**Aggregation, Consumption and Trade** L. Phlips, L.D. Taylor, 2012-12-06 In this testament to the distinguished career of H S Houthakker a number of Professor Houthakker's friends former colleagues and former students offer essays which build upon and extend his many contributions to economics in aggregation consumption growth and trade Among the many distinguished contributors are Paul Samuelson Werner Hildenbrand John Muellbauer and Lester Telser The book also includes four previously unpublished papers and notes by its distinguished dedicatee

**The Palgrave Companion to Harvard Economics** Robert A. Cord, 2024-07-05 Harvard University has been and continues to be one of the most important global centres for economics With three chapters on themes in Harvard economics and 41 chapters on the lives and work of Harvard economists these two volumes show how economics became established at the University how it produced some of the world's best known economists including Joseph Schumpeter Wassily Leontief and John Kenneth Galbraith and how it remains a global force for the very best in teaching and research in economics With original contributions from a stellar cast the volumes provide economists especially those interested in macroeconomics and the history of economic thought with an in depth analysis of Harvard economics

**Capital, Accumulation, and Money** Lester D. Taylor, 2010-09-10 Capital Accumulation and Money An Integration of Capital Growth and Monetary Theory is a book about capital and money A root concept of capital is formulated that allows for most existing concepts of capital to be unified and related to one another in consistent fashion Capital and monetary theory are integrated in a non mathematical framework that imposes a number of constraints on the macro behavior of an economy constraints which make for the straightforward understanding of such concepts as the real stock of money real balance effects and the general price level New and illuminating insights are also provided into aggregate supply and demand natural and money rates of interest the relationship between real and monetary economies and economic growth and development This fully expanded revised and updated edition features important new material on a variety of timely topics including Factors leading to the financial meltdown and turmoil of 2007-09 Why bubbles form in asset markets and how these impact on the real economy The importance of a lender of last resort in times of financial stress Future financing and funding of the U S Social Security System Additionally the author offers a number of ideas for alleviating the severity if not the avoidance altogether of financial crises in the future This is a book for those students both graduate and undergraduate and their teachers investors and the informed public who want an understanding of how economies and financial markets function without an advanced degree in mathematics

**Consumer Demand in the United States** Lester D. Taylor, H.S. Houthakker, 2009-11-25 A classic treatise that defined the field of applied demand analysis Consumer Demand in the United States Prices Income and Consumption Behavior is now fully updated and expanded for a new generation Consumption expenditures by households in the United States account for about 70% of America's GDP The primary focus in this book is on how households adjust these expenditures in response to changes in

price and income Econometric estimates of price and income elasticities are obtained for an exhaustive array of goods and services using data from surveys conducted by the Bureau of Labor Statistics and aggregate consumption expenditures from the National Income and Product Accounts providing a better understanding of consumer demand Practical models for forecasting future price and income elasticities are also demonstrated Fully revised with over a dozen new chapters and appendices the book revisits the original Houthakker Taylor models while examining new material as well such as the use of quantile regression and the stationarity of consumer preference It also explores the emerging connection between neuroscience and consumer behavior integrating the economic literature on demand theory with psychology literature The most comprehensive treatment of the topic to date this volume will be an essential resource for any researcher student or professional economist working on consumer behavior or demand theory as well as investors and policymakers concerned with the impact of economic fluctuations

Aggregation, Consumption and Trade L Phlips, Lester D Taylor, 2014-01-15 In this testament to the distinguished career of H S Houthakker a number of Professor Houthakker s friends former colleagues and former students offer essays which build upon and extend his many contributions to economics in aggregation consumption growth and trade Among the many distinguished contributors are Paul Samuelson Werner Hildenbrand John Muellbauer and Lester Telser The book also includes four previously unpublished papers and notes by its distinguished dedicatee

*A System-Wide Analysis of International Consumption Patterns* S. Selvanathan, 2012-12-06 The modern system wide approach to applied demand analysis emphasizes a unity between theory and applications Its firm foundations in economic theory make it one of the most impressive areas of applied econometrics This book presents a large number of applications of recent innovations in the area The database used consist of about 18 annual observations for 10 commodities in 18 OECD countries more than 3 100 data points Such a large body of data should provide convincing evidence one way or the other about the validity of consumption theory

A PREVIEW OF THE BOOK The overall importance of the analysis presented in the book can be seen from the following table which shows the significant contribution of the OECD to the world economy As can be seen the 24 member countries account for about 50 percent of world GDP in 1975 In this book we present an extensive analysis of the consumption patterns of the OECD countries

**Econometric Advances in Spatial Modelling and Methodology** Daniel A. Griffith, C. Amrhein, Jean-Marie Huriot, 2013-04-17 The purpose of models is not to fit the data but to sharpen the questions S Karlin 11th R A Fisher Memorial Lecture Royal Society 20 April 1983 We are proud to offer this volume in honour of the remarkable career of the Father of Spatial Econometrics Professor Jean Paelinck presently of the Tinbergen Institute Rotterdam Not one to model solely for the sake of modelling the above quotation nicely captures Professor Paelinck s unceasing quest for the best question for which an answer is needed His FLEUR model has sharpened many spatial economics and spatial econometrics questions Jean Paelinck arguably is the founder of modern spatial econometrics penning the seminal introductory monograph on this topic Spatial Econometrics with Klaassen in 1979

In the General Address to the Dutch Statistical Association on May 2 1974 in Tilburg he coined the term spatial econometrics to designate a growing body of the regional science literature that dealt primarily with estimation and testing problems encountered in the implementation of multiregional econometric models Anselin 1988 p 7 he already had introduced this idea in his introductory report to the 1966 Annual Meeting of the Association de Science Regionale de Langue Fran aise

*Handbook of the Economics of Art and Culture* Victor A. Ginsburgh, David Throsby, 2006-09-13 Over the last 30 or 40 years a substantial literature has grown up in which the tools of economic theory and analysis have been applied to problems in the arts and culture Economists who have surveyed the field generally locate the origins of contemporary cultural economics as being in 1966 the year of publication of the first major work in modern times dedicated specifically to the economics of the arts It was a book by Baumol and Bowen which showed that economic analysis could illuminate the supply of and demand for artistic services the contribution of the arts sector to the economy and the role of public policy Following the appearance of the Baumol and Bowen work interest in the economics of the arts grew steadily embracing areas such as demand for the arts the economic functions of artists the role of the nonprofit sector and other areas Cultural economics also expanded to include the cultural or entertainment industries the media movies the publishing industry popular music as well as heritage and museum management property right questions in particular copyright and the role of new communication technologies such as the internet The field is therefore located at the crossroads of several disciplines economics and management but also art history art philosophy sociology and law The Handbook is placed firmly in economics but it also builds bridges across these various disciplines and will thus be of interest to researchers in all these different fields as well as to those who are engaged in cultural policy issues and the role of culture in the development of our societies Presents an overview of the history of art markets Addresses the value of art and consumer behavior toward acquiring art Examines the effect of art on economies of developed and developing countries around the world Studies in Global Econometrics H. Theil, 2007-07-11 Studies in Global Econometrics is a collection of essays on the use of cross country data based on purchasing power parities The two major applications are the development over time of per capital gross domestic products including that of their inequalities among countries and regions and the fitting of cross country demand equations for broad groups of consumer goods The introductory chapter provides highlights of the author s work as relating to these developments One of the main topics of the work is a system of demand equations for broad groups of consumer goods fitted by means of cross country data These data are from the International Comparison Program which provides PPP based figures for a number of years and countries Similar data are used for the measurement of the dispersion of national per capita incomes between and within seven geographic regions *Demand System Specification and Estimation* Robert A. Pollak, Terence J. Wales, 1992-08-06 This book explores the principal issues involved in bridging the gap between the pure theory of consumer behavior and its empirical implementation The theoretical starting point is the familiar static one period

utility maximizing model in which the consumer allocates a fixed budget among competing categories of goods The authors focus upon four issues of primary importance in empirical demand analysis the structure of preferences the treatment of demographic variables the treatment of dynamics and the specification of the stochastic structure of the demand system

**The Kalman Filter in Finance** C. Wells, 2013-03-09 A non technical introduction to the question of modeling with time varying parameters using the beta coefficient from Financial Economics as the main example After a brief introduction to this coefficient for those not versed in finance the book presents a number of rather well known tests for constant coefficients and then performs these tests on data from the Stockholm Exchange The Kalman filter is then introduced and a simple example is used to demonstrate the power of the filter The filter is then used to estimate the market model with time varying betas The book concludes with further examples of how the Kalman filter may be used in estimation models used in analyzing other aspects of finance Since both the programs and the data used in the book are available for downloading the book is especially valuable for students and other researchers interested in learning the art of modeling with time varying coefficients

The Econometrics of Demand Systems David L. Edgerton, Bengt Assarsson, Anders Hummelose, Ilkka P. Laurila, Kyrre Rickertsen, Per Halvor Vale, 2012-12-06 This book contains some of the results from the research project Demand for Food in the Nordic Countries which was initiated in 1988 by Professor Olof Bolin of the Agricultural University in Ultuna Sweden and by Professor Karl Iohan Weckman of the University of Helsinki Finland A pilot study was carried out by Bengt Assarsson which in 1989 led to a successful application for a research grant from the NKJ The Nordic Contact Body for Agricultural Research through the national research councils for agricultural research in Denmark Finland Norway and Sweden We are very grateful to Olof Bolin and Karl Iohan Weckman without whom this project would not have come about and to the national research councils in the Nordic countries for the generous financial support we have received for this project We have received comments and suggestions from many colleagues and this has improved our work substantially At the start of the project a reference group was formed consisting of Professor Olof Bolin Professor Anders Klevmarken Agr lie Gert Aage Nielsen Professor Karl Iohan Weckman and Cando oecon Per Halvor Vale Gert Aage Nielsen left the group early in the project for a position in Landbanken and was replaced by Professor Lars Otto while Per Halvor Vale soon joined the research staff The reference group has given us useful suggestions and encouraged us in our work We are very grateful to them

The Econometrics of Panel Data László Mátyás, Patrick Sevestre, 2013-12-01 The aim of this volume is to provide a general overview of the econometrics of panel data both from a theoretical and from an applied viewpoint Since the pioneering papers by Edwin Kuh 1959 Yair Mundlak 1961 Irving Hoch 1962 and Pietro Balestra and Marc Nerlove 1966 the pooling of cross sections and time series data has become an increasingly popular way of quantifying economic relationships Each series provides information lacking in the other so a combination of both leads to more accurate and reliable results than would be achievable by one type of series alone Over the last 30 years much work has been done investigation of the

properties of the applied estimators and test statistics analysis of dynamic models and the effects of eventual measurement errors etc These are just some of the problems addressed by this work In addition some specific difficulties associated with the use of panel data such as attrition heterogeneity selectivity bias pseudo panels etc have also been explored The first objective of this book which takes up Parts I and II is to give as complete and up to date a presentation of these theoretical developments as possible Part I is concerned with classical linear models and their extensions Part II deals with nonlinear models and related issues logit and probit models latent variable models duration and count data models incomplete panels and selectivity bias point processes and simulation techniques

Growth of Economics in the Twentieth Century K. Puttaswamaiah, 2009 The array of contributions offered in this volume on the growth of economics is comprehensive There are sufficient number of ideas and perspectives about economic theories to whet the appetite of the most scholars or readers Others more inclined to welcome efforts to explain economic phenomena will find a diversity of interpretations of events which should be sufficient to stimulate the imagination as well as the understanding of policy choices The book offers insights about developments in economic theory and modes of analysis during the twentieth century and earlier Book Jacket

*Paul Samuelson on the History of Economic Analysis* Steven G. Medema, Anthony M. C. Waterman, 2014-11-17 As one of the most famous economists of the twentieth century Paul Anthony Samuelson revolutionized many branches of economic theory As a diligent student of his predecessors he reconstructed their economic analyses in the mathematical idiom he pioneered Out of Samuelson's more than eighty articles essays and memoirs the editors of this collection have selected seventeen Twelve are mathematical reconstructions of some of the most famous work in the history of economic thought work by David Hume Francois Quesnay Adam Smith Karl Marx and others One is a methodological essay defending the Whig history that he was sometimes accused of promulgating two deal with the achievements of Joseph Schumpeter and Denis Robertson and two review theoretical developments of his own time Keynesian economics and monopolistic competition The collection provides readers with a sense of the depth and breadth of Samuelson's contributions to the study of the history of economics
