## **Aggression And Peacefulness In Humans And Other Primates:**

*Aggression and Peacefulness in Humans and Other Primates* James Silverberg, J. Patrick Gray, 1992-03-19 This book explores the role of aggression in primate social systems and its implications for human behavior Many people look to primate studies to see if and how we might be able to predict violent behavior in humans or ultimately to control war Of particular interest in the study of primate aggression are questions such as how do primates use aggression to maintain social organization what are the costs of aggression why do some primates avoid aggressive behavior altogether Students and researchers in primatology behavioral biology anthropology and psychology will read with interest as the editors and contributors to this book address these and other basic research questions about aggression They bring new information to the topic as well as an integrated view of aggression that combines important evolutionary considerations with developmental sociological and cultural perspectives Ethnic Conflict and Indoctrination Irenäus Eibl-Eibesfeldt, Frank K. Salter, 1998 Violent ethno nationalist conflicts continue to mar the history of the current century yet no satisfactory answer to the question of why humans are susceptible to indoctrination by ideologies that lead to inter group hostility has so far been found In this volume an international team of leading scientists from many different fields approach this complex issue from a biological perspective treating indoctrinability as a predisposition that has its roots in humanity's evolutionary past

**Indoctrinability, Ideology, and Warfare** Irenäus Eibl-Eibesfeldt, Frank K. Salter, 1998 Violent ethno nationalist conflicts continue to mar the history of the twentieth century yet no satisfactory answer as to why humans are susceptible to indoctrination by ideologies leading to inter group hostility has thus far been found This volume brings together an international team of leading scientists to address this complex issue from disciplines as diverse as anthropology psychology psychobiology sociology philosophy ethology sociology and political science Treating the processes of indoctrination as a biological phenomenon with physiological and psychological aspects these essays explore the answers to this pressing question in humanity's evolutionary past *Keeping the Peace* Graham Kemp, Douglas P. Fry, 2004-11-23 This collection of ethnographies discusses how non violent values and conflict resolution strategies can help to create and maintain peace

*Toward a Theory of Peace* Randall Caroline Watson Forsberg, 2019-12-15 Military analyst peace activist teacher and social theorist Randall Caroline Watson Forsberg 1943 2007 founded the Nuclear Freeze campaign and the Institute for Defense and Disarmament Studies In *Toward a Theory of Peace* completed in 1997 and published for the first time here she delves into a vast literature in psychology anthropology archeology sociology and history to examine the ways in which changing moral beliefs came to stigmatize forms of socially sanctioned violence such as human sacrifice cannibalism and slavery eventually rendering them unacceptable Could the same process work for war Edited and with an introduction by political scientists Matthew Evangelista Cornell University and Neta C Crawford Boston University both of whom worked with Forsberg *Great Ape Societies* William C. McGrew, Linda F. Marchant, Toshisada Nishida, 1996-07-28 The great apes

chimpanzees bonobos gorillas and orangutans are our closest living relatives sharing a common ancestor only five million years ago We also share key features such as high intelligence omnivorous diets prolonged child rearing and rich social lives The great apes show a surprising diversity of adaptations particularly in social life ranging from the solitary life of orangutans through patriarchy in gorillas to complex but different social organisations in bonobos and chimpanzees As great apes are so close to humans comparisons yield essential knowledge for modelling human evolutionary origins Great Ape Societies provides comprehensive up to date syntheses of work on all four species drawing on decades of international field work zoo and laboratory studies It will be essential reading for students and researchers in primatology anthropology psychology and human evolution

*Encyclopedia of Violence, Peace, & Conflict: A-F* Lester R. Kurtz, 2008 Provides timely and useful information about antagonism and reconciliation in all contexts of public and personal

life An essential reference for students and scholars working in the field of peace and conflict resolution studies and for those seeking to explore alternatives to violence and share visions and strategies for social justice and social change **The Oxford Handbook of Evolutionary Perspectives on Violence, Homicide, and War** Todd K. Shackelford, Viviana A. Weekes-Shackelford, 2012-08-23 This volume synthesizes the theoretical and empirical work of leading scholars in the evolutionary sciences to produce an extensive and authoritative review of this literature **Global Challenges: Peace and War** Yih-Jye Hwang, Lucie Cerna, 2013-07-04 What is the idea of peace Is peace merely the absence of war or can it also mean something else Is peace a condition of emancipation the status quo or is it a system of hegemonic stability How can peace be acquired whatever it may mean And above all what is the relationship between peace and war This textbook aims to offer a comprehensive and up to date introduction to studies of peace and war from both theoretical and empirical perspectives Rather than providing students the answer of what the idea of peace means this volume is designed to make and assist students to contemplate how peace can be thought by investigating its opposite war broadly defined **Primate Behavior and Human Origins** Glenn E. King, 2015-10-30 This comprehensive introduction demonstrates the theoretical perspectives and concepts that are applied to primate behavior and explores the relevance of non human primates to understanding human behavior Using a streamlined and student friendly taxonomic framework King provides a thorough overview of the primate order The chapters cover common features and diversity and touch on ecology sociality life history and cognition Text boxes are included throughout the discussion featuring additional topics and more sophisticated taxonomy The book contains a wealth of illustrations and further resources to support teaching and learning are available via a companion website Written in an engaging and approachable style this is an invaluable resource for students of primate behavior as well as human evolution **War, Peace, and Human Nature** Douglas P. Fry, 2015-02 The chapters in this book posit that humans clearly have the capacity to make war but since war is absent in some cultures it cannot be viewed as a human universal And counter to frequent presumption the actual archaeological record reveals the recent emergence of war It does not typify the ancestral type of human society the nomadic forager band and contrary to widespread assumptions there is little support for the idea that war is ancient or an evolved adaptation Views of human nature as inherently warlike stem not from the facts but from cultural views embedded in Western thinking Amazon com Masculinities, Violence and Culture Suzanne Hatty, 2000-05-11 This book explores the relationship between masculinity and violence within the context of cultural change and escalating violence This unique analysis links the growing sociological and psychological literature on masculinity with contemporary criminological research The author focuses on A critical examination of the major biological psychological sociological and anthropological models of masculinity and violence Formulating an integrated theoretical approach to the relationship between violence and masculinity Violence as a gendered activity Representations of violence and masculinity in popular culture including cartoons fiction television and film Masculine identity is not viewed as rigid but

as flexible and changeable This position enables the author to take a completely fresh look at relations between power privilege and gender      *Primate Psychology* Dario Maestripieri, 2009-07-01 This book one of the few comprehensive attempts at integrating behavioral research into human and nonhuman primates does precisely that and in doing so offers a clear in depth look at the mutually enlightening work being done in psychology and primatology      War in Human Civilization Azar Gat, 2008-03-26 Why do people go to war Is it rooted in human nature or is it a late cultural invention How does war relate to the other fundamental developments in the history of human civilization And what of war today is it a declining phenomenon or simply changing its shape In this truly global study of war and civilization Azar Gat sets out to find definitive answers to these questions in an attempt to unravel the riddle of war throughout human history from the early hunter gatherers right through to the unconventional terrorism of the twenty first century In the process the book generates an astonishing wealth of original and fascinating insights on all major aspects of humankind s remarkable journey through the ages engaging a wide range of disciplines from anthropology and evolutionary psychology to sociology and political science Written with remarkable verve and clarity and wholly free from jargon it will be of interest to anyone who has ever pondered the puzzle of war      **The Human Potential for Peace** Douglas P. Fry, 2006 In *The Human Potential for Peace An Anthropological Challenge to Assumptions about War and Violence* renowned anthropologist Douglas P Fry shows how anthropology with its expansive time frame and comparative orientation can provide unique insights into the nature of war and the potential for peace Challenging the traditional view that humans are by nature primarily violent and warlike Professor Fry argues that along with the capacity for aggression humans also possess a strong ability to prevent limit and resolve conflicts without violence He draws on data from cultural anthropology archaeology and sociology as well as from behavioral ecology and evolutionary biology to construct a biosocial argument that challenges a host of commonly held assumptions
