Sinds de late jaren negentig is er een toenemende academische belangstelling voor zogenoemde gebruiksfilms films die bedoeld zijn om te informeren te trainen of onderwijzen of te overtuigen van het nut van een service of product Onderzoek richtte zich tot nu toe in de meeste gevallen vooral op de productie of distributiegeschiedenis van dergelijke films of hun pedagogische effect Minder aandacht is er voor de tekstuele dimensie van deze films de middelen die worden ingezet ter onderbouwing van hun informatieve educatieve of commerciële argument Intussen hebben gebruiksfilms echter nog steeds het imago van een zeer formulair genre Eef Masson nuanceert dit beeld in haar boek en stelt een methodologie voor die de aandacht vestigt op de retorische diversiteit van deze films

The Fifth Reader Marcius Willson,1861 *UNDERESTIMATED* DAVID KABITHE, MD ,2024-12-27 A smart kid but unaware of it Daudi was a black preteen boy growing up in the American Midwest in the late 1970s He was also the first born son of African immigrants He struggled academically and soon found himself in remedial reading in the Toledo public school system His parents like most African immigrant parents had high academic expectations of their son but Daudi just couldn't seem to measure up in part because of his unrecognized ADHD They tried everything they could think of to help their son flourish in school so they placed him in a nearly all white private Catholic school even though they were Baptist That didn't seem to help Things only got worse for Daudi when his parents decided to move the family to Kenya his ancestral home Shortly after the move he performed so poorly in the required mathematics entrance test that he was denied admission into the public school near their new home and where his three younger siblings would attend It didn't look like Daudi would ever become a successful student let alone a surgeon back in America Underestimated is a personal memoir about self discovery and an academic turnaround It's about overcoming adversity finding one's true calling and making a meaningful impact against the odds

Language, Literacy, and Learning in Educational Practice Barry Stierer, Janet Maybin, 1994 Language and literacy are highly contested areas of the curriculum Questions of what should be taught how it should be taught and who should control such decisions are increasingly subjected to public scrutiny debate and challenge in a manner which is often more reflection of competing social and political values than of theory and research evidence In recent years there has been a rapid development of new conceptual frameworks for understanding language literacy and learning from such diverse fields as anthropology cultural studies social psychology and critical linguistics The papers in this collection have been chosen because they will help readers to consider ways in which these new developments in theory and research may be applied to everyday practice
