Air Pollution In The Ural Mountains Environmental Health And Policy Aspects:

   Air Pollution in the Ural Mountains Igor Linkov,Richard Wilson,1998 The metals industry was established in the Ural Mountains over two centuries ago Seventy years ago the town of Magnitogorsk was established with US and Western assistance to exploit the iron ore there It became a symbol of USSR industry and is now a symbol of air pollution This volume describes the pollution in the region and the steps being taken to combat it   **Air Pollution in the Ural Mountains** Igor Linkov,R. Wilson,2012-12-06 Mankind has created pollution and has suffered its consequences since time immemorial This has intesified greatly since the industrial revolution One of the main problems in society and a major function of government is how to cope with this pollution 80 years ago the maxim used to be the solution to pollution is dilution to dilute any pollted water supply in a large river or to build a tall chimney stack to dilute air pollutants into the air so that concentrations of pollutants are always low Since 1950 western countries have gone further and made major attempts to reduce the emissions of the most important pollutants The discussion of what is an important pollutant has changed To S02 and heavy metals such as cadmium or arsenic we now add fine particles and even when we discuss global climate change C02 The experience and practice of the western countries was only partly followed in the USSR although the switch from use of coal to natural gas in major cities around 1970 was very important Since the collapse of the USSR it has become fashionable both in the west and inside Russia to blame all society s ills on pollution The statistics do not bear out that conclusion but pollution remains an important issue which can be reduced without significant detriment to other societal values   **Radionuclides and Heavy Metals in Environment** Marina Marinova,Vladimir P. Perelygin,Peter Vater,2012-12-06 This volume entitled Radionuclides and Heavy Metals in Environment contains the Proceedings of the NATO Advanced Research Workshop ARW Monitoring of Natural and Man Made Radionuclides and Heavy Metal Waste in Environment that was held at the Joint Institute for Nuclear Research JlNR Dubna Russia from 3 October to 6 October 2000 Originally it was planned to held the ARW in 1999 the year when NATO was celebrating its 50th anniversary Few days before opening it had to be postponed because of problems in issuing visa for all the colleagues who intended to participate The ARW was organized and conducted by the co directors Prof Vladimir P Perelygin Joint Institute for Nuclear Research Dubna Russia and Dr Peter Vater Philipps Universitat Marburg Germany The JlNR was chosen as the host institute of ARW because of the lack of contact and real co operation between the former Soviet Union FSU countries specialists in ecology and their Western well experienced colleagues The selection of this location and supplementary funds provided by Russian Foundation on Basic Research Moscow Russia and the JINR Dubna Russia made it possible to attain a rather large number of participants and observers from FSU countries The JlNR provided to all the participants of the workshop an effective car minibus transportation Moscow Dubna Moscow and a rather good accommodation in Dubna   **Urban Air Quality: Measurement, Modelling and Management** Ranjeet S.
