Agency and Consciousness in Discourse Paul J. Thibault, 2004 *Agency and Consciousness in Discourse* Paul Thibault, 2004-12-01 In the past two decades there has been considerable interest in the ways in which subjects are positioned in discursive practice This interest has entailed a focus on the role of language and discourse in the processes in and through which subjects are constituted in discourse However questions of agency and how it relates to consciousness have received less attention This book explores the ways in which agency and consciousness are created through transactions between self and other The book argues that it is necessary to regard body brain interactions in the context of the social and discursive practices which act upon human bodies These issues of agency and individuation are explored in relation to infant semiosis as well as in relation to children s symbolic play Thibault looks at the importance of the self referential moral conscience in relation to the interpersonal dimension of all acts of meaning making This conscience is also connected to the development of a self referential viewpoint which the book argues is connected to the ecosocial semiotic systems of thinking about consciousness as a complex system operating on many different levels The author discusses and evaluates the work of linguists psychologists biologists semioticians and sociologists such as Basil Bernstein Mikhail Bakhtin J J Gibson M A K Halliday Walter Kauffman Lakoff Johnson Jay Lemke Jean Piaget and Stanley Salthe to develop a new theory of agency and consciousness

necessarily aligned with other emancipatory movements
