Agent Orange Collateral Damage In Vietnam:

Agent Orange Philip Jones Griffiths, 2003 In these pages are the Vietnamese and Cambodians that the American tourist never see never hear about Here are the results of the US spraying Agent Orange over these countries Never has its effects on humans been so clearly shown as in this book by Philip Jones Griffiths one of the great photographers of the war who feels we should see what Agent Orange has done It is almost unbearable but to turn away and not see the photographs is to compound the crime *A Doctor's Vietnam Journal* Carl E. Bartecchi, 2006 *Agent Orange: The Cleanup Begins* John Stapleton, 2013-05-22 Thirty seven years after the end of the Vietnam War an historic event occurred at busy Da Nang Airport an Agent Orange hot spot where tonnes of the infamous herbicide were decanted and reloaded on to cargo planes for spraying across the country's lush fields and forests Dioxin the accidental contaminant in Agent Orange responsible for many tens of thousands of birth defects and early deaths is regarded as probably the most poisonous of all the compounds ever devised by man This 10 000 word page primer records the events which lead up to the year when the wrongs of the past were finally addressed in joint efforts by the American and Vietnamese governments This short book is the perfect way to bring yourself up to date on this vexed and long running issue **American Culture in the 1960s** Sharon Monteith, 2008-10-08 This book charts the changing complexion of American culture in one of the most culturally vibrant of twentieth century decades It provides a vivid account of the major cultural forms of 1960s America music and performance film and television fiction and poetry art and photography as well as influential texts trends and figures of the decade from Norman Mailer to Susan Sontag from Muhammad Ali's anti war protests to Tom Lehrer's stand up comedy from Bob Dylan to Rachel Carson and from Pop Art to photojournalism A chapter on new social movements demonstrates that a current of conservatism runs through even the most revolutionary movements of the 1960s and the book as a whole looks to the West and especially to the South in the making of the sixties as myth and as history *Taking Southeast Asia to Market* Joseph Nevins, Nancy Lee Peluso, 2018-09-05 Recent changes in the global economy and in Southeast Asian national political economies have led to new forms of commodity production and new commodities Using insights from political economy and commodity studies the essays in *Taking Southeast Asia to Market* trace the myriad ways recent alignments among producers distributors and consumers are affecting people and nature throughout the region In case studies ranging from coffee and hardwood products to mushroom pickers and Vietnamese factory workers the authors detail the Southeast Asian articulations of these processes while also discussing the broader implications of these shifts Taken together the cases show how commodities illuminate the convergence of changing social forces in Southeast Asia today as they transform the terms practices and experiences of everyday life and politics in the global economy **Afterimages** Liam Kennedy, 2016-03 Liam Kennedy here takes as his focus the ways in which selected photographers have sought to frame the activities and effects of American foreign policy often with a critical perspective and how their work engages the dynamics of power and knowledge

that attend the American worldview What is at issue in this book is understanding relations between the geopolitical conditions of visibility and the particulars of the image Conditions of visibility for Kennedy are the ideologies that determine certain ways of seeing that support actions and representations which establish in visibilities and which police the relationship between seeing and believing the American worldview The individual photographers whose work Kennedy so insightfully dissects are those who have pushed the boundaries of photographic practice and who reflect critically on the contexts and scenery of war Larry Burrows and Philip Jones Griffiths in Vietnam Gilles Peress covering the Iranian Revolution Susan Meiselas in El Salvador and Nicaragua Ron Haviv and Gary Knight in the Balkans Ashley Gilbertson and Chris Hondros in Iraq and Tim Hetherington and Lynsey Addario in Afghanistan These individuals expanded the conception and technical repertoire of photojournalism receiving critical acclaim provoking public and professional controversy and often incurring great personal cost to themselves Afterimages presents us with a revisionary understanding of the art of conflict photography The images are often searing they sometimes demonize and dehumanize the enemy but also humanize friend or victim a focus on the human roots the range of feeling in such imagery from horror to pity Why Agent Orange Still Matters?

Ngocnga T. Nguyen, 2005 **Visual Environmental Communication** Anders Hansen, David Machin, 2016-03-17 In 2008 the editors published a well cited journal paper arguing that while scholarly work on media representations of environmental issues had made substantial progress in textual analysis there had been much less work on visual representations This is surprising given the increasingly visual nature of media and communication and in light of emerging evidence that the environment is visualized through the use of increasingly symbolic and iconic images Addressing these matters this volume marks out the present state of the field and contains chapters that represent fresh and exciting high quality scholarly work now emerging on visual environmental communication These include a range of fascinating and often alarming topics which draw on a variety of methods and forms of visual communication The book demonstrates that research needs to think much more widely about what we mean by the visual which plays a massive yet under researched role in the politics and ideology of public understanding and misunderstanding of and the environment and environmental problems The book is of relevance to students and researchers in media and communication studies cultural studies film and visual studies geography sociology politics and other disciplines with an interest in the politics of visual environmental communication This book was published as a special issue of *Environmental Communication A Journal of Nature and Culture* The Crimes of Empire Carl Boggs, 2010-02-02 Imperial nations advance their own interests by exploiting other societies To those on the receiving end this is obvious while inside the empire a powerful ideological system of justification tends to hide all but the worst excess Carl Boggs argues that that the US began life two centuries ago as a nascent colonialist regime plundering and conquering the Native Tribes The Indian wars were followed by perpetual militarism and warfare fuelled by a deep sense of national exceptionalism *The Crimes Of Empire* examines several trends in this process and illustrates the new depths plumbed since 9

11 Violation of international agreements treaties and laws the use of prohibited weapons support for death squads and torture are just some of the practices that America uses to prove technical superiority and media control thus prolonging the American nightmare Historical Dictionary of the War in Vietnam Ronald B. Frankum Jr.,2011-06-10 For Southeast Asia the Vietnam War altered forever the history topography people economy and politics of the Democratic Republic of Vietnam DRV the Republic of Vietnam RVN Cambodia and Laos That the war was controversial is an understatement as is the notion that the war can be understood from any one perspective One way of understanding the Vietnam War is by marking its time with turning points both major and minor that involved events or decisions that helped to influence its course in the years to follow By examining a few of these turning points an organizational framework takes shape that makes understanding the war more possible Historical Dictionary of the War in Vietnam emphasizes the international nature of the war as well as provide a greater understanding of the long scope of the conflict The major events associated with the war will serve as the foundation of the book while additional entries will explore the military diplomatic political social and cultural events that made the war unique While military subjects will be fully explored there will be greater attention to other aspects of the war All of this is done through a chronology an introductory essay an extensive bibliography and over 600 cross referenced dictionary entries This book is an excellent access point for students researchers and anyone wanting to know more about the Vietnam War **Encyclopedia of War and American Society** Peter Karsten,2006 Publisher description **Princeton Radicals of the 1960s, Then and Now** William H. Tucker,2015-09-18 Part history part biography this book describes the issues that produced the passionate activism of the 1960s and the campaigns waged at Princeton University by Students for a Democratic Society the most important radical organization on campuses at the time The author traces the lives of nine leaders of the Princeton SDS chapter examining the effect of their participation in the radical movement on their career choices and subsequent political opinions A number of these former activists are still involved in efforts to create a more egalitarian society the same goal that motivated them half a century ago *Earth Day* Jean Griffith,2019-06-05 Issues They are the conflagrations the bonfires the burning controversies so profound so personal they move people to take action and generate the momentum to change the political system and the course of history Be it the Boston Tea Party of 1773 Jacob Coxey s Army the Bonus Army March of June 1932 the National Moratorium to End the War in Vietnam the Women s March of January 2018 or March for Our Lives to end gun violence in America in March of 2018 all came about because of Americans motivated by issues so much so they took their message of change to the street Driven by issues which galvanized public opinion people protested demonstrating public solidarity for a cause Earth Day America at the Environmental Crossroads is a political history focusing on the issues which generated the first Earth Day in April 1970 It is about the people who brought about this momentous political turning point during a period in American history of unprecedented turmoil and political protest Open its cover and you will learn about the agents of change Some have risen to take their place

in the pantheon of environmental history others are all but forgotten in the collective public mind It begins with herbicide contamination and the Cranberry Scare of November 1959 then explains the use of Agent Orange in Vietnam and its impact on the environmental movement Though the use of two nuclear weapons by the United States military ended World War II in the Pacific the inevitable arms race with the Soviet Union during the Cold War led to the testing of these weapons of mass destruction The second chapter explains how nuclear contaminated fallout became a health threat and a concern for environmentalists and the general public Overpopulation seems to be a nonissue today During the decades prior to Earth Day in 1970 the world s population numbers were a concern of monumental importance This is the focus of chapter three No credible treatment of the twentieth century environmental movement would be complete without addressing the contribution of Rachel Carson and her book Silent Spring Unlike pesticides the effects of which oftentimes surface years after exposure deteriorating air quality burned the eyes and made it difficult to breathe Polluted air particularly in the country s urban areas not only left an indelible impression in the minds of environmentalists but it also threatened public health And clean water taken for granted today by most Americans is the subject of chapter six which describes the extent to which the country s waterways were part of a multibillion dollar restoration project on the part of the states mandated by the federal government The seventh chapter is a retelling of the oil spill disaster in Santa Barbara California and the radical fringe of the environmental movement which manifested itself before Earth Day a fitting precursor to the event itself the subject of the final chapter
