Aims Of Education Restated:

The Aims of Education Restated (International Library of the Philosophy of Education Volume 22) John White, 2012-07-27 John White's study is the most substantial work on what the aims of education should be since Whitehead's *Aims of Education* of 1929. It draws on material not only from schools and colleges but also from the broader educative or miseducative nature of the ethos of society and some of its major institutions. Sifting the different views about aims which are now prevalent and circulating in the world of education, he integrates the more defensible of them into an articulated set of positive recommendations. The study takes a broadly philosophical and non-technical stance; it is written to help practitioners orient themselves in what is often bewildering territory at a time when the question of what the aims of education ought to be has acquired a new urgency for politicians and educational administrators as well as for those directly involved in educational institutions: head teachers and their staff. *The Aims of Education Restated* John White, 1982 [The Aims of Education](#) Roger Marples, 2012-10-12 Here international philosophers of education explore and question diverse strains of the liberal tradition, discussing not only autonomy but other key issues such as social justice, national identity, curriculum, critical thinking, social practices. The contributors write from a variety of standpoints, offering many interpretations of what liberalism might mean in educational terms. [Foundations of Education](#) Matthew Bruce Etherington, 2014-06-20 Ideas about education have consequences. This book, edited by Matthew Etherington, provides readers with ideas and insights drawn from fifteen international scholars in Christian thought within the fields of philosophy, theology, and education. Each author responds to the philosophical, historical, and sociological challenges that confront their particular line of educational inquiry. The authors offer a view of Christian education that promotes truth, human dignity, peace, love, diversity, and justice. The book critically analyzes public discourse on education, including the wisdom, actions, recommendations, and controversies of Christian education in the twenty-first century. This timely book will appeal to those concerned with Christian perspectives on education: Aboriginality, gender, history, evangelism, secularism, constructivism, purpose, hope, school choice, and community. [Pedagogy, Praxis and Purpose in Education](#) C.M. Mulcahy, D.E. Mulcahy, D.G. Mulcahy, 2014-12-05 Recent years have shown the growth of federal legislation and programs having a profound impact on educational policy and practice, and a decline in reliance on broadly based educational justifications. Paralleling this development has been the emergence of well-endowed and influential private foundations and an increase in corporate influence in shaping policy. In this volume, the authors consider the discourse, rhetoric, and underlying values that sustain these developments alongside those that underlie more longstanding and competing educational theories and practices. This volume highlights the importance of recognizing opposing conceptualizations of education, some more educationally productive than others, and their core values, approaches to student learning, strengths and weaknesses, and justification. The authors analyze and critique what Jane Roland Martin has referred to as the deep structure of educational thought and seek improved educational policy and practice with particular

reference to curriculum and pedagogy It features a comparative analysis of competing discourses including autocratic control limited personal development and praxis
