United States Army Aviation Digest ,1991 RAF Harrier Ground Attack: Falklands Jerry Pook, 2008-06-15 An interesting and highly informative personal memoir a much needed addition to the body of work covering the air war over the Falklands IPMS USA During the Falklands War Jerry Pook a pilot in No 1 F Squadron RAF flew air interdiction armed recon close air support and airfield attack as well as pure photo recon missions Most weapons were delivered from extreme low level attacks because of the lack of navigation aids and in the absence of Smart weapons The only way he could achieve results was to get low down and close in to the targets and if necessary carry out re attacks to destroy high value targets Apart from brief carrier trials carried out many years previously there had been no RAF Harriers deployed at sea The RAF pilots were treated with ill disguised contempt by their naval masters their professional opinions ignored in spite of the fact that the RN knew next to nothing about ground attack and recon operations Very soon after starting operations from the aircraft carrier HMS Hermes the squadron realized that they were considered as more or less expendable ordnance The Harriers lacked the most basic self protection aids and were up against 10 000 well armed troops who put up an impressive weight of fire whenever attacked Prior to this book very little had been written in detail describing the RAF Harrier GR3 operations during the 1982 Falklands War This book fills that void very well providing a wealth of detail in describing the lead up deployment and day to day combat operations of the small contingent of Royal Air Force attack Harriers IPMS USA

The Air Force Way of War Brian D. Laslie, 2015-06-23 On December 18 1972 more than one hundred U S B 52 bombers flew over North Vietnam to initiate Operation Linebacker II During the next eleven days sixteen of these planes were shot down and another four suffered heavy damage These losses soon proved so devastating that Strategic Air Command was ordered to halt the bombing The U S Air Force's poor performance in this and other operations during Vietnam was partly due to the fact that they had trained their pilots according to methods devised during World War II and the Korean War when strategic bombers attacking targets were expected to take heavy losses Warfare had changed by the 1960s but the USAF had not adapted Between 1972 and 1991 however the Air Force dramatically changed its doctrines and began to overhaul the way it trained pilots through the introduction of a groundbreaking new training program called Red Flag In The Air Force Way of War Brian D Laslie examines the revolution in pilot instruction that Red Flag brought about after Vietnam The program's new instruction methods were dubbed realistic because they prepared pilots for real life situations better than the simple cockpit simulations of the past and students gained proficiency on primary and secondary missions instead of superficially training for numerous possible scenarios In addition to discussing the program's methods Laslie analyzes the way its graduates actually functioned in combat during the 1980s and 90s in places such as Grenada Panama Libya and Iraq Military historians have traditionally emphasized the primacy of technological developments during this period and have overlooked the vital importance of advances in training but Laslie's unprecedented study of Red Flag addresses this oversight through its examination of the seminal program
