be still in the trial and error stage In recent years such analysis has been given impetus by the numerous accounts of information system failures some of which have led to serious consequences e g the accident at Three Mile Island the chemical spills at Bhopal India and at Institute West Virginia and the loss of the space

shuttle Challenger Analysis of the failure of the W T Grant Company the third largest retail organization in the United States indicated that improper use of the available information was a significant factor in that failure In spite of these incidents and their widespread impact only meager attempts have been made to develop an effective methodology for analyzing the information systems involved in such incidents There have been no well developed guidelines for determining the causes of such events and for recommending solutions so that similar failures could be avoided To address the need for such a methodology the North Atlantic Treaty Organization NATO sponsored an Advanced Research Workshop attended by a group of 32 scientists scholars and expert investigators representing a variety of disciplines and countries Air University Library Index to Military Periodicals ,1965 British Military Operations in Egypt and the Sudan Harold E. Raugh Jr.,2008-05-02 The British Army s campaigns in Egypt and the Sudan from 1882 to 1899 were among the most dramatic and hard fought in British military history In 1882 the British sent an expeditionary force to Egypt to quell the Arabic Revolt and secure British control of the Suez Canal its lifeline to India The enigmatic British Major General Charles G Gordon was sent to the Sudan in 1884 to study the possibility of evacuating Egyptian garrisons threatened by Muslim fanatics the dervishes in the Sudan While the dervishes defeated the British forces on a number of occasions the British eventually learned to combat the insurrection and ultimately largely through superior technology and firepower vanquished the insurgents in 1898 British Operations in Egypt and the Sudan A Selected Bibliography enumerates and generally describes and annotates hundreds of contemporary current and hard to find books journal articles government documents and personal papers on all aspects of British military operations in Egypt and the Sudan from 1882 to 1899 Arranged chronologically and topically chapters cover the various campaigns focusing on specific battles leading military personalities and the contributions of imperial nations as well as supporting services of the British Army This definitive volume is an indispensable reference for researching imperialism colonial history and British military operations leadership and tactics **Charlie B: a Biography of Admiral Lord Beresford of Metemmeh and Curraghmore, G.C.B., G.C.V.O., LL.D., D.C.L.** Geoffrey Martin Bennett,1968
