Atmospheric Air Pollution and Its Environmental and Health Effects Qiyuan Wang,Siwatt Pongpiachan,Jianhuai Ye,Hongmei Xu,Lang Liu,Qian Zhang,2022-11-04 Ecological Genetics and Air Pollution George E. Jr. Taylor,Louis F. Pitelka,Michael T. Clegg,2012-12-06 Human activities influence the chemical and physical properties of the atmosphere examples are increases in troposphere concentrations of ozone carbon dioxide oxides of nitrogen and sulfur heavy metals and UV B radiation Many of these changes can alter the physiological status of terrestrial vegetation through either inhibition or enhancement of growth and reproduction thereby influencing the ability of sensitive plants to compete for limited resources As a result air pollution stress may be changing the genetic structure of plant populations In this book leading researchers with a broad interdisciplinary range of expertise discuss the known and measurable effects of pollution on terrestrial vegetation within the framework of ecological genetics as well as suitable experimental methodologies to analyze the often novel or unusual effects of such environmental stresses For environmental researchers and managers Ecological Genetics and Air Pollution will be a welcomed introduction to this field of growing importance for long term ecological studies

Evolutionary Conservation Biology Régis Ferrière,Ulf Dieckmann,Denis Couvet,2004-06-10 As anthropogenic environmental changes spread and intensify across the planet conservation biologists have to analyze dynamics at large spatial and temporal scales Ecological and evolutionary processes are then closely intertwined In particular evolutionary responses to anthropogenic environmental change can be so fast and pronounced that conservation biology can no longer afford to ignore them To tackle this challenge areas of conservation biology that are disparate ought to be integrated into a unified framework Bringing together conservation genetics demography and ecology this book introduces evolutionary conservation biology as an integrative approach to managing species in conjunction with ecological interactions and evolutionary processes Which characteristics of species and which features of environmental change foster or hinder evolutionary responses in ecological systems How do such responses affect population viability community dynamics and ecosystem functioning Under which conditions will evolutionary responses ameliorate rather than worsen the impact of environmental change **Effects of Pollution on Health** Lucien Marie Le Cam,Jerzy Neyman,Elizabeth L.
