it better *Fundamentals of Electric Aircraft* Pascal Thalin, Ravi Rajamani, Jean-Charles Mare, Sven Taubert, 2018-12-18
Fundamentals of Electric Aircraft was developed to explain what the electric aircraft stands for by offering an objective view of what can be expected from the giant strides in innovative architectures and technologies enabling aircraft electrification. Through tangible case studies a deep insight is provided into this paradigm shift cutting across various aircraft segments from General Aviation to Large Aircraft. Addressing design constraints and timelines foreseen to reach acceptable performance and maturity levels *Fundamentals of Electric Aircraft* puts forward a general view of the progress made to date and what to expect in the years to come. Drawing from the expertise of four industry veterans Pascal Thalin, editor Ravi Rajamani, Jean Charles Mare and Sven Taubert, contributors it addresses futuristic approaches but does not depart too far from the operational down to earth realities of everyday business. *Fundamentals of Electric Aircraft* also offers analyses on how performance enhancements and fuel burn savings may bring more value for money as long as new electric technologies deliver on their promises.

Airways, 2008 Strategy and Management of Industrial Brands Philippe Malaval, Christophe Bénaroya, 2001
Strategy and Management of Industrial Brands is the first book devoted to business to business products and services. Looking at numerous companies, this book defines two brand objectives that are specific to the industrial and service sectors and which must be added to the traditional functions of branding: the minimization of risk as perceived by buyers and the facilitation of the customer company's performance by the supplier brand. Different ways of classifying brands are suggested, providing a better understanding of brand strategies adopted by business to business companies as well as new concepts such as brand printability, visibility and purchaseability. Five major brand categories are dealt with in separate chapters: entering goods brands, intermediary equipment goods brands, equipment goods brands, business to business service brands, and industrial distributor brands. From a practical point of view, the aim of the book is to address the main concerns of managers: How to create and protect brand? What type of visual identity is appropriate? How to manage international brands? An analysis of 1 500 industrial brands as we

Economics of the U.S. Commercial Airline Industry: Productivity, Technology and Deregulation Ivan L. Pitt, John Randolph Norsworthy, 2012-12-06
Economics of the U S Commercial Airline Industry: Productivity, Technology and Deregulation illustrates the impact of upstream technological

change in capital goods aircraft and aircraft engines on demand productivity and cost reduction in the U S airline industry for the years 1970 1992 The aim is to separate supply side technology push from demand pull in determining investment in aircraft in the US airline industry The focus of inquiry in this study is at the company level so the measures are sensitive to company differences such as financial costs payload and existing aircraft inventory rather than industry averages This monograph builds on the new developments in econometric modeling and has a substantial technical component The quantitative results lead to implications for understanding technology and its impact on the airline industry as well as for formulating regulatory policy

RAF Fighters Before the Storm Martin Derry, 2024-07-30 When the First World War ended the then recently established Royal Air Force was awash with aircraft of all descriptions More surprising perhaps was the fact that despite an ongoing cull of obsolescing types on the last day of 1919 the RAF still possessed 9 122 non obsolete aircraft with a further 1 100 more assigned to the Fleet Air Arm while the famous SE 5A and Sopwith Camel had by this time largely been consigned to history the RAF possessed no less than 1 860 Sopwith Snipes which from 1920 would become the RAF s standard single seat fighter for years to come Other core types on charge on 31 December 1919 included some 1 650 Bristol F 2B fighters and 1 250 de Havilland DH 9As which together with the Snipe accounted for over fifty per cent of the RAF s inventory at that time Avro 504 training aircraft accounted for a further 2 700 airframes In this Flight Craft Special the authors provide a detailed and informative pictorial history of those scout fighter aircraft that served in an operational capacity with the RAF from January 1920 until the last day of 1939 a period in which Britain once again moved from an era of peace to war with an old enemy albeit this time Hitler s totalitarian National Socialist Germany as opposed to the Imperial Germany of old As well as covering each of the fighter types used during the inter war period and featuring most of the squadrons the photographs themselves convey the sense of the technical advances that rapidly took root within Britain s aero industries from the mid 1930s onwards moving from the brightly marked overall silver wood and linen biplanes to the dull camouflaged metal skinned monoplanes The progression of machine gun development from the Lewis and Vickers of the First World War to the later Browning is covered spanning the days of the biplanes two fixed synchronised Lewis or Vickers 303 inch machine guns mounted in the forward fuselage to eight wing mounted 303 inch Browning machine guns in the new monoplane fighters There is also a small but fascinating section on the monoplane also runs the monoplane fighters that were designed and had prototypes built but failed to reach the finishing post

London's Buses, 1979-1994 Andrew Bartlett,2022-03-10 In 1979 fresh from its general election victory the Conservative government began formulating plans to deregulate bus services and privatise the companies operating them in England Scotland and Wales London was not to be excluded so from the outset London Buses was broken up into several areas and from 1985 a tendering system was introduced which permitted other operators to bid for the routes Opposition

from the Labour group at the Greater London Council had to be dealt with eventually achieved by abolishing it in 1986 However as each subsequent year passed promises that deregulation was coming were not met In late 1992 the privatisation timetable was set and was ultimately completed at the end of 1994 The issue of deregulation never resurfaced Copiously illustrated with over 270 photographs virtually all of which are being published for the first time this is the story of London Buses over those sixteen tumultuous years To give greater context to the narrative annual vehicle acquisition listings show how purchasing policy changed over the period important route changes tendering gains and losses and a fleet list for the entire period are also included
