recent technological advances only enhance the military denial mechanism In his appendix Pape categorizes the Italian case as another case of successful military denial This study examines the collapse of Italy in 1943 and the contribution of air power to this collapse Several broad works often citing Ernest May in *Lessons from the Past* claim that air power decisively caused the Italian surrender but do not indisputably argue this point nor do they define the coercive mechanism s air power employed to achieve this result Studies such as the U S Strategic Bombing Survey or the British Bombing Survey Unit largely ignore Italy or in the case of F W Deakin s *The Brutal Friendship* cite the coalition politics as the primary cause of Italy s surrender In an era of clean conflict both painless and quick leaders and airman downplay the psychological effects of air power with the exception of the questionable negative effects of casualties on the democracies Operation DESERT STORM typifies both these effects Furthermore attrition based computer wargame simulations largely ignore the human element The collapse of Italy serves as one example where the psychological effects of air power outweighed the physical damage caused by bombing *Quarterly Review of Military Literature* ,1939 **Review of Current Military Literature** ,1929
