 Alexander, 2019-01-14 How did Hawaiian and Polynesian culture come to dramatically alter American music fashion and

 19th century rose dramatically as millions shipped to Hawaii during the Pacific War then made big leap with the advent of
 low cost air travel By the end of the 1950s mainlanders were hosting tiki parties listening to exotic music lazing on rattan

Presidents and the Militarization of Space, 1946-1967 Sean N. Kalic, 2012-05-02 In the clash of ideologies represented by the
 Cold War even the heavens were not immune to militarization Satellites and space programs became critical elements among
 the national security objectives of both the United States and the Soviet Union According to US Presidents and the
 Militarization of Space 1946 1967 three American presidents in succession shared a fundamental objective of preserving
 space as a weapons free frontier for the benefit of all humanity Between 1953 and 1967 Presidents Eisenhower Kennedy and
 Johnson all saw nonaggressive military satellite development as well as the civilian space program as means to favorably
 shape the international community's opinion of the scientific technological and military capabilities of the United States Sean
 N Kalic's reinterpretation of the development of US space policy based on documents declassified in the past decade
 demonstrates that a single vision for the appropriate uses of space characterized American strategies across parties and
 administrations during this period Significantly Kalic's findings contradict the popular opinion that the United States sought
 to weaponize space and calls into question the traditional interpretation of the space race as a simple action reaction

paradigm Indeed beyond serving as a symbol and ambassador of US technological capability its satellite program provided the United States with advanced nonaggressive military intelligence gathering platforms that proved critical in assessing the strategic nuclear balance between the United States and the Soviet Union It also aided the three administrations in countering the Soviet Union s increasing international prestige after its series of space firsts beginning with the launch of Sputnik in 1957 Flight Patterns Roger E. Bilstein, Roger Bilstein, 2008-12-01 From 1918 to 1929 American aviation progressed through the pioneering era establishing the pattern of its impact on national security commerce and industry communication travel geography and international relations In America as well as on a global basis society experienced a dramatic transformation from a two dimensional world to a three dimensional one By 1929 aviation was poised at the threshold of a new epoch Covering both military and civil aviation trends Roger Bilstein s study highlights these developments explaining how the pattern of aviation activities in the 1920s is reflected through succeeding decades At the same time the author discusses the social economic and political ramifications of this robust new technology Aviation histories usually pay little attention to aeronautical images as an aspect of popular culture Thoughtful observers of the 1920s such as Stuart Chase and Heywood Broun considered aircraft to be an encouraging example of the new technology workmanlike efficient and graceful perhaps representing a new spirit of international good will Flight Patterns is particularly useful for its discussion of both economic and cultural factors treating them as integrated elements of the evolving air age
